Purpose

Statistics Canada is conducting a survey to measure the extent to which knowledge management practices are used or will be used by Canadian businesses. A highly mobile and aging workforce has increased the need for a better set of knowledge retention, acquisition, sharing and transfer practices.

Data collected in this survey will result in a greater understanding of knowledge management practices to support enhanced learning and performance by organisations.

Although completion of this questionnaire is a legal requirement under the *Statistics Act*, your cooperation is essential for the results of the survey to be valid and reliable.

Statistics Canada will create a data base combining individual survey responses with existing Statistics Canada data records. These data will be released in aggregate form so as to protect the confidentiality of individual business records.

Confidentiality

Law prohibits Statistics Canada from publishing any statistics, which would divulge information obtained from this survey that relates to any identifiable business, institution, or individual. The *Access to Information Act* or any other legislation does not affect the confidentiality provisions of the *Statistics Act*.
