

DISPLAYING OF 2001 and 2006 CENSUS DATA IN MAP FORMAT ON THE INTERNET BY DLI INSTITUTIONS

The display of 2001 and 2006 Census data obtained through the Data Liberation Initiative (DLI) in the form of a map on the internet will be allowable **only** under the following conditions:

- Maps at the Census Subdivision (CSD) level and higher geographic levels (specifically: Census Metropolitan Area (CMA); Census Agglomeration (CA); Census Division (CD); Federal Electoral District (Fed); Province and Canada) may be placed on a DLI institution's website for general accessibility.
- Static thematic maps at the Census Tracts (CT), Dissemination Area (DA), and Forward Sortation Area (FSA) geographic levels may be published on a DLI's institutional website for general accessibility, without further consent from Statistics Canada, provided such maps constitute an integral part of analysis and/or research which was conducted using STC data products. Otherwise, maps at the CT, DA, and FSA **must** remain behind the institution's firewall and accessible only to authorised DLI users.
- All maps disseminated freely on the Statistics Canada website can be replicated.
- In all cases where there are maps containing Statistics Canada data, proper Sourcing is required.
- Approval for making an atlas available on the Web requires licensing permission from Statistics Canada.
- Permission must be obtained from the Client Services Division of Statistics Canada: licensing@statcan.ca for all other types of request. Such requests will be handled on a case by case basis and if approved a notice must be posted indicating that Statistics Canada approval has been obtained.
