Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia, and from January 2007, Bulgaria and Romania.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

Foreword

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to nonresidents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

Highlights

- Canadians have invested in foreign securities for 23 consecutive months, purchasing \$5.6 billion in December. Fuelled by investment in foreign bonds, Canadian acquisitions of foreign securities reached a record \$78.3 billion in 2006. Meanwhile, non-residents reduced their holdings of Canadian securities by \$3.3 billion in December, mostly due to sizable retirements of Canadian bonds.

Analysis - December 2006

Canadians invested \$5.6 billion in foreign securities in December, with 70% in debt instruments and the remaining 30% in equities. Canadians have now added foreign securities to their portfolios for 23 consecutive months. Fuelled by investment in foreign bonds, Canadian investment in foreign securities reached a record \$78.3 billion in 2006.

Chart 1
Canadian portfolio investment in foreign securities¹

billions of dollars

1. Reverse of balance of payments signs.

Meanwhile, non-residents reduced their holdings of Canadian securities by \$3.3 billion in December, after purchases totalling \$11.1 billion in November. December's decrease in foreign holdings was mostly due to sizable retirements of Canadian bonds. Non-residents invested \$28.2 billion in Canadian securities in 2006, nearly half in Canadian bonds.

Related market information

In December, Canadian short-term **interest rates** dropped 2 basis points to 4.16% and US rates fell 9 basis points to 4.85%. While still favouring investment in the United States, the differential between the two countries narrowed to 0.69% from 0.76% the month before.

Canadian long-term interest rates climbed 11 basis points to 4.05% while US rates increased 14 basis points to 4.66%. This caused the differential between the two countries to increase slightly to 0.61%.

Canadian **stock prices** increased with the S&P/TSX Composite index finishing the year at 12,908.4, a gain of 1.2% over the month and 14.5% for the year. Meanwhile, the US stock prices increased for the seventh consecutive month, as the Standard and Poor's Composite Index rose by a similar 1.3% for the month and 13.6% for 2006.

The **Canadian dollar** fell for the third consecutive month, losing 1.28 US cents and finishing December at 86.73 US cents. The decline of the Canadian dollar over the fourth quarter offset most of the gains in earlier months, leaving only a small increase of just under one US cent during 2006.

Definitions

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less.

Maple bonds sweeten the acquisitions of foreign bonds

Canadians resumed their heavy purchases of foreign bonds, buying \$3.4 billion worth in December. The annual investment for 2006 amounted to a record \$43.0 billion. Foreign bonds have become a hot investment choice for Canadians since 2003, as the amount of annual investment is now five times what it was then.

Maple bonds continued to fuel Canadian investment in foreign bonds. Canadians bought \$3.1 billion worth of these bonds in December, split equally between US corporate bonds and overseas bonds. Investment in maple bonds totalled \$26.8 billion in 2006, accounting for two-thirds of investment in foreign bonds.

Canadians buy foreign money market paper for the sixth month in a row

Canadians continued to buy foreign money market paper for a sixth straight month, purchasing \$538 million worth in December. Following a record \$5.0 billion purchase in the third quarter, the fourth quarter saw moderate investment totalling \$1.5 billion.

Purchases in December were mostly of overseas paper totalling \$709 million, adding to a purchase of \$628 million in November. Meanwhile, Canadians sold \$171 million worth of US paper in December, after selling \$132 million in November.

Canadians swing to US shares

Adding to a \$3.9 billion purchase in November, Canadians invested another \$1.7 billion in foreign stocks in December. The total invested in foreign shares in 2006 reached a five-year high of \$28.9 billion.

Two-thirds of December's investment went to US shares (\$1.1 billion), a switch from November's acquisition that saw the lion's share go to overseas stocks.

Decrease in foreign holdings due to sizable retirement of Canadian bonds

Non-residents reduced their holdings of Canadian bonds by \$3.6 billion in December, after investing a near-record \$11.5 billion the month before. In addition to net retirements, December also saw non-residents sell off \$779 million worth of outstanding Canadian bonds, following acquisitions of outstanding bonds over the previous two months totalling \$6.9 billion. Despite the decline in December, the fourth quarter registered a sizable foreign purchase of Canadian bonds totalling \$10.2 billion, the highest level in a decade.

