Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

Labour Interview Questionnaire - January 2001 Survey of Labour and Income Dynamics

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

EXECUTIVE SUMMARY

Every January, the Survey of Labour and Income Dynamics (SLID) Labour interview is conducted using computer-assisted interviewing (CAI). CAI is paperless interviewing. This document is therefore a written approximation of the CAI interview, or the questionnaire.

A labour questionnaire is collected for all respondents 16 years and over. In January, 2001 data was collected for reference year 2000 from panels 2 and 3, which consisted of approximately 37,000 households and 90,600 people.

This document outlines the structure of the January 2001 Labour interview including question wording, possible responses, and flows of questions.

TABLE OF CONTENTS

1. INTRODUCTION

Every January, the Survey of Labour and Income Dynamics (SLID) Labour interview is conducted using computer-assisted interviewing (CAI). CAI is paperless interviewing. This document is therefore a written approximation of the CAI interview, or the questionnaire. The CAI process is as follows:

(a) A question appearing on the computer screen is read aloud to the respondent.

(b) The respondent's answer is directly entered by the interviewer.

(c) Based on the answer given, and/or age or other flow criterion, the computer determines the next question to be asked and displays it on the screen.

This research paper presents the content of the Labour interview[1] including question wording, possible responses, and flows of questions.

2. WHAT'S NEW

Modified questions:

The prefixs in every section have been shortened to reflect processing.

FROM:	TO:

All question numbers have been standardized to 3 digits (e.g. DATES_Q1 is now DA_Q001).

[1]   The household composition and demographic questions are presented in a separate document.

DA_Q040, CH_Q175, CH_Q210, ED_Q030

Wording change only.

ED_Q020, ED_Q030, ED_Q055, ED_Q080, ED_Q105, ED_Q130, ED_Q150, ED_Q185

Wording change to Interviewer Note.

CH_Q210:

Wording of the question was changed so that the response categories could be read out loud to the respondent.

CH_Q215:

This was previously an interviewer instruction (CHAR_N215) and is now a question which is read out loud to the respondent.

ED_Q135, ED_Q160

Response category 3 was deleted and replaced with response category 5. There was minimal difference between these two categories which was causing confusion.

3. HOW TO READ THIS DOCUMENT

Question numbers: For each section, the question numbers refer to the actual numbers used in the software and which appear on an interviewer's computer screen. Bold text is read, as worded, by the interviewer. Instructions for the interviewer are preceded by the word "INTERVIEWER" and are not read out loud to the respondent.

Naming conventions: Naming conventions were changed to conform to the standards for Statistics Canada social surveys.

Questions with   C   (e.g. ED_C001) = internal check

                 N   (e.g. ED_N045) = interviewer instructions

                 E   (e.g. CH_E010) = interviewer instruction edit

                 Q   (e.g. DA_Q065) = question

Pre-fill items: Shown in square brackets [ ] are items specific to each respondent's interview. The software adds the relevant information into the question, making it simply a matter of reading for the interviewer. Pre-fill items include:

> [respondent] - This is the first and last name of the household member to whom the questions refer. This is not necessarily the person who is talking to the interviewer.
>
> [fname] - This is the first name of the household member to whom the questions refer. This is not necessarily the person who is talking to the interviewer
>
> [reference year] - This is the year **for which** the information is collected (2000).
>
> [current year] - This is the year **during which** the information is collected (2001).
>
> [employer] - This is the employer referred to in the question. Questions may be asked for a maximum of six employers. In each case, the specific employer's name is placed in the pre-fill item.
>
> [class of worker] Indicates whether the respondent is a paid worker, self-employed or working in a family business without pay.
>
> [type of work] - This is a short description of the respondent's occupation or type of work performed, at last contact.
>
> [industry] - This is a description of the industry of the employer as provided by the respondent.
>
> [start date] and [end date] - Depending on the question, these refer to either the start and end dates of a specific job, of an unpaid absence, or a jobless spell.
>
> [prefill from Empl.oldwage and Empl.oldwageu] - Wage reported previous year for respondent.

