P1_C01b This instruction marks the start of the job roster from cycle 3. You will always be returned to this question to check if the condition is met, and when the condition is no longer met, you will move out of the roster. Look at JOBST flag from the Input file. You must look at the flag by order of jobs, that is starting with JOBST_1 through to JOBST_7, though it is okay if not all numbers from 1 to 7 appear. At the first JOBST_(1 to 7)=1 or JOBST_(1 to 7)=2 you find, set P1_C01b=Confirm and go to P1_C01c. When you return to this question, look for the next JOBST_(1 to 7)=1 or JOBST_(1 to 7)=2, when you find one, set P1_C01b=Confirm and go to P1_C01c. When there are no remaining jobs where JOBST_(1 to 7)=1 or JOBST_(1 to 7)=2, set P1_C01b=Unconfirm and go to P1_D12a.

- 1 Yes, to continue
- 2 No, to change number of jobs (Go to P1_Q15)

P1_C19a Beginning with question P1_Q20, information on new jobs respondent worked at in this cycle will be collected. The maximum total of jobs for which information will be collected is 6 altogether, that is including the jobs counted in JOBCNTa. Therefore, the number of jobs that will be collected in P1_Q20 and P1_Q21=(JOBCNTa + P1_Q15 <=6), where the count in JOBCNTa cannot be changed and the number of jobs taken from P1_Q15 may have to be reduced to fit the condition of the equation (where all cannot exceed 6). Store in a variable called JOBCNTb the count of jobs from P1_Q15 that will be kept to meet the equation condition. And in the end, the solution to the equation (or the total count of jobs) should be stored in a new variable called JOBCNTc.

P1_C19b If JOBCNTb >=1, set P1_C19b=NewJobCurrent and go to P1_Q20. Else, set P1_C19b=NonewJobCurrent and go to P1_C40.

-
- P1_C20a** If P1_Q20=('RF', 'DK') (Refused/Don't know), provide a default employer name. This name would be: "employer - and the number". The number would equal to the number this job falls in the total number of jobs the respondent has had altogether. Count (max of 6)=first count jobs in JOBCNTa, then count jobs collected in P1_Q15. For example, if out of a total of 6 jobs, the respondent doesn't know the name of his/her 4th employer, the fill in "employer number" would be employer 4. Employer number would replace "employer name" in the following questions when the name is not given by the respondent.

For example, if out of a total of 6 jobs, the respondent doesn't know the name of his/her 4th employer, the fill in "employer number" would be employer 4. Employer number would replace "employer name" in the following questions when the name is not given by the respondent.

At the second flag set, assign number 2, etc. (ELFLG_1, ELFLG_2, etc). Allow for possible values for this flag of 1 (eligible) and 3 (not eligible) To begin, set the eligibility flag to 1 for all jobs. The value in the flag can be changed to 3 later, either automatically as an interviewer selects a specific response to a question, or manually by an interviewer on the Job Control Screen.

- P1_C75b** The next step is to collect the detailed job information (Section P2 of the specifications) for employer names where `JOBED_(1 to 7)=1` or `JOBED_(1 to 7)=2` or names collected in `P1_Q20` and `P1_Q21`. To begin, we want to collect the information for all jobs where `JOBED_(1 to 7)=1` or `JOBED_(1 to 7)=2`, then for jobs collected in `P1_Q20` and `P1_Q21` where the eligibility flag (`ELFLG`) has not been set to 3. Select from this list of jobs: beginning with jobs where `JOBED_(1 to 7)=1` or 2 then from jobs collected in `P1_Q20` and `P1_Q21`; and select the first 4 jobs encountered where the eligibility flag (`ELFLG`)=1.
- In addition, we must also collect the detailed job information for the `FIRSTJOB` if `FIRSTJOB=1`.
- Consequently, the maximum count of jobs that may go through Module P2 (detail job information) will be 5.
- Note that throughout Module P2, it will be important to distinguish the actual job number among jobs where `JOBED_(1 to 7)=1` or 2. Jobs where `JOBED=JOBED_5` and `JOBED_6`, and `JOBED_7` will be treated differently from jobs where `JOBED=JOBED_1`, `JOBED_2`, `JOBED_3` and `JOBED_4`.
- This is done with the help of the flag called "OPEN" found on the input file.
- P1_END** TIME(REAL);STOP OF JOB ROSTER MODULE
- Section: Employment (P2)**
- P2_START** TIME (REAL);START OF EMPLOYMENT MODULE

Else, if `FIRSTJOB` = blank, start month and year are in `P1_Q27M` and `P1_Q27Y`. Else, if `FIRSTJOB` = 1, start month and year are in `P1_Q53M` and `P1_Q53Y`. Note, if any of the month or year information is Blank or Refused, leave fill for missing month or year as blank. 2- refer to "class of worker". "Class of worker is obtained from `P1_Q67` if `FIRSTJOB=1`. Else it is obtained from `P1_C26c`.
- P2_C00C** When asked to [Programmer: fill employer name] use name as was programmed/or used in module P1 for each of the jobs.
- P2_C00D** When asked to fill date information, that is month and year, if month or year is Refused or blank, leave fill blank for variable that was refused.
- P2_C00E** Throughout this section, please put as a "Header" on each screen the following: employer name, class of worker, job start month and year, job end month and year.

