

**Reinsure:** To transfer the risk of potential loss from one insurer to another insurer.

**Subsidiary:**

As defined in the CICA Handbook, Section 1590. In this form subsidiary also includes a **controlled** VIE.

**Unregistered reinsurer:** See Registered/unregistered reinsurer.

**VIE:** Variable Interest Entities (See CICA Handbook ACG-15).

**YRT:** Yearly Renewable Term insurance.

### **Market Values**

Life insurers are required to either carry investments at market values or provide market values for investments in the Summary of Investments and for specific asset categories. Market values should be determined as at the reporting date of the quarter / year end and should be in accordance with GAAP (see CICA Handbook Section 4211 and 3855).

For securities that do not trade or have readily quoted market values, the market value should be determined by calculating the present value of the future cash flows, discounted at the interest rate then available for assets of similar nature and quality.

For real estate valuations please refer to the instructions for page 21.080.

### **Realized and Unrealized Gains and Losses on Real Estate Investments - Moving Average Market Method**

*These accounting principles are applicable to life insurers and their investment operations which may include separate subsidiaries.*

Realized and unrealized gains and losses on Real Estate Investments as defined in CICA handbook section 4211 paragraph 04 are to be reported using the moving average market method in accordance with the CICA Handbook section 4211.

For the real estate portfolio, the impact of changes in market value is recognized when appraisals are conducted. In accordance with GAAP, life insurers are required to ensure that the market value of real estate reflected in the moving average market adjustment is an approximation of market values in the year that an appraisal is not conducted. For the purpose of interim financial statements, life insurers are required to assess the value of real estate at each quarter end and to make appropriate adjustment for any known material changes. For the real estate portfolio, 3 per cent of the difference between the approximate market value at quarter end and the quarter end carrying value should be recognized.

---

**Realized and Unrealized Gains and Losses on Real Estate Investments - Moving Average Market Method** (cont'd)

**Quarterly Amortization (3% quarterly) - example**

	Carrying Value Prior to Amort. (refer Note) (1)	Market Value (2)	Quarterly Amort. To P&L [(2) – (1)] x (3%) (3)	Year to Date Amort. to P&L (3)+(4) prior (4)	Carrying Value End of Quarter (1) + (3) (5)
Q1 - Yr 1	100,000	98,000	-60	-60	99,940
Q2	99,940	95,000	-148	-208	99,792
Q3	99,792	92,000	-234	-441	99,558
Q4	99,558	93,000	-197	-637	98,362

NOTE: For simplicity it has been assumed that there are no purchases, sales or impairment in the stock portfolio during the year.

The annual amortization recognized in income should be the sum of the amounts amortized in each of the four quarters for both realized and unrealized gains and losses.

**Quebec life insurers:** In applying the moving average market method, life insurers can use the market value at each quarter end (3 % for Real Estate) or at each year end (10 % for Real Estate). See other specific Quebec instructions for pages 21.080 and 21.095.

**FILING REQUIREMENTS - Miscellaneous**

**Name of Insurer and Reporting Date of the Return**

The insurer's name and the interim period / year of the return must be shown on each page.

**Opening Balances**

All opening balances should agree with the closing balances for the particular accounts at the end of the previous applicable interim period / year. If the opening balance does not agree with the closing balance of the applicable interim period / year, an explanatory note of the changes made must be provided.

**Certification / Affidavit**

The Interim Return must be signed (on the cover page) by the Chief Financial Officer or another Executive at a comparable level as designated by the CFO, in accordance with each jurisdiction's filing requirements indicated on pages 11 and 12.

Please refer to Section 10 of these Instructions for guidance on completion of the Affidavit in the Annual Return.

**Reproduced Copies of Forms**

The return should be printed on 8.5 x 11 paper. The page order should not be changed and the line numbers should not be altered. Unsatisfactory copies will be returned for correction.

**Supporting Details**

Supporting information and working papers should be available at the insurer's offices for review by the Regulator. This information includes details of both the consolidated and non-consolidated financial statements. Life insurers must maintain working papers to support the allocation of income, expenditure and other items by line of business as well as by fund.

