Preliminary interview questionnaire, January 2003: Survey of Labour and Income Dynamics

Note of appreciation

Executive Summary

A Preliminary interview of background information is collected for all respondents aged 16 and over, who enter the sample for the Survey of Labour and Income Dynamics (SLID). For the majority of the longitudinal respondents, this occurs when a new panel is introduced and the preliminary information is collected during the first Labour interview. However, all persons living with a longitudinal respondent are also interviewed for SLID. Thus Preliminary interviews are conducted for new household members during their first Labour interview after they join the household. Longitudinal persons who have turned 16 while their household is in the SLID sample are then eligible for SLID interviews so they are asked the Preliminary interview questions during their first Labour interview.

The purpose of this document is to present the questions, possible responses and question flows for the 2003 Preliminary questionnaire.

Table of Contents

1. Introduction

A Preliminary interview of background information is collected for all respondents aged 16 and over who enter the Survey of Labour and Income Dynamics (SLID) sample. For the majority of the longitudinal respondents, this occurs when a new panel is introduced and the preliminary information is collected during the first Labour interview. However, all persons living with a longitudinal respondent are also interviewed for SLID. Preliminary interviews are conducted for new household members (joiners) during their first Labour interview after they join the household. Longitudinal persons who have turned 16 while their household is in the SLID sample are then eligible for SLID interviews so they are asked the Preliminary interview questions during their first Labour interview.

A labour questionnaire is collected for all respondents 16 years of age and over. A new panel (Panel 4) was introduced in 2003, for reference year 2002, which consisted of approximately 17,000 households. Panel 3, introduced in 2000 for reference year 1999 and consisting of approximately 19,000 households, completed its fourth year with the survey.

This research paper presents the content of the Preliminary interview, including question wording, possible responses and flows of questions.

2. Content

The Preliminary interview has three main sections:

EX: Work Experience – data on both part- and full-time work;
DE: Family and Personal History – marital history, birth history, mother tongue, place of birth, ethnic origin;
EP: Educational Attainment – certificates and degrees, years of schooling, and parents' level of education.

3. What's New

New questions:

DE_Q086

The wording of question DE_Q085 was awkward for respondents who answered No, Don't know or Refuse to DE_Q060 or DE_Q065 and who had not 'given birth to' or 'fathered' any children. They are now asked this new question.

Modified questions:

DE_Q060, DE_Q065

If the response to DE_Q060 or DE_Q065 is No, Don't know or Refuse, the flow will now go to the new question DE_Q086.

4. How to Read This Document

This document is a written approximation of the CAI interview, or the "questionnaire". The CAI process is as follows:

(a) A question appearing on the computer screen is read aloud to the respondent.

(b) The respondent's answer is directly entered into the computer by the interviewer.

(c) Based on the answer given, and/or age or other flow criteria, the computer determines the next question to be asked and displays it on the screen.

Question numbers: For each section, the question numbers refer to the actual numbers used in the software which appear on an interviewer's computer screen. Bold text is read, as worded, by the interviewer. Instructions for the interviewer are preceded by the word, "INTERVIEWER" and are not read out loud to the respondent.

Naming conventions: Naming conventions were changed to conform to the standards for Statistics Canada social surveys.

Questions with   Q = (e.g. EP_Q001) = question text read to a respondent

                     C = (e.g. EP_C001) = internal check

                     N = (e.g. EP_N035) = interviewer instructions

                     E = (e.g. EP_E001) = interviewer instruction edit

Pre-fill items: Shown in square brackets [ ] are items specific to each respondent's interview. The software adds the relevant information into the question, making it simply a matter of reading for the interviewer. Pre-fill items include:

[respondent] – This is the first and last name of the household member to whom the questions refer. This is not necessarily the person who is talking to the interviewer.

[current year] – This is the year **during which** the information is collected.

[reference year] – This is the year **for which** the information is collected.

[age] – This is the respondent's age in years, calculated as of January 1 of the current year.

[years ago] – This is the number of years ago the respondent first started working.

Headers: For some questions important information is noted at the top of the screen. In this document, this information is given at the beginning of each section description.

Ranges: Hard ranges are specified for some of the questions. The hard range gives the highest and lowest acceptable response values. The system will not accept a number outside the range. A soft range specifies an upper and lower limit which if exceeded will result in a probe to confirm that the amount entered is correct. The entry is allowed as long as it is not outside the hard range.

Dates: All dates are in DD/MM/YYYY format unless otherwise specified.

5. Preliminary Questionnaire

5.1 EX Module

If Hhinfo.prelflag = 1 (member is a joiner or a new panel) the proxy question
                                     will be asked in the Preliminary