Section: **GAPS (PS)**

PS_NIntr **The following questions are about Gaps.**

 INTERVIEWER: Press <Enter> to continue.

PS_START TIME (REAL); START OF GAPS MODULE

PS_C01 In this section we want to ask question PS_Q01 to measure activities for each month (from January 2004 to December 2005) where the respondent was not in school full-time and not working. These periods will be called "gaps".

PS_C02 To identify and measure gaps: Firstly, you will need to work with question M_C20, where flags for last date in full-time schooling are created and kept in variables M1BM for month and M1BY for year; M_Q26 information on whether or no in school full-time for the months between January 2004 and December 2005, and the start and end dates of all jobs reported in the work section.

PS_C03 If M1BM=refused, Don't know or blank, or M1BY=refused, Don't know or blank, then all months in 2004 and 2005 are to be treated as months not in school full-time (i.e. all 24 months are gaps months for school), and go to PS_C04 to look at jobs.

**Youth in Transition Survey (YITS) - Cycle 4
Questionnaire**

-
- PS_C04** Gaps in jobs. Must do this for every job collected in Module P1 to determine which jobs will be included in the calculation of gaps. If FIRSTJOB flag=blank, and eligibility flag (ELFLG) = 1 and P1_C26c=PdEmployee set PS_C04=Eligiblejob and keep job for calculation of gaps. Else if FIRSTJOB=blank, and ELFLG=1 and (P1_C26c=SelfEmployed or P1_C26c=FamilyFarm) and P1_Q37=Yes, set PS_C04=EligibleJobSelfEmpWrkFamBusEveryMnth and keep going for calculation of Gaps. Else if FIRSTJOB=1, and P1_Q54Y= 2004 or 2005, and P1_Q67=PdEmployee, set PS_C04=FirstJbWrkd and keep job for calculation of gaps. Else if FIRSTJOB=1 and P1_Q54Y= 2004 or 2005, and (P1_Q67=SelfEmployed or P1_Q67=FamBus) and P1_Q71=Yes, set PS_C04=FirstJbSelfEmpFamBusWrkEveryMnth and keep job for calculation of gaps. Else (job not counted in gaps), set PS_C04=AllOther.
- Eligible job respondent worked at between January 2004 and December 2005, and was a paid worker
 Eligible job respondent worked at between January 2004 and December 2005, was a self-employed worker or an unpaid worker in the family farm or business and reported working during every month
 First job after leaving full-time schooling, worked at job during 2004 or 2005, was a paid worker
 First job after leaving full-time schooling, worked at job during 2004 or 2005, was a self-employed worker or an unpaid worker in the family business or farm and reported working during every month
 All other (job not included in calculation of gaps)
- PS_C05** If FIRSTJOB=1 and P1_Q53M=RF or P1_Q54M=RF, set PS_C05=FirstJobMissInfo and do not keep job for calculation of gaps. Else set PS_C05=AllOther and keep job for calculation of gaps.
- First job after leaving full-time schooling and missing information in dates
 (Go to PS_C06)
 All other..... (Go to PS_C06)
- PS_C06** JOB DATES: Questions P1_Q27M and P1_Q27Y have start date and P1_Q29M and P1_Q29Y have end date for jobs throughout 2004 and 2005. Also include P1_Q53M and P1_Q53Y, and P1_Q54M and P1_Q54Y which are the start and end date of the first job after leaving full-time schooling WHERE FIRSTJOB=1. If P1_Q27M = RF, (98 or recoded to 00), fill month with default value of 01. Create monthly work indicators for months worked in years 2004 and 2005, based on start and end dates for jobs included in the gaps calculations (from PS_C04 and PS_C05): "1" if worked at any job and "0" if not worked during month.

**Youth in Transition Survey (YITS) - Cycle 4
Questionnaire**

PS_C07 Gaps in full-time education. Secondly, if there are possibilities of gap months for education based on PS_C03, you will need to work with question M_Q26 which indicates all months during 2004 and 2005 that the respondent was not a full-time student. NOTE: If M_Q26=Refused or Don't know, then treat respondent as NOT a student during all of the months of 2004 and 2005. Combine the two series of information (dates for full-time schooling and dates when working) and create a flag that would indicate each MONTH AND YEAR between January 2004 and December 2005 that the respondent was not a full-time student AND was not working at a job. For each month where a gap is identified, question PS_Q01 will be asked to collect the respondent's activity during the gap. Question PS_Q01 will be ASKED FOR EACH MONTH SEPARATELY where a gap is identified.

Note: M_Q26 may be blank when M1BM and M1BY are blank. Condition PS_C03 stated that when M1BM and M1BY=blank, then respondents are treated as not in school full-time during any months in 2004 and 2005.

PS_Q01 **My records show that you were not working and not taking full-time schooling in (month/year). During this month, did you do anything to look for work?/In (month/year), did you do anything to look for work?**

PS_C08 Repeat PS_Q01 for all months in which there was a gap. For the last month in which there was a gap continue to PS_C09.

PS_C09 If PS_Q01=1 for the last month in which there was a gap, set PS_C09=LookedForJobLastGapMonth and go to PS_Q03. Else set PS_C09=DidNotLookForJobLastGapMonth PS_END.