**Electronic Filing**

Diskette, CD-Rom or electronic filing via a secure means provided by their Regulator is mandatory for Interim and Annual Returns. The Return will be considered "not filed" until any irregularities in the data or the electronic file are corrected.

<p>These accounting principles are applicable to life insurers and their investment operations which may include separate subsidiaries.</p> <p><b>Real Estate Appraisals</b></p> <p>In accordance with GAAP, life insurers are required to ensure that the market value of real estate reflected in the moving average market adjustment is an approximation of market values in the years that an appraisal is not conducted. Therefore, it is incumbent upon life insurers to review their real estate portfolios annually and to ensure that the moving to market adjustment is based on current market values in the non-appraisal years. Life insurers should submit to the Primary Regulator, at the same time as the summary appraisal forms, details supporting any such changes in value in non-appraisal years.</p> <p><b>Federal life insurers:</b> Refer to OSFI Guideline F-6 for determination of in-house/independent appraisal requirements</p> <p><b>Quebec life insurers:</b> Real estate parcels must be appraised, within a three-year period, according to a specific cycle which cannot be changed without the consent of the AMF. Each piece of a real estate parcel may not be appraised more than once during the three-year period. All appraisals must be done by an independent certified appraiser. For real estate parcels with stated carrying values up to 0.5% of assets <b>and</b> less than 5% of capital and surplus, an in-house appraisal by qualified appraisers on the life insurer's staff is acceptable. Valuation reports for a real estate parcel with a net <b>balance sheet</b> value greater than \$500,000 must be sent to AMF with the Annual Return.</p>

<p>The purpose of the disclosure on this page is to give a comparison between potentially cashable liabilities and the liquid assets available to meet such liabilities. The amounts shown are to be based on a best effort basis, and may be approximate.</p> <p>Cashable liabilities are those where the policyholder has the option to withdraw funds from the insurer in the next 12 months. This includes reinsurance agreements where the agreements could be cancelled, resulting in cash being required to be paid to the other company. This also includes any debts that will fall due in the next 12 months.</p> <p>Liquid assets are those that can be sold for cash in a public market, so as to be available to meet any obligations from policyholders and debt holders. The asset value shown may include accrued interest, at the option of the insurer.</p> <p>The separation of assets between in Canada and out of Canada should be based on the location where the assets are held. In the rare circumstance where assets vested in trust related to a particular territory are physically located in a different territory, they should be recorded in the territory in which they are vested in trust.</p> <p>Out of Canada Total Individual and Total Group cash values are the aggregate of the values for the types of policies indicated.</p> <p>All amounts are to be reported at <b>balance sheet</b> value, as applicable.</p> <p>Also refer to the instructions for pages 70.010 and 70.020.</p>

## INTRODUCTION

These Annual and Interim Return Filing Specifications have been prepared to give detailed technical guidance to insurers and software vendors in developing systems for capturing Return data for filing with Regulators. All software packages **must receive prior approval from the primary Regulator or the Return will not be accepted.**

The Specifications were designed initially for electronic filing by diskette or CD-Rom; however, they may be expanded later to include electronic filing through communication networks.

The Specifications define the characteristics of the data to be submitted and have been designed to be as generic as possible.

The American Standard Code for Information Interchange (ASCII) is used as the data representation standard. Those familiar with systems will know that ASCII can be generated by spreadsheet-based systems and by systems developed in more traditional mainframe or microcomputer-based programming environments.

Specific guidelines on how to transmit files to Regulators are also included in the Specifications.

The Specifications refer to the detailed set of Crosscheck formulae which are provided in the software package or on OSFI's website. These formulae must be used as the minimum number of tests within Annual Return preparation software to pre-validate data before the file is submitted. **Files that are not fully validated before being sent to the Primary Regulator will be returned automatically and considered not filed.**

The Specifications are subject to revision and improvement. Any queries or suggestions should be addressed Regulatory Information Division, in Ottawa, at (613) 990-3591 or by fax at (613) 991-6248.

