To the respondent:

Statistics Canada is conducting the Survey of Earned Doctorates in partnership with all Canadian doctoral degree granting institutions.

The survey collects data about your postsecondary academic path, funding sources, field of study and your immediate post-graduate plans. The collected data are then combined and disseminated in aggregate form, in such a way that they cannot identify you. These disseminated data are of interest to your doctoral institution and to all other doctoral institutions, to organizations such as the Canadian Association for Graduate Studies (CAGS) and the Association of Universities and Colleges of Canada (AUCC), as well as to government bodies such as Natural Sciences and Engineering Research Council (NSERC), the Canadian Institutes of Health Research (CIHR), the Social Sciences and Humanities Research Council (SSHRC), Industry Canada and Human Resources and Skills Development Canada (HRSDC). This information will help them to better understand and respond to the financial and program needs of doctoral students.

In order to enhance the analytical value of the survey, the information provided in this survey may be combined with other information concerning you available to Statistics Canada from other surveys or from administrative records.

While your participation is voluntary, your assistance is essential to ensure that the results are meaningful.

Your answers will be kept strictly confidential and used for statistical purposes only.

When you have completed the questionnaire, ***please seal it within the return envelope provided and mail directly to Statistics Canada, or return it to your institution's office of graduate studies as soon as possible (within the next month).***
