

*ECONOMIC PROFILE OF  
QUEBEC'S MAIN  
FISHING FLEETS*

## **Economic profile of Quebec's main fishing fleets**

For the fifth consecutive year, the 1999–2000 annual statistical review includes a section on Quebec's main fishing fleets. The next few pages contain information on the mean size, workforce, fishing effort and landings of Quebec fleets.

To characterize each of the fleets, we have classified them by the main species landed, and in some cases, by fishing area, gear type and vessel length. In addition, landings and average prices are always calculated on the basis of what is known as a specialized fleet, one consisting of specialized enterprises. Specialized fishing enterprises are those for which the total value of their landings is equal to at least 25% of the average value of their fleet.

Last but not least, we have included a graph illustrating changes in average landings over the last seven years for each fleet.
