Introduction

This is the first in a set of two documents containing the NLSCY cycle 2 instruments, by which we mean the various questionnaires used to gather information from parents, children, teachers and principals. This document includes the parent questionnaires only; the teacher, principal and youth self-complete questionnaires can be found in Book 2. A companion document is available which describes these questionnaires and the process used to collect the information, entitled "National Longitudinal Survey of Children and Youth: Overview of Survey Instruments for 1996-97 Data Collection, Cycle 2", No. 89FOO78XPE. The questions used in Cycle 2 are quite similar to those used in Cycle 1; the reader may also wish to refer to the Cycle 1 documentation, available upon request:

National Longitudinal Survey of Children: Survey Instruments for 1994-95 Data Collection, Cycle 1

National Longitudinal Survey of Children: Overview of Survey Instruments for 1994-95 Data Collection, Cycle 1

National Longitudinal Survey of Children and Youth: User's Handbook and Microdata Guide

A series of articles exploring various aspects of the Cycle 1 data has been published under the title "Growing Up in Canada" and is available from Statistics Canada as Catalogue # 89-550-MPE; the cost is \$25.

Information was collected from the parents about the children in telephone and/or personal interviews conducted by an interviewer using a computer. This document contains the computerized questionnaires, converted to readable format. Generally, the questions and lists of possible responses that are read by the interviewer to the respondent are shown in lower case, while instructions and responses that are not read to the respondent are in upper case.

In the interests of simplicity and saving paper, where a series of questions has the same set of responses, only the first set is listed. For every question, "DON'T KNOW" and "REFUSAL" are possible responses, even if not shown here.

Different questions are asked about children of different ages, and about those who were included in Cycle 1 as opposed to those joining the survey in Cycle 2. We have tried to make it clear which questions are asked in which circumstances. For example, there are two completely different Family and Custody History Sections, depending on whether the child is joining in Cycle 2, since for those continuing children the complete history does not have to be asked.

You will note that there are two sets of question numbers in this document. The first number corresponds to those used in the Cycle 1 questionnaire, and consist of a 3 or 4-letter section name plus the question number. The second number is the code that will be used on the microdata file. An explanation of this coding will be found in the User's Handbook.

CONFIRMATION OF CORRECT CONTACT

NOTE: LONGITUDINAL HOUSEHOLDS REFER TO HOUSEHOLDS WHERE AT LEAST ONE CHILD WAS INTERVIEWED IN THE 1994-95 SURVEY. CHILDREN BELONGING TO THESE HOUSEHOLDS ARE CALLED LONGITUDINAL CHILDREN AND ARE PART OF THE LONGITUDINAL SAMPLE.

CROSS-SECTIONAL HOUSEHOLDS REFER TO HOUSEHOLDS NEWLY INTRODUCED WHERE NO CHILDREN WERE INTERVIEWED IN CYCLE 1. CHILDREN COMING FROM THESE HOUSEHOLDS WERE INCLUDED IN CYCLE 2 FOR THE PURPOSE OF PRODUCING CROSS-SECTIONAL ESTIMATES (0 AND 1 YEAR OLDS ONLY).

SUPPLEMENTARY HOUSEHOLDS REFER TO HOUSEHOLDS IN NEW BRUNSWICK WITH CHILDREN AGED 2 TO 5 YEARS OLD. THIS SUPPLEMENTARY SAMPLE WAS A BUY-IN SAMPLE FROM THE NEW BRUNSWICK DEPARTMENT OF HEALTH AND COMMUNITY SERVICES (FOR MORE DETAILS, SEE THE OVERVIEW OF THE SURVEY INSTRUMENTS FOR 1996-97 DATA COLLECTION, CYCLE 2, CATALOGUE NO. 89FOO78XPE).
