What's new?

With the introduction of the Universal Child Care Benefit (UCCB) last year, the supplement for children **under** 7 will no longer be a component of the CCTB calculation, effective July 2007. As a result, child care expenses claimed on your 2006 and subsequent returns will no longer affect the amount of the CCTB you are entitled to receive.

Check your notice carefully

To ensure that you receive the amount to which you are entitled, please review the following information on your notice:

- address;
- names and birth dates of all your eligible children;
- marital status;
- province or territory of residence, and
- 2006 family net income.

If any of the information used to calculate your CCTB payment is wrong or if it changes at any time during the year, contact us **right away**.

Online services

My Account (www.cra.gc.ca/myaccount) – You can manage personal information related to your CCTB, GST/HST credit, UCCB, and income tax accounts.

Child and Family Benefits page

(www.cra.gc.ca/benefits) – You will find guides, forms, explanations and more.
