The purpose of this survey is to collect information on livestock and crops. The statistics produced from the survey enable those active in the agricultural sector to observe and assess changes in the industry, measure performance and keep the agricultural community and general public informed of developments.

Statistics Canada is collecting information concerning the farm described on the label. If the operators of this holding manage any other farm(s) entirely separate from this farm (i.e., separate accounting books are kept), please do not include any data for the other farm(s) on this questionnaire.

This information will be used to estimate the number of farmers in Canada that use food scraps and/or other food waste to supplement their regular pig rations (feed grains).

Note: Household food scraps or any other household food waste: Food not eaten or residual food from households.