Ranges: Hard and soft ranges are specified for some of the questions. The hard range gives the highest and lowest acceptable response values. For example, in

CH_Q110 (number of employees supervised directly) a hard range of 1 - 995 exits. If the interviewer tries to enter a number greater than 995, the system will not accept this.

The soft range specifies an upper limit which, if exceeded, will result in a probe to confirm that the amount entered is correct. If it is correct, the interviewer can enter it as long as it does not exceed the hard range. For example, if the respondent states that the number of people supervised was 65, this exceeds the soft range of > 60. If confirmed as correct, the interviewer can enter this amount as it does not exceed the 995 upper limit of the hard range.

Dates: All dates are in DD/MM/YYYY format unless otherwise specified.
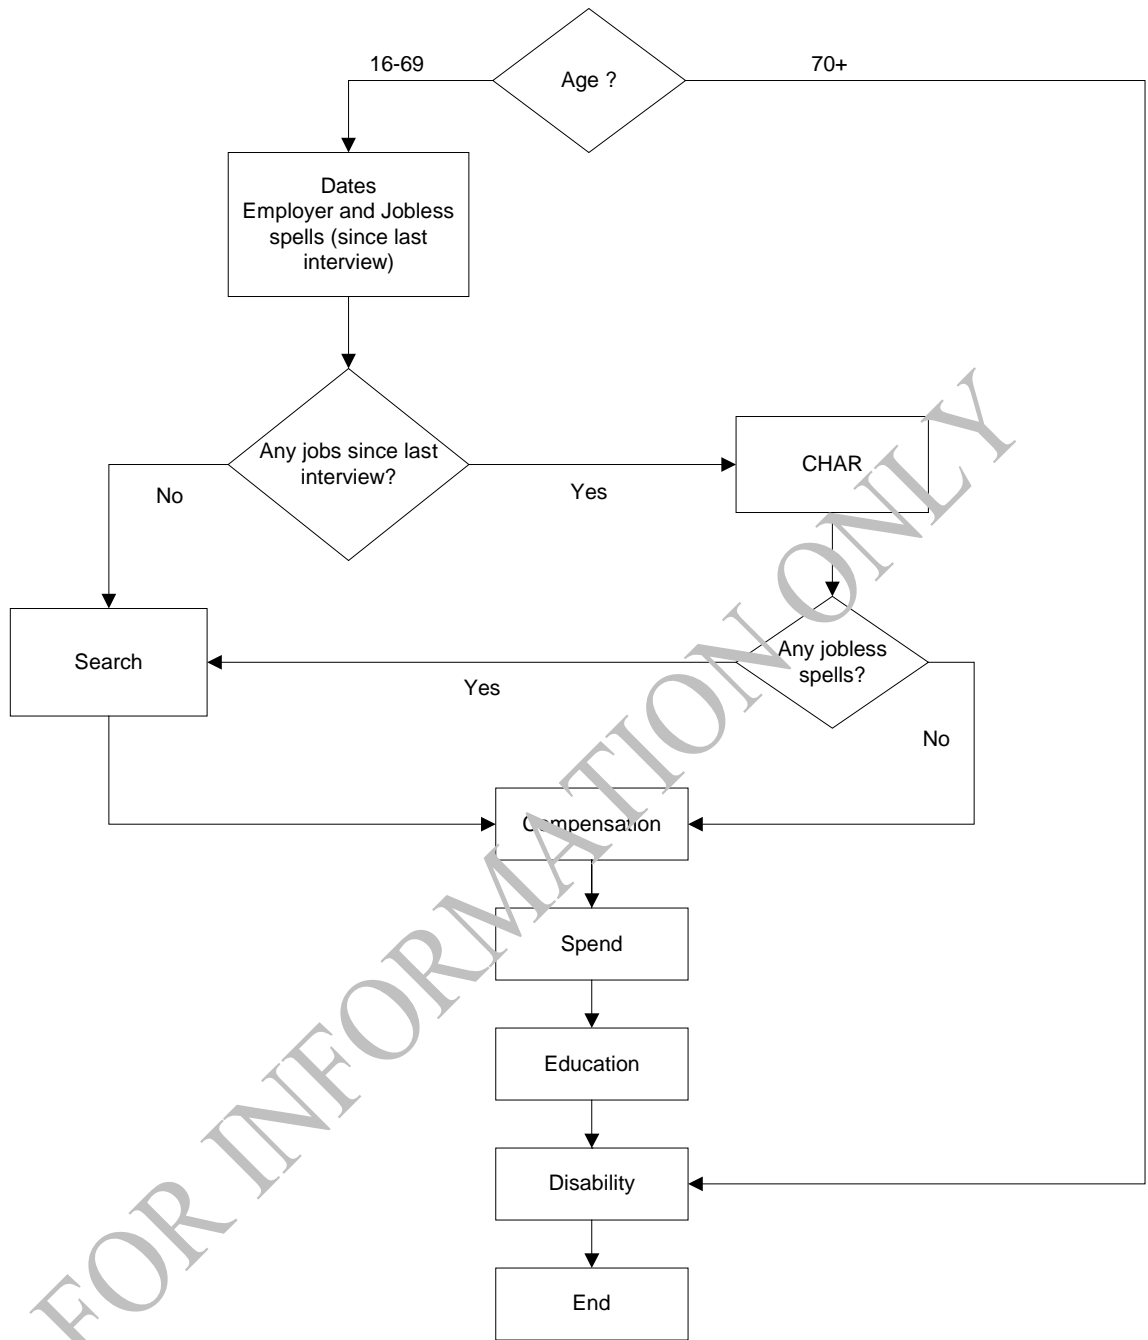

