## RESOURCE

## ACCESSIBILITY

## Resource accessibility

In order to achieve its objective of conserving and preserving various fish stocks, DFO imposes control measures each year. Licensing and quotas are responding to this necessity.

Quotas are used to determine the quantities allocated to each fishery, while licensing is an efficient means of controlling access to the various resources.

Licences for anadromous and catadromous species are issued by the Government of Quebec, while the Federal Government looks after licensing for all other species.

## RESOURCE ACCESSIBILITY

(1) Refers to NAFO (Northwest Atlantic Fisheries Organization) divisions except for Shrimp where we use the management areas as established
by the Department of Fisheries and Oceans.
(2)
(3) This global quota is subdivided into individual quotas and is set for Quebec fishers only.
(4) This global quota is subdivided into individual quotas.
(5) For this total, figures originating from Newfoundland, Gulf and Scotia Fundy Regions are not final.
(6) Dates indicating the duration of the fishery except for Herring where we identify the various Spring and Fall fisheries.
(7) Unit 1 is grouping together 4RST,3PN divisions (January to May) and 4Vn division (January to May) and Unit 2 is grouping together 3Pn division (June to December) and 3Ps,4Vn divisions (June to December)
(8) For this species only, quantities are indicated in meat weight.
(9) Considering that these are individual quotas, duration periods are not specified.
In accordance with Access to Information Act, we are reporting landings against quotas only where there were at least three participants, unless we have the authorization from the concerned participants.
