

Industrial Water Survey: Manufacturing Industries, 2005

This document is confidential when completed.

Version française disponible

Correct pre-printed information, if necessary, using the corresponding boxes below:

Please read before complexing

Survey Purpose

This survey collects detailed information on water use in Canada by the manufacturing, mining and electrical power generating industries. The survey asks information on who uses water, how much, where and at what cost. This data will be used to track the state of stocks of water on a regional basis in Canada and will also be used in the development of environmental accounts and indicators.

Return of Questionnaire(s)

Please return the completed questionnaire(s) to Statistics Canach within 30 days of receipt by mail, using the enclosed environ 3. If you are unable to do so, call **1 866 855-8594** to inform us of the Canach completion date. You can also fax it at 1 800 755-55. 1. Lost the return envelope, need help to complete your questionnaire(s)? Call us at 1 866 855-8594.

Fax or Other Electronic Transmission کند. rsure

Statistics Canada advises you that there could be a risk of disclosure during the facsimile or other elect. onic transmission. However, upon receipt, Statistics Canada will provide the guaranteed level of protection afforded to all information collected under the authority of the *Statistics Act*.

Authority

This survey is conducted under the authority of the *Statistics Act*, Revised Statutes of Canado 1985, Chapter S19. **COMPLETION OF THIS QUESTION: AIRE IS A LEGAL REQUIREMENT UNDER THE STATISTICS ACT**.

Confide tiality

Statistics scanada is prohibited by law from publishing any statistics which would divulge information obtained from this survey that relates to any identifiable business. The data reported on this questionnaire will be created in strict confidence.

Data-sharing Agreements

In an effort to reduce respondent burden, Statistics Canada has entered into an agreement with Environment Canada under **Section 12 of the** *Statistics Act* for sharing of data herein. Environment Canada has undertaken to keep the information confidential and to use it for statistical purposes only. This Section 12 agreement shall not apply if an authorized officer or person of your company objects in writing to the Chief Statistician and mails that letter to the Operations and Integration Division of Statistics Canada with the completed questionnaire. Your responses are not shared with Canada Revenue Agency.

Planned Data Linkage

In order to enhance the analytic possibilities of this survey, Statistics Canada intends to combine the information from the Industrial Water Survey with the information your company/business provided on the Annual Survey of Manufactures.

SECTION 2: WATER INTAKE BY SOURCE AND KIND

INSTRUCTIONS

- (i) Please report your volumes of intake water by source and its usual characteristic. Unless you know otherwise, report volumes received from public water utility systems as "Fresh".
- (ii) Fresh water is defined as water containing less than 300 parts per million total dissolved solids.
- (iii) Hard water is defined as water containing 300 900 parts per million total dissolved solids.
- (iv) Saline water is defined as water containing more than 900 parts per million of total dissolved solids.
- (v) The sum of all volumes should equal the annual total as reported in Line 14, C1013 on previous page.

Where data are not available, please estimate.

	Course	Volume per year			
	Source	Fresh	Hard	Saline	
15	Public water utility system	C2001	C2101	XXXX	
16	Self-supplied surface water system (lake, river, etc.)	C2002	C2102	XXXX

SECTION 4: WATER INTAKE BY PURPOSE

INSTRUCTIONS (i) Report the amount of water within your establishment by initial use. This section should not include recirculated water except as stated in Line 33 (for a definition of "recirculated water", see section 5). (ii) In Line 36 "Other uses" should not include water pumped by the establishment, and intended for initial use outside the establishment. Where data are not available, please estimate. Purpose Volume per year C4101 33 Process water - This is water that serves in any level of the manufacturing process. It includes all water which comes in direct contact with products and/or materials. It also includes water which is used in the sanitation of process equipment, water which is consumed in milling and special processes, water which is included in final output or water which has been used for another purpose, and is undergoing its final use as process water C4102 34 Cooling, condensing and steam - This is water which **does not come in direct** contact with the products, materials or by-products of the processing operation. It includes pass-through water used in the operation of cooling or process equipment (including air conditioning) and water introduced into boilers for the production o. steam for either process operations or electric power..... C4103

 35
 Sanitary service/Domestic use - This is water used for toilets, janitorial services, lawn watering, washing of vehicles, etc.
 C4103

 36
 Other uses (specify)
 C4000

37 Total (Lines 33 to 36 should equal sum of figures reputted in Line 14, C1013).....

SECTION 5: WATER RECIRCULATED OR REUSED BY PURPOSE

Recirculated water refers to water used more than once in an industrial establishment and applies mainly to cooling and processing activities. It does not refer to water used a number of times within a particular system (i.e. **it excludes closed-loop systems**). It only refers to water that leaves a particular subsystem and re-enters it or is used in another subsystem.

38 Did this establishment recirculate or reuse water?		
	° 🛄 No →	If no, go to Section 6

INSTRUCTIONS	
(i) Please report the you'me of water recirculated or reused.

	\$'000's
43 Estimated annual operating and maintenance cost of water recirculation.	C5201
Operating and maintenance costs should only include your material, labour and energy costs incurred to operate and maintain systems to recirculate water in your facility	\$

SECTION 6: TREATMENT AND DISCHARGE OF WATER

INSTRUCTIONS

- (i) Please report the volume of all water routed by this facility to its ultimate point of discharge by treatment process.
- (ii) Do not report the volume of water released to ponds, lagoons or basins and intended for recirculation or reuse until such water is actually discharged to a location beyond the control of the establishment.
- (iii) Do not include the volume of water lost in production through evaporation, permanently held in open or closed storage or otherwise consumed and not brought to the ultimate point of discharge.

44 Is discharge volume metered or otherwise measured?

C6001 1 Yes

³ No (If no, please provide your best estimate.)

Where data are not available, please estimate.
