PART III - 1999 Annual Wholesale Trade Survey

Business Unit

A business unit is the smallest separate operating part of a business that can report inputs such as material and supplies; energy; goods purchased for resale; whichever purchased services are available at this level; employee earnings; and employment. In addition, it can report outputs such as sales, shipments or revenue, whichever is appropriate, broken down by goods and services. For a wholesaler, or reseller, this woud be typically a distribution centre.

A business unit is ordinarily located at one physical location, but in some cases, in order to facilitate reporting of information, a business unit can include operations at more than one location.
