EXECUTIVE SUMMARY

A Preliminary Interview of background information is collected for all respondents aged 16 and over who enter the SLID sample. For the majority, the longitudinal respondents, this occurs when a new panel and a topup sample is introduced and is conducted as part of the annual Labour interview. However, all persons living with a longitudinal respondent are also interviewed for SLID. Thus some Preliminary interviews are conducted for new household members and longitudinal persons who have turned 16.

Starting in 1998 an annual cross sectional topup sample of 9,000 households was added and eligible members of this group also received the preliminary questions.

1. INTRODUCTION

A Preliminary Interview of background information is collected for all respondents aged 16 and over who enter the SLID sample. For the majority, the longitudinal respondents, this occurs when a new panel is introduced and is conducted as part of the annual Labour interview. However, all persons living with a longitudinal respondent are also interviewed for SLID. Thus some Preliminary Interviews are conducted for new household members (joiners), and longitudinal persons who have turned 16.

Approximately 9000 new households were added to the SLID sample in January 1998 as “topup sample” to help compensate for attrition to improve cross-sectional income estimates. All eligible members of the topup sample will receive the preliminary questions.

All of collection is by computer-assisted interviewing (CAI) which requires no paper “questionnaire”. This document presents the questions, answers and question flows for the CAI Preliminary 1998 questionnaire.

2. CONTENT

The Preliminary Interview has three main sections:

- C work experience—data on both part and full-time work (EXPRES module);
- C family and personal history—basic demographics, marital history, birth history, mother tongue, place of birth, ethnic origin, (DEMPRES module);
- C educational attainment—certificates and degrees, years of schooling, and parents’ level of education (EDUPRES module);

3. WHAT'S NEW IN 1998

Starting in 1998, the age of eligibility for the preliminary interview was changed to 16 and over. In the past, the preliminary was collected once from new respondents 15 years and older as background information for the annual labour component of the January interview. However, the minimum age for labour is 16 and the responses for 15 year olds were stored until their first labour interview the next year. From 1998 onwards, an annual topup sample will be added to SLID and remain in the survey for only one year. It would be pointless to collect preliminary information from topup 15 year olds who would never receive a labour interview. The change in eligibility to 16 makes the January application more consistent, simpler and reduces respondent burden for the top up sample.

4. HOW TO READ THIS DOCUMENT

This document is a written approximation of the CAI interview, or the "questionnaire". The CAI process is as follows:

- a) A question appearing on the computer screen is read aloud to the respondent.
- b) The respondent's answer is directly entered by the interviewer.
- c) Based on the answer given, and/or age or other flow criteria, the computer determines the next question to be asked and displays it on the screen.

Question numbers: For each section, the question numbers generally refer to the actual numbers used in the software which appear on an interviewer's computer screen. Text in capital letters is read, as worded, by the interviewer. Those questions in lower case with "Interviewer:" at the beginning are questions to be answered directly by the interviewer without asking the respondent. Those questions with "Internal logic:" at the beginning are questions answered directly by

the computer. They are invisible to the interviewer, and are required to direct question flow.

Pre-fill items: These are items specific to each respondent's interview. The software adds the relevant information into the question, making it simply a matter of reading for the interviewer. Prefill items (given in square brackets []) include:

[respondent] - This is the first and last name of the household member that the questions refer to. This is not necessarily the person who is talking to the interviewer.

[current year] - This is obvious, 1998

[reference year] - This is the year for which the information is collected, 1997.

[age] - This is the respondent's age in years, calculated as of January 1 of the current year.

[yrs_ago] - This is the number of years ago the respondent first started working.

Headers: For each question, important information is noted at the top of the screen. In this document, this information is given at the beginning of each section description.

Range: Hard ranges are specified for some of the questions. The hard range gives the highest and lowest acceptable response values. The system will not accept a number outside the range. A soft range specifies an upper and lower limit which if exceeded will result in a probe to confirm that the amount entered is correct. The entry is allowed as long as it is not outside the hard range..

Dates: All dates are entered numerically in boxes, using the MM/YY format.

Function Keys: Interviewers have a number of keys on the computer (function keys) which are available to provide them with the following options.

Help (F1) - explains items on the opening screen

Language (F2) - permits the interviewer to change the display (wording) of questions to the other official language if a respondent requests a different language than the interview began in.

Options (F3) - gives the interviewer access to some optional functions or information rosters. The choice available in the Preliminary interview is

Household list : name, age, sex, marital status of each household member.

Employer Roster - names of each employer listed in the LFS

Comment (F4)- gives the interviewer the opportunity to add additional information in a note that will be attached to the data for that question.

These comments are often useful during data processing.

Refusal (F5) - to indicate if the respondent refuses to answer the question.

This response is shown in the paper as R.

Don't know (F6) - to indicate if the respondent doesn't know the answer to the question. This answer is shown in this paper as DK.

PrevQ (F7) - takes you back to the previous question.

Qlist (F8) - displays all the questions completed so far in this part of the interview.

Forward (F9) - fast forward to the current question from an earlier question viewed by Qlist.

End (F10) - allows the interviewer to interrupt or terminate the interview.