## DEFINING VARIOUS FORMS OF DATA

The current Return forms consist of **numeric data** in many different formats: whole numbers; amounts rounded to thousands; decimals; ratios and percentages. In addition, the Annual Return (LIFE-1) contains **Yes/No answers** to questions. All data will continue to be included in the hard copy Annual Return; diskette/**CD-Rom** filing of data **or electronic filing via a secure means provided by their Regulator** is intended at this time to be a supplement to the complete hard copy Annual Return. **Electronic filing is mandatory for all Return forms.**

The **data representation standard** used is ASCII (see previous page). Data can be assembled in ASCII format from either spreadsheets or other data processing applications.

These Specifications require that:

- a) The data reporting **file** (the complete set of data recorded on the **file**) consist of ASCII Standard Delimited Format ("SDF") fixed-length **records**;
- b) The **file** be given a unique file name, as described under File Naming and Record Layout (see next page), to identify the insurer and the year of reporting;
- c) Each **record**, consisting of a **datapoint address** and an **amount**, follow the record layout described under File Naming and Record Layout (see next page);
- d) Each **datapoint address** contained in a record must be defined using the common three-element (10 numeric digit) system:

**ppppp**(page) / **lll** (line) / **cc**(column)  
(see examples under File Naming and Record Layout).

As illustrated under File Naming and Record Layout, all data will be represented in the file in the same numeric formats as prescribed in the Instructions for completing the forms (i.e., figures rounded to thousands should be represented in thousands; ratios to two decimal places should be represented as such, etc.). Negative figures in the data will be represented in the file with a leading minus sign.

**Note:** *there are a number of "inside datapoints" . Examples are:*

2003080099	"Extraordinary Items Net of Income Taxes"
2003083099	"Discontinued Operations Net of Income Taxes"
3501080099	"Extraordinary Items Net of Income Taxes"
3501083099	"Discontinued Operations Net of Income Taxes"

A File Header will be on the first line of each ASCII file. This will consist of an Institution Code, e.g. (F001), a Return Type (10) and a Time Period 07A, 08Q1, etc.

Position 1-4    Institution Code  
 Position 5-6    Return Type  
 Position 7-9    Time Period

## FILE NAMING AND RECORD LAYOUT

### File Naming

The file containing the datapoints that are to be reported will have a file name unique to the insurer and the period reported on, as follows:

#### First digit - **Primary Regulator**

OSFI	"C"	Newfoundland	"F"
Quebec	"Q"	Nova Scotia	"N"
Ontario	"O"	New Brunswick	"W"
Manitoba	"M"	P.E.I.	"P"
Alberta	"A"	Saskatchewan	"S"
B.C.	"B"	Yukon	"Y"
N.W.T.	"T"	Nunavut	"U"

Second to fifth digit - A unique number assigned by the Primary Regulator that identifies the insurer. Insurers will be provided with their unique numbers by their Primary Regulator.

Sixth and seventh digits - the last two digits of the **year** (e.g., in the year 2007: "07").

Eighth digit - **For Annual Returns, a sequence code** to be used in the event of more than one filing for the same period (e.g., a revision to previously submitted data). Default value would be "A". The first revision (amended filing) would be coded "B", the second revision "C", etc.

#### Example (i) "**CF00107A**"

This file name refers to a federally registered insurer regulated by OSFI (C). Its unique number, assigned by OSFI is **F001**, the filing year is **2007**, and this is the initial filing (sequence code: **A**)

#### Example (ii) "**CF00107B**"

This file name refers to the same federally registered insurer (**F001**) filing an amended (**B**) Annual Return for 2007.

Eighth digit - **For Interim Returns**, the last digit of the eight-digit file name should be replaced with "1", "2" or "3" indicating the 1st, 2nd, or 3rd Quarter.

For example: the File Name for the First Quarter of 2008 would be **"CF001081"**.

