Net cash income is a measure of the cash available to producers from the farming business for living expenses, principal repayment and reinvestment in the farm. Realized net income includes depreciation charges and income-in-kind. Total net income accounts for changes in on-farm inventory.

\* The percent change calculation may not be exact due to rounding.

\*\* The calculation of percent change between a negative number and a positive number yields a counter-intuitive,

though arithmetically correct negative result.
