### **Overview**

The Northern Pipeline Agency (the "Agency") was created by the *Northern Pipeline Act* in 1978 to carry out federal responsibilities in respect of the planning and construction by Foothills Pipe Lines Ltd. (Foothills) of the Canadian portion of the Alaska Highway Gas Transportation System (ANGTS), a pipeline project intended to transport Alaskan and northern Canadian gas to markets in southern Canada and the lower 48 States. The project, also referred to as the Alaska HighwayGas Pipeline Project, is the subject of the 1977 *Agreement between Canada And the United States of America on Principles Applicable to a Northern Natural Gas Pipeline*.

Phase I of the project (the "Prebuild") was constructed in the early 1980's for the initial purpose of transporting gas sourced from western Canada. The current flow capacity of the Prebuild is about 94 million cubic metres (3.3 billion cubic feet) per day.

As conceptualized, the second stage of the project would link the prebuilt western and eastern legs of the pipeline system with United States reserves at Prudhoe Bay in Alaska and possibly also Canadian reserves in the Mackenzie Delta region. Unfavourable economic conditions have led to indefinite delays in the completion of the ANGTS and a prolonged period of low activity for the Agency.

Figures 1 and 2 show the proposed route of the ANGTS in Canada and the United States and details of the existing prebuild in Canada.

□ac □ground Information

## □ey 2003-2004 Activities

Perceptions of a growing North American market for natural gas and declining supply from traditional sources maintained the interest in exploring options for bringing Alaska and Mackenzie Delta gas to market that had resurfaced in 2000. In addition, the United States continued to consider measures to expedite the construction of a pipeline to deliver Alaskan natural gas to the lower 48 states, including a streamlined regulatory process and financial support. These measures were being considered as part of broader U.S. energy legislation designed to enhance domestic energy production and security of supply. In this environment, the Agency was called on to respond to a number of Tueries related to the *Northern Pipeline Act* and the ANGTS project. During 2003 2004 work continued to prepare the Agency to meet commitments set out in the *Northern Pipeline Act* should Foothills decide to proceed with the second stage of the project.

### **Organi** ation

During the reporting period responsibility for the reporting to Parliament for the Agency was transferred from the Minister of Foreign Affairs to the Minister for Natural Resources, the Honourable R.  $\Box$ ohn  $\Box$ fford. The Minister is responsible for the management and direction of the Agency.

The Northern Pipeline Act provides for senior management of the Agency to be appointed by Governor in Council. Following the transfer of responsibility of the Agency from the Minister of Foreign Affairs to the Minister of Natural Resources, George Anderson, Deputy Minister for Natural Resources was appointed Commissioner, succeeding Leonard □dwards.

Given the continuing low level of Agency activity, arrangements were in place whereby the Agency relied largely on the National □nergy Board for administrative and technical assistance and on Natural Resources Canada for policy advice. The Agency was also supported by Natural Resources Canada.

### **E** penditures

Sections 13 and 14 of the *Northern Pipeline Act* (the Act) provide for an annual audit of the accounts and financial transactions of the Agency by the Auditor General of Canada, and that a report thereon to be made to the Minister and laid before Parliament. In compliance with these re uirements, the report of the Auditor General of Canada for the year ended March 31, 2004 is reproduced as an appendix to this report.

The Agency had requested and received approval to increase its reference level to  $\square$ ,  $3\square$ ,000 for 2003  $\square$ 04. This request was in anticipation of increased activities forecasted by Foothills. The full extent of the forecasted increase in activities did not occur and final expenditures for the year totalled approximately  $\square$ 223,000. The decrease in expenditures from the previous year is a product of the resignation and non  $\square$ eplacement of the Administrator and a slightly reduced level of activity for the Agency. At year  $\square$ end, only one full  $\square$ time employee was on staff.

Due to the significantly decreased level of expenditures during 2003 04, the Agency applied for and was granted a Remission  $\Box$ rder approving invoicing relief to Foothills for the third and fourth  $\Box$ uarter cost recovery billings for 2003 04.

#### **AUDITOR'S REPORT**

To the Minister for Natural Resources

I have audited the statement of financial position of the Northern Pipeline Agency for the year ended March 31, 2004 and the statements of operations and surplus of Canada and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation.

In my opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2004 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Further, in my opinion, the transactions that have come to my notice during my audit of the financial statements have, in all significant respects, been in accordance with Section 29 of the *Northern Pipeline Act* and the *National Energy Board Cost Recovery Regulations*.

Roger Simpson, FCA

Principal

for the Auditor General of Canada

Management's Responsibility for Financial Reporting

The management of the Northern Pipeline Agency (the Agency) is responsible for the preparation of all information included in its financial statements. The accompanying statements have been prepared in accordance with Canadian generally accepted accounting principles. Management of the Agency is responsible for the integrity and objectivity of the information in these financial statements. Some of the information in the financial statements is based on management's best estimates and judgment. Management has determined such amounts on a reasonable basis in order to ensure that the financial information is presented fairly in all material respects. The financial statements also include certain expenditures supplied by government central agencies which are based on estimates.

The Agency maintains internal financial and management systems and practices which are designed to provide reasonable assurance that reliable financial and non-financial management information is available on a timely basis, and that assets are acquired economically, used to further the Agency's aims, and protected from loss or unauthorized use. The Agency's management recognizes its responsibility for conducting the Agency's affairs in accordance with the requirements of applicable laws of Canada using sound business principles, and for maintaining standards of conduct that are appropriate to the public interest.

Management of the Agency believes that the system of internal controls and approved policies, practices and procedures are designed to provide reasonable assurance that the operations are in compliance with applicable laws and conform to a high standard of business conduct. Management also seeks to ensure the objectivity and integrity of data in its financial statements and that, regulations, policies, standards and managerial authorities are understood throughout the Agency. The Agency relies on the National Energy Board to provide administrative support for its operation.

The Auditor General of Canada annually provides an independent, objective audit, in accordance with generally accepted auditing standards applicable in Canada, and expresses an opinion on the financial statements of the Agency. The report is presented on the following page.