Record Layout for Financial Data

The file is to be made up of ASCII Standard Delimited Format fixed length records, each record consisting of a datapoint address and an associated, right justified numeric amount. The layout of each record, including the **field location, length and information** about each field is as follows:

Location	Length	Information
1 - 5	5,N*	Page Number (Annual Return page number)
6 - 8	3,N	Line Number (Pre-printed line number)
9 - 10	2,N	Column Number (Pre-printed column number)
11 - 25	15(2)**,N	Amount reported in the Annual Return. (All amounts must be recorded with two decimal places. Dollar amounts, including those already rounded to the nearest thousand, must end with ".00" as in the first and second examples below. A leading minus sign will designate negative amounts, as in the second example below. Zero value should be reported as "0.00"). Where a <b>page</b> is not applicable, the amount should be "0.00"

\* " N " indicates "numeric only".  
 \*\*(2)" indicates "two decimal places".

Examples of record layout:

Page					Line			Column		Amount														
01	02	03	04	05	06	07	08	09	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25
2	0	0	3	0	0	4	0	0	3							3	2	7	5	0	6	.	0	0
2	0	0	4	0	1	3	0	0	1								-	6	2	4	9	.	0	0
1	0	0	6	0	1	5	1	1	8											1	2	.	2	3
2	1	1	0	0	0	0	1	0	6											7	8	.	8	4
3	5	0	5	0	2	2	0	1	1												0	.	8	0
6	0	0	1	0	2	8	9	0	3												0	.	7	8

**Record Layout for Yes/No data**

All Yes/No data for the Annual Return forms will have a page, line, column number similar to the financial data.

For example: the General Interrogatories P10.050 to P10.090 and P60.010 to P60.050 of the LIFE-1 have been given line numbers. The **Yes** will be column 1, **No** column 2, and the **Amount** Column 3 unless otherwise noted. Each Yes answer will be reported as "8" and No reported as "9".

There is no Yes/No data in the Interim Returns.

**CROSSCHECK ROUTINES**

To benefit fully from receiving data on **files**, **Regulators** must be assured that the data is tested by a set of crosscheck routines, before the **data** is filed.

These tests are designed to ensure that, as a minimum, the relationships of datapoints provided are tested.

Insurers who generate annual returns from their internal systems or from purchased commercial software, should ensure that these tests are included as an integral part of the return generation programs.

As noted earlier, **files** that are not fully validated before being sent to **the primary Regulator** will be returned and considered not filed.

**PHYSICAL CHARACTERISTICS OF THE ELECTRONIC FILE**

All data relating to an insurer will be contained in a **single file**, and the file should be submitted on a **diskette, CD-Rom** or via a secure means provided by their Regulator.

**File Labelling**

The **file** must be clearly labelled with the name of the insurer, the year being reported on, the name of the file, the date the file was created and the name and telephone number of a contact person.

Suggested label: ABC Life Insurance Company - 2007  
File: CF00107B  
Date: 28/02/08 Phone: (416) 737-1110  
Contact: I.M. Able

**FILE SUBMISSION**

The procedures for submitting a **file** to **the Regulators** are as follows:

**File Transmittal Form**

A "**File Transmittal Form**" is to be completed and submitted with the **data** filed with **the primary Regulator** and any other Regulators who may request a copy of the **file** (see attached).

The form has two purposes. It **supplies some additional** information and it serves as a certification that the data in the **file** matches the data on the hard copy.

The form is self explanatory, with the possible exception of the following terms:

**Software Vendor** - if you are using a commercially marketed package, please give the name of the vendor.

**Version Number** - refers to the version number of the commercial software used. This will normally be indicated on distribution **files** or copyright screens.

**Signing Authority** - one of the officers who is authorized to sign the affidavit in the return should also sign the **File** Transmittal Form.

**Validation Report**

This report is also to be submitted with the **file** and transmittal form (see next page).

**Shipping Instructions**

The **file** is to be sent with the hard copy on or before the due date prescribed for the filing of the Return. The **file** should be well protected in special-purpose diskette **or CD-Rom** shipping packaging. "**FRAGILE**" should be marked on the outside of the package.

**VALIDATION REPORT**

A **Validation Report** containing a pre-selected sample of datapoints from each Return must be generated and printed at the same time that the **ASCII file** is produced and filed.

The purpose of this report is to give **Regulators** initial assurance that the **file** has been produced from the same data used to generate the hard copy.

Insurers are asked to ensure that the printing of this report is incorporated into the programs written to generate the **file**.