On a sector basis, federal government bonds (\$3.6 billion) led the reduction in foreign holdings due to retirements. Meanwhile, a \$1.1 billion decrease in holdings of federal government enterprise bonds just offset an increase in holdings of Canadian corporate bonds.

Geographically, American and European investors lowered their holdings in December. On a currency basis, foreign investors acquired \$1.9 billion worth of Canadian bonds denominated in foreign currencies. However, they reduced their holdings of the Canadian-dollar denominated bonds by \$5.5 billion, mainly due to retirements of these bonds.

Canadian treasury bills attract investment from emerging economies

Foreign investors bought \$366 million worth of Canadian money market paper in December, after selling off \$2.1 billion worth over the previous two months. December's investment was almost entirely in federal government treasury bills (\$646 million), as non-residents sold off \$220 million of Canadian provincial paper. Foreign acquisitions of Canadian money market paper have amounted to \$3.7 billion in 2006, reaching the highest investment level since 1993.

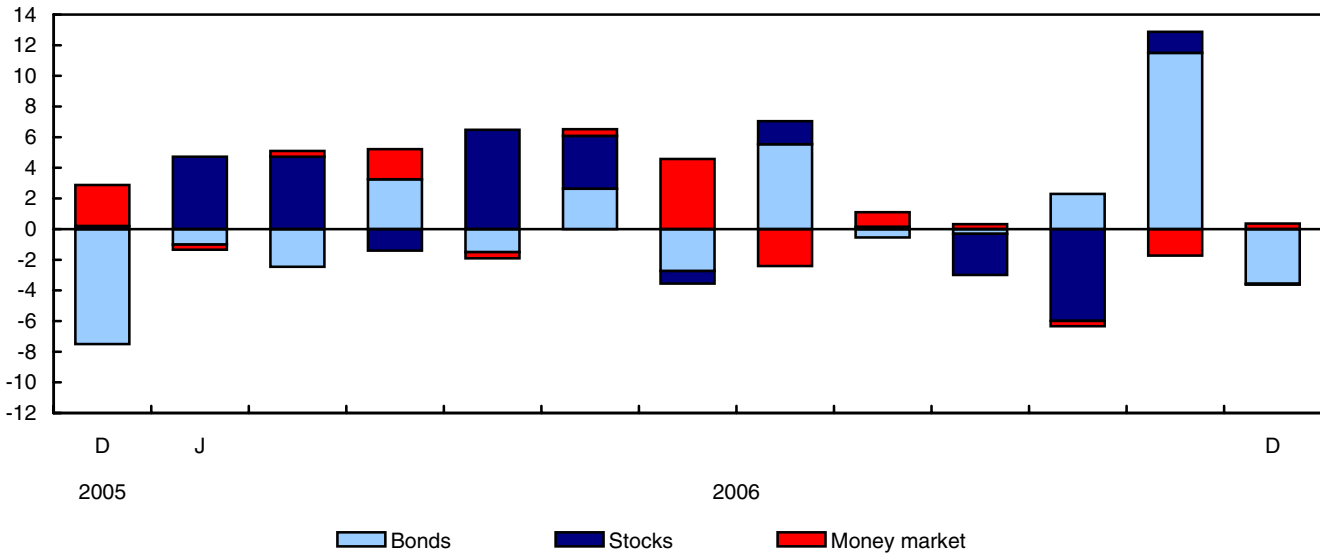

On a regional basis, American investors reduced their holdings of Canadian paper for the third consecutive month, selling \$1.2 billion worth in December. This was offset by a \$1.4 billion purchase by investors from emerging economies, the largest investment since April 1995 and on par with the amount acquired during the entire year of 2005.

Non-residents buy new shares but sell off outstanding shares

Non-residents sold off a nominal \$64 million in Canadian stocks in December, mainly due to selling of outstanding shares (\$639 million) that more than offset the acquisition of new issues of equities (\$575 million). Geographically, American investors acquired \$3.1 billion while overseas investors sold off an equal amount of Canadian shares. Non-residents acquired \$11.4 billion of Canadian shares in 2006, acquiring \$17.1 billion over the first two quarters before selling off \$5.7 billion in the second half of the year.
