## **New Home Market**

#### HOUSING STARTS WEAKEN IN FEBRUARY

Total starts in the Alberta Capital Region declined year-over-year in February due to a pullback in single-detached construction, despite a modest improvement in multiple dwelling activity. Total housing starts across the Edmonton Census Metropolitan Area (CMA) declined by 5.7 per cent from February 2006 to 1,106 units. In spite of the February

retreat, total housing starts for the year-to-date remain nine per cent ahead of new housing activity reported in the first two months of 2006.

For the third month in a row, singledetached starts declined on a yearover-year basis across Metro Edmonton. Builders started work on

576 singles in February, representing a drop of 14 per cent from the second month of 2006. Within Edmonton City the pullback was more pronounced, with single-detached starts falling by 19 per cent year-over-year versus a 4.5 per cent drop from last February in the suburban areas. For the yearto-date, single-detached starts are 13 per cent below last year's recordsetting pace. Despite the slowdown, production so far this year still represents the second best performance on record after two months.

Single-detached completions reached 678 units in February, up by a wide margin over the same month last year. Absorptions also rose abruptly in response to the surging completions, climbing by 46 per cent over February 2006 to 644 units. However, with completions exceeding absorptions last month, inventories of completed and unoccupied singles (including show homes) moved back above the 500 unit mark for the first time since August of last year.

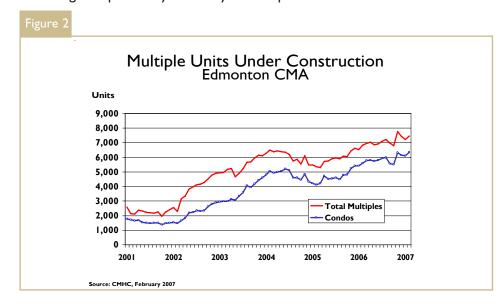

New home prices remain on a strong upward trend across the region. Following a 33 per cent year-over-year

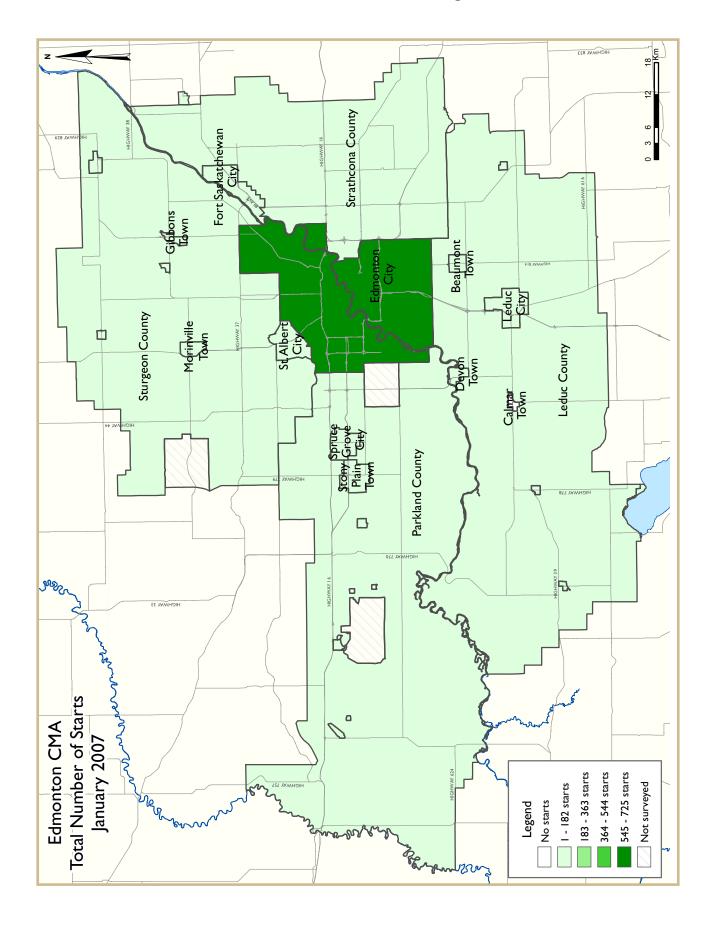

increase in January, the average price for a new single-family home absorbed last month reached a record \$386,829, representing an increase of 38 per cent over the average recorded in February 2006. Tight market conditions in the existing market, meanwhile, continue to produce price acceleration in resale homes. For the second month in a row this year, the average price of existing single-family homes sold on the Edmonton Real Estate Board rose by over 50 per cent from the same month in 2006.

