Survey Objective

The purpose of this survey is to help Transport Canada and Natural Resources Canada improve road safety, monitor fuel consumption and deal with the impact of vehicle usage on the environment. The information you give will be combined with other data already available to provide a better understanding of vehicle usage, safety issues, and fuel purchases. The information you are asked to provide in this log covers:

- Start and end time of each trip – to see when traffic is on the road.
- Odometer readings for each trip – to measure distance travelled.
- Number of passengers on each trip and types of roads driven – to provide information related to safety.
- Trip purpose – to determine the type of trips.
- Truck configuration – to see what types of configurations are being used.
- Driver's sex and age – to obtain a profile of drivers.
- Fuel purchases – to monitor fuel consumption.

For more background information about specific questions, please see pages 32 and 33.

Reporting procedure

Please complete the trip portion of the log for the first seven (7) days of the period stated on the label on page 2. Then continue to complete the fuel portion of the log for the remainder of the period stated on the label or until you have recorded five fuel purchases.

Please remember ... 		For instructions on how to complete the log, see page 4.		What if this vehicle isn't used much - or at all? This survey wants to measure how much Canadians are using or not using their vehicles. For our studies - a vehicle not in use is just as important as one that is. Days that the vehicle is not used should be recorded on Page 5.		Please mail back this log if you no longer own or lease this vehicle.		When to start a new trip: 1. A change of purpose or use. 2. If you stop longer than 30 minutes. 3. If truck configuration has changed. 4. If status of truck load changes (see page 4). 5. If the driver changes.	

Please refer to the examples on pages 24 to 31.
