HOW TO READ THIS DOCUMENT

The survey instruments document book is a summary of the computerized questionnaire administered to respondents. This document contains the actual question text, standard instructions provided to interviewers, flow patterns and identifies who is eligible to receive each module of the questionnaire. **Bold** text is read, as worded, by the interviewer. Instructions for interviewers are in parentheses and are not read out loud to the respondent. To facilitate interpretation of this document the following points should be noted:

Question numbers: The question numbers used throughout the survey instruments refer to the actual numbers used in the software and which appear on an interviewer's computer screen. In the codebook, released in conjunction with the data set, this variable name appears as the « collection name ».

Naming conventions: Standardized codes are used to identify the function of each question. The first few letters indicate the module, for example **EDU**_Q06 identifies this as a question from the Child Education module. The letter immediately following the underscore indicates the action to be undertaken by the application. Refer to the chart below for frequently used codes.

Code	Action	Example
C	Internal check item	FIM_**C**8 If agemonths=5-7 go to FIM_Q12 Else go to FIM_Q9
D	Creates a derived variable based on information provided by the respondent	CUS_**D**8 CUS_D8=CUS_Q8 + (CUS_Q8A / 12 months)
E	Application Edit	EDU_**E**8A IF EDU_Q8 > EDU_Q3 then please confirm with respondent the grade repeated and make the proper correction.
Q	Question	PBE_**Q**1H How often does your child show self-control?
R	Instruction / information to be read to respondent	WAB_**R**1 The following questions ask about whether his mother worked before and after John was born.

For information only

Pre-fill items: These items are preceded by ^ and are specific to the respondent's interview. The software adds the relevant information into the question, making it simply a matter of the interviewer reading the text displayed on the screen. The majority of these fills are used to change verb tenses such as is/was or to indicate the respondent's gender, he/she, his/her. Some examples of less typical pre-fill items are:

^INFO.FNAME – This is the first name of the respondent to whom the question refers. This is not necessarily the person who is talking to the interviewer.

^LastIntMonthE – This refers to the month that the respondent was last interviewed.

^LastIntYear – This refers to the year that the respondent was last interviewed.

^PHRASE (F) – Text is inserted that is dependent on specific conditions, e.g., the text could vary depending on the age of the respondent.

^BefOct16 – This adds text to the question if the interview data is prior to October 16th of the reference year.

Ranges: Hard and soft ranges are specified for some of the questions. The hard range gives the highest and lowest acceptable response values. For example, in ACTC_Q9 (How many hours a day the youth spends on a computer) a hard range of 0.0 – 16.0 exists. If the interviewer tries to enter a number greater than 16.0, the system will not accept this.

The soft range specifies an upper limit which, if exceeded, will result in an edit (ACTC_E9) to prompt the interviewer to confirm that the amount entered is correct. If it is correct, the interviewer can enter it as long as it does not exceed the hard range. For example, if the respondent provides a response of 15 hours which exceeds the soft range of 9.0 hours, but then confirms that their response is correct, the interviewer could enter the answer since it does not exceed the hard range of 16.0 hours provided for that question.

Dates: All dates are in DD/MM/YYYY format unless otherwise specified.

Universe: At the end of each question a universe statement is provided to indicate which respondent were eligible to receive the question.

Apart from these general instructions, there are also variables that are created by the application and stored for use throughout the interview. Generally, these variables are defined at the beginning of the module in which they are used. For example, in the INC module, the variable SPOUSEPRESENT is used in check item INC_C1C1. This variable has a value of 1 when the respondent has a spouse living in the household and a value of 2 when there is no spouse.

INTRODUCTION

The National Longitudinal Survey of Children and Youth (NLSCY) instruments – by which we mean the various questionnaires used to gather information from parents or persons most knowledgeable, children and youth, and kindergarten teachers – could be divided into 3 groups:

A- **Electronic questionnaires** loaded on the interviewers' laptops and administered by interviewers to parents and youth using computer-assisted (CAPI or CATI) methods:
- Household contact information
- Parent questionnaire
- Child questionnaire
- Youth questionnaire

B- **Paper questionnaires,** self administered:
- Kindergarten teacher's questionnaire
- Booklet 20 – self complete for 10- and 11-year-olds
- Booklet 21 – self complete for 12- and 13-year-olds
- Booklet 22 – self complete for 14- and 15-year-olds
- Booklet 23 – self complete for 16- and 17-year-olds
- Booklet 24 – self complete for 18- and 19-year-olds
- Informed Consent Form

C- **Other Instruments** to be administered by interviewers:
- Ages and Stages Questionnaires (Parent report, children aged 4 to 47 months)
- Peabody Picture Vocabulary Test – Revised (PPVT-R) (Direct Measure, 4- and 5-year-olds)
- Who Am I? (Direct Measure, 4- and 5-year-olds)
- Number Knowledge (Direct Measure, 4- and 5-year-olds)
- Math tests (Direct Measure, Grades 2 to 10)
- Cognitive measure (Direct Measure, 16- and 17-year-olds)

For Cycle 5, there are two published documents containing survey instruments: Book 1 contains the electronic questionnaires and Book 2 contains the self-administered paper questionnaires listed in B above. The instruments listed in C above will not be published. Several of them are available from publishers. Please see list at the end of this section.

This is **Book 1**. It includes the questions answered by the parent and youth. Information was collected from the parents about the children and from older youth themselves in telephone and/or personal interviews conducted by an interviewer using a computer. This document contains the computerized questionnaires, converted to readable format.

In the interests of simplicity and saving paper, where a series of questions has the same set of responses, only the first set is listed. For almost every question, DON'T KNOW and REFUSAL are possible answers, even if not shown here. The rules for skips for DON'T KNOW's and REFUSAL's are indicated by a flow information line. The flow remains the same for a same set even if not shown.

Different questions are asked about children depending on their age or whether they were respondents in previous cycles. We have tried to make it clear which questions are asked in which circumstances.
