Information for Respondents

Survey Objective

This survey collects financial and operating data for the statistical measurement and analysis of the telecommunications industry. These data will be aggregated to produce national estimates of activity by industry. Those estimates are used by government for policy planning, by the private sector for industry performance measurement and market development and by international telecommunications organizations and the general public to better understand this sector's role in the social and economic fabric of Canada.

Data Sharing Agreement

To reduce response burden and to ensure more uniform statistics, Statistics Canada has entered into a data sharing agreement under section 11 of the Statistics Act with the Institut de la statistique du Québec, to share information from this survey concerning respondents' Quebec operations. The Quebec Statistics Act gives the Institut de la

statistique du Québec the authority to collect the information requested in this report on their own and it contains the same provisions for confidentiality and penalties for disclosure of information as the federal Statistics Act.