Following a large year-over-year increase in January, new multiple unit activity experienced a moderate gain last month compared with February 2006. Semi-detached, row and apartment starts combined reached 530 units in February, representing a five per cent advance over the 504 units started in the second month of 2006. While semi-detached starts fell by 45 per cent year-over-year, row and apartment starts together increased by 37 per cent over February 2006 numbers. All of February's multiple unit starts were destined for the condominium homeowner or markets with no rental starts reported.

On a year-to-date basis, multiple dwelling starts to the end of February were 57 per cent ahead of production recorded in the first two months of 2006. Builders of row (townhouse) units have made the largest gains over last year, with starts after two months reaching 334 units compared with only 51 in the first two months of 2006. Apartment starts have also increased by sizable amount, up by 86 per cent from January and February of last year to 549 units. In contrast, semi-detached starts have tumbled by 56 per cent year-to-date to 134 units versus 302 units started in the first two months of 2006.

Multiple unit completions reached 284 units in February, which was down from the previous month but up on a year-over-year basis from last February. Absorptions also exceeded last February's count by a wide margin and exceeded completions by 25 units. As such, the inventory of completed and unoccupied multiples dropped from the previous month. At 428 units, the inventory in February was 56 per cent below the stock of units available for sale or lease in February 2006.

#### HOUSING NOW REPORT TABLES

#### Available in ALL reports:

- I Housing Activity Summary of CMA
- 2 Starts by Submarket and by Dwelling Type Current Month or Quarter
- 2.1 Starts by Submarket and by Dwelling Type Year-to-Date

#### METHODOLOGY

#### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2001 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

#### **Market Absorption Survey Methodology**

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

# STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

#### **DWELLING TYPES:**

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

#### INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

#### **GEOGRAPHICAL TERMS:**

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2001 Census area definitions.

#### CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that Canada maintains one of the best housing systems in the world. We are committed to helping Canadians access a wide choice of quality, affordable homes, while making vibrant, healthy communities and cities a reality across the country.

For more information, visit our website at <a href="http://www.cmhc.ca/">http://www.cmhc.ca/</a>

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.

Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is now available for **free** on CMHC's website. You can now view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! Go to <a href="http://www.cmhc.ca/housingmarketinformation">http://www.cmhc.ca/housingmarketinformation</a>

For more information on MAC and the wealth of housing market information available to you, visit us today at <a href="http://www.cmhc.ca/housingmarketinformation">http://www.cmhc.ca/housingmarketinformation</a>

To subscribe to priced, printed editions of the national standardized product suite or regional specialty publications, call I 800 668-2642.

©2007 Canada Mortgage and Housing Corporation. All rights reserved. CMHC grants reasonable rights of use of this publication's content solely for personal, corporate or public policy research, and educational purposes. This permission consists of the right to use the content for general reference purposes in written analyses and in the reporting of results, conclusions, and forecasts including the citation of limited amounts of supporting data extracted from this publication. Reasonable and limited rights of use are also permitted in commercial publications subject to the above criteria, and CMHC's right to request that such use be discontinued for any reason.

Any use of the publication's content must include the source of the information, including statistical data, acknowledged as follows:

Source: CMHC (or "Adapted from CMHC," if appropriate), name of product, year and date of publication issue.

Other than as outlined above, the content of the publication cannot be reproduced or transmitted to any person or, if acquired by an organization, to users outside the organization. Placing the publication, in whole or part, on a website accessible to the public or on any website accessible to persons not directly employed by the organization is not permitted. To use the content of any CMHC Market Analysis publication for any purpose other than the general reference purposes set out above or to request permission to reproduce large portions of, or entire CMHC Market Analysis publications, please contact: the Canadian Housing Information Centre (CHIC) at <a href="mailto:chic@cmhc.gc.ca">mailto:chic@cmhc.gc.ca</a>; (613) 748-2367 or 1 800 668-2642

For permission, please provide CHIC with the following information: Publication's name, year and date of issue.

Without limiting the generality of the foregoing, no portion of the content may be translated from English or French into any other language without the prior written permission of Canada Mortgage and Housing Corporation.

The information, analyses and opinions contained in this publication are based on various sources believed to be reliable, but their accuracy cannot be guaranteed. The information, analyses and opinions shall not be taken as representations for which Canada Mortgage and Housing Corporation or any of its employees shall incur responsibility.

# NEW SURVEYS And New Reports

We Consulted ... Clients Spoke ... We Listened