4. CONTENT

The general flow of the Labour interview is given in the flowchart on the previous page.

An initial divergence based on age can be seen. Those aged 16-69 are asked the labour series of questions, while those 70 years and over flow to DA_Q001 (main activity) and then to the Disability (DI) module. For the former, if the respondent worked since the last interview, the characteristics of up to six jobs are asked, followed by identification of jobless spells. If a jobless spell occurred, the respondent is asked the Search (SE) series of questions. These are also asked for respondents who have not worked since the last Labour interview. The Compensation (CO) questions are then asked of all respondents, as are subsequent modules on Spend (SP), Education (ED), Disability (DI) and End-contact(EN).

5. LABOUR INTERVIEW

The Labour interview is comprised of eight main modules as outlined in the following table.

MODULES OF THE LABOUR SURVEY AND MAJOR COMPONENTS

DA	CH	SE	CO	SP	ED	DI	EN
Job Tenure	General Job Characteristics	Jobless Spells	Receipt of Employment Insurance	Receipt of Support Payments	Months Attended School Limitations	Identifies Disabilities/ Activity	Permission to Link to Income Tax
Reasons for Leaving Job	Supervisory/ Managerial Responsibilities	Job Search Activities	Receipt of Workers' Compensation	Payment of Support	Type of Educational Establishment	Impact of Condition on Amount and/or the Ability to Work	
	Work Schedule		Receipt of Social Assistance or Welfare	Payments for Child Care	Information on Any Diplomas, Certificates or Degrees Earned		
	Wages & Fringe Benefits						
	Absences from Work for 1 or More Weeks						

The household composition and demographic questions are presented in a separate document.

DA: Dates – Employer start and end dates are collected for up to six employers during the year. This module has an employer roster (a list of all employers the person worked for during the year), and a ghost employer roster (a list of former employers reported in previous interviews). Feeding back of employer names from the previous January also occurs in this module. For a person on unpaid absence at the beginning of last January, the absence as well as the employer name is fed back.

Regarding "Don't know's" in employer dates: To collect information on an employer, the interviewer must be able to establish the date the person started working for that employer. If the interviewer is able to establish the month the job began, but not the day, the computer will set the day to 01 and the employer will be accepted. Similarly, if the interviewer can establish the month the job ended, but not the day, the computer will set the day to 28. However, if the interviewer cannot get an estimate of the month in which the job started or ended, it is impossible to proceed with that employer, and it is deleted from the roster. If the respondent reports no employers during the past year, the respondent skips to SE.

The following classification of jobs is used in DA:

Job Type 1 - a job at which the respondent was working on December 31st of the previous reference year.

