Direct investment abroad:

This includes investment by the Canadian reporting entity in 1) foreign subsidiaries, 2) foreign associates and joint ventures, 3) foreign branches and 4) non-capitalized expenditures abroad for mining, oil exploration and miscellaneous investments. The items of investment to be reported for these entities are defined on the last page of the questionnaire.

A **foreign subsidiary** is a company incorporated abroad in which the reporting entity owns a majority of shares carrying the right to elect a majority of the members of the board of directors. A **foreign associate** is a company incorporated abroad in which the reporting entity owns at least 10% of the voting rights or is controlled by substantially the same shareholders. Extra-national companies (E.N.C.'s) should be included under foreign subsidiaries or associates. E.N.C.'s are companies incorporated in Canada with assets (except securities and cash) and business operations located entirely outside Canada. A joint venture is an investment undertaken by several parties. The Canadian reporting entity should report its participation in any foreign joint ventures. Foreign branches should be reflected using the net assets (i.e. total assets outside Canada less total liabilities to residents of foreign countries) of these operations located abroad. Miscellaneous investments should include agencies, warehouses, mining claims, real estate, seats on foreign stock exchanges, etc. Non-capitalized expenditures for mining and oil exploration and development abroad include all expenditures which occurred during the reporting period.