Job Type 2 - a job at which the respondent was not working on December 31st of the previous reference year, but to which he/she was attached (i.e. on temporary lay-off or away on an absence of more than four weeks).

Job Type 3 - a job not previously identified in the survey, generally one at which the respondent started working during the reference year.

Jobless spells are derived from the employer dates, but not confirmed with respondents.

Employment with each employer is characterized as ended or unended, referring to whether the respondent was working for the employer at the

end of the reference year. If a job type 1 is denied, the job is deleted without an array of probing questions. For job type 2, one probing question is asked if the job is denied.

CH: Characteristics – This will be collected for up to six employers per respondent. For job type 1 and 2, information on employer name, and type of work performed is fed back to the respondent. A change in occupation and wages can be recorded, as can two changes in work schedules for job types 1 and 2. This allows greater precision in deriving implicit hourly wage rates or total annual earnings from an employer (total annual earnings from all employers will also be collected in May in the income interview). The number of absences of one week or more (except paid vacation), and details on the first and last absences with each employer are also recorded.

SE: Search – If there was a jobless spell identified in 'DA' or if the respondent did not work at any time in the year, the flow will be directed to this module. For each jobless spell, there are a series of questions on job search, and the desire for employment. For people who begin the year with a jobless spell, the search status in January is fed back to the respondent only if they were looking for work.

CO: Compensation – This module asks questions regarding receipt of Employment Insurance, Social Assistance, or Workers Compensation. This information is collected for everyone, independently of any reported job absences and jobless spells. The information which is collected includes:
-       receipt of Employment Insurance, Workers Compensation, and Social Assistance during reference year;
-       months received.

SP: Spend – This new module requests information on support payments, both paid and received. Also, there are questions on child care expenses. The first time SLID collected this type of information was for reference year 1999.

ED: Education – This module on formal education includes educational activity during the year, and degrees, certificates or diplomas obtained. If respondents attended more than one type of educational institution, several flows will result providing information also on field of study, program length, and whether studies were part-time, full-time, or both. By asking question ED_Q150 about other degrees, certificates or diplomas received during the reference year, this identifies situations where a respondent received a degree in the reference year although the program finished the previous year.

DI: Disability – This module contains questions concerning disability, which have been modified in conjunction with questions that will be asked in the 2001 Census. These disability questions are asked of all respondents. The basic structure of the questions concern disability at home, at work and in other activities, but a distinction is made in the questions asked for those who worked versus those who didn't work in the reference year. No questions are asked about disability at work for respondents aged 70+.

EN: End – This module asks the tax permission question of each respondent in preparation for the May Income survey. If permission is given, then the next contact will be January of the next year, not in May.

5.1 DA MODULE

If respondent < 16 years old: Will not appear on the component screen.

If Slidmem.prelflag = 1 (member is a joiner, a new panel or a member who turned 16), the proxy question will be asked in the Preliminary interview.

If Slidmem.prelflag = 2 (previously interviewed respondent), the proxy question will be asked in the Labour interview.

5.6 ED MODULE

The education module captures all institutions attended by the respondent during
the reference year and all degrees, certificates or diplomas completed. This
results in a series of flows for each type of institution attended (ED_Q020). For
example: if a respondent attended high school and university, we would ask
ED_Q025, ED_Q130, ED_Q135 and ED _Q140.

If another attended community college and then a business or commercial school
we would ask ED_Q030 to ED_Q050.

These flows are approximations, with each (except for high school) ascertaining
whether any degree, certificate or diploma was obtained, field of study, program
length, and whether studies were full-time, part-time, or both.

If ED_Q005 = Yes (attended an educational institution in the reference year), and
flows for attending all institutions have been completed, ED_Q150 asks about any
other degrees, certificates or diplomas received during the reference year. This
identifies situations where a respondent received a degree in [reference year]
although the program finished the previous year.

Without ED_Q150, these "degrees" would not be recorded. Similarly, if ED_Q005 = No then ED_Q185 will also pick up these hidden "degrees", that is degrees or certificates awarded after the year that the respondent attended the institution.

ED_C001:   If Slidmem.student = 1   go to ED_Q001
             If Slidmem.student = 2   go to ED_Q005
