## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

## Acknowledgements

This publication was prepared by the Aviation Statistics Centre, of the Transportation Division, Statistics Canada under the general direction of **Gord Baldwin**, Director, Transportation Division and **Norah Hillary**, Chief, Aviation Statistics Centre. **Kathie Davidson**, **Maureen de Souza**, **John Scolli** and **Sylvie Savard** contributed to the preparation of this publication.

## Highlights

- For the fifteenth consecutive month, aircraft take-offs and landings at Canadian airports with NAV CANADA air traffic control towers and flight service stations increased in year-over-year monthly comparisons. These 96 airports reported 586,186 movements in August 2007 compared with 561,106 movements at 97 airports in August 2006, an increase of 4.5% (+25,080 movements).
- Itinerant movements (flights from one airport to another) increased by 2.3% (+9,412 movements) in August 2007 compared with the same month a year earlier.
- Local movements (flights that remain in the vicinity of the airport) increased by 10.8% (+15,668 movements) in August 2007 compared with August 2006.

## Analysis

---

For the fifteenth consecutive month, aircraft take-offs and landings at Canadian airports with NAV CANADA air traffic control towers and flight service stations increased in year-over-year monthly comparisons. These 96 airports reported 586,186 movements in August 2007 compared with 561,106 movements at 97 airports in August 2006, an increase of 4.5% (+25,080 movements).

Itinerant movements (flights from one airport to another) increased by 2.3% (+9,412 movements) in August 2007 compared with the same month a year earlier.

Local movements (flights that remain in the vicinity of the airport) increased by 10.8% (+15,668 movements) in August 2007 compared with August 2006.

### **Airports with NAV CANADA air traffic control towers**

The 42 Canadian airports with NAV CANADA air traffic control towers reported 465,153 aircraft take-offs and landings in August, up 5.6% compared with August 2006 (440,333 movements). Year-over-year increases in aircraft movements were reported by 32 of the airports in August 2007. The variations ranged from 80.8% at Gander International to -17.8% at Edmonton/City Centre.

Itinerant movements (flights from one airport to another) increased by 3.0% (+9,679 movements) in August compared with the same month a year earlier. Year-over-year variations in itinerant movements ranged from a 36.8% increase (+1,959 movements) at Moncton/Greater Moncton International to a decline of 12.7% (-535 movements) at St. John's International.

Local movements (flights that remain in the vicinity of the airport) increased by 12.4% (+15,141 movements) in August compared with August 2006. Year-over-year variations in local movements ranged from a 214.2% increase (+2,386 movements) at Gander International to a decline of 46.3% (-904 movements) at Edmonton/City Centre.

### **Airports with NAV CANADA flight service stations**

The 54 Canadian airports with NAV CANADA flight service stations reported 121,033 aircraft take-offs and landings in August, up 0.2% compared with 55 flight service stations in August 2006 (120,773 movements). Year-over-year increases in aircraft movements were reported by 28 of these airports in August 2007. The variations ranged from a 115.3% increase (+1,342 movements) at Brandon Municipal, Manitoba to a decline of 45.7% (-925 movements) at Rouyn-Noranda, Quebec.

Itinerant movements (flights from one airport to another) decreased by 0.3% (-267 movements) in August compared with the same month a year earlier. Year-over-year variations in itinerant movements ranged from a 55.0% increase (+671 movements) at Castlegar, British Columbia to a decline of 38.4% (-523 movements) at Peace River, Alberta.

Local movements (flights that remain in the vicinity of the airport) recorded in August 2007 increased by 2.3% compared with the same month a year earlier. Brandon Municipal, Manitoba recorded the largest gain in local movements, increasing by 906 movements (+292.3%) compared with August 2006.

# Methodology

---

## Survey universe

### Coverage

The survey covers all aircraft movements at Canadian airports with NAV CANADA air traffic control towers and flight service stations.

## Methodology survey

The Itinerant movement record is designed to capture:

- Aircraft identification
- Aircraft type
- The last station before landing at the reporting airport or the next station after take-off
- Arrival or departure
- Time of movement
- Runway used
- Flight rules (Instrument flight rules or Visual flight rules).

The Local aircraft movement record provides for reports of local movements by:

- Hour
- Single engine aircraft
- Multi-engine aircraft
- Jet aircraft
- Military aircraft
- Date of movement

Processing of aircraft movement statistics involves several stages. Preliminary monthly data by class of operation are released in **Preliminary aircraft movement statistics**, catalogue no. 51F0001P (TP-1496 (NAV CANADA towered airports only)). Data which follow in **Aircraft movement statistics - Monthly** report, catalogue nos. 51-007-X and 51-008-X (TP-141) may contain revisions to the originally released figures. Annual tables, which may reflect further revisions, are released in the publication, **Aircraft movement statistics - Annual** report - TP-577. In particular, data on itinerant movements by type of operation may reflect revisions as various sources of comparative information (data collected from commercial air carriers by the Aviation Statistics Centre, Statistics Canada) become available during the processing cycle. Finally, when revisions are required after the release of TP-577, they are contained in the five year historical summary of subsequent editions of TP-577. These revisions are also reflected in the CANSIM tables, both monthly and annual.

The records are completed daily, based on a twenty-four hour clock running from zero hour to 23:59. The times recorded are Coordinated Universal Time (UTC); however, published statistics are shown in local times. The records are transmitted to the Aviation Statistics Centre.

The Aviation Statistics Centre maintains a data base of parameter files of current information on all registered aircraft. The storage of this information reduces the reporting burden of the survey respondents and limits the element of human error associated with the preparation of source documents.

Other parameter files information includes registered aircraft identifications and their corresponding aircraft types, gross take-off weights, types of power plant (piston, jet or turboprop); whether the aircraft are fixed wing, helicopters or gliders. This information also provides a basis for identifying type of flights (commercial, private and government) and the geographical area in which the flights take place.

The parameter files also include airport environment information against which the airport category is checked; the reported runway is validated and the time difference between UTC and Local is assigned.

## Data quality and limitations

---

Aircraft movement statistics are accumulated from data originating with air traffic control tower units or flight service station personnel. Because staff in these positions are highly trained in factual observation and reporting, the entries in the data bank are of a high quality.

The procedures for reporting aircraft movements on the Daily air traffic records by tower units are described in the NAV CANADA Air traffic control manual of operations (TP 703) Volume 1, Para. 1023 to 1023.5. Definitions for terms used in these paragraphs can be found in the appendix I "Glossary of terms" of this report.

To maintain uniformity in the reporting of source data, ASC issues to air traffic control units an "Air traffic designators" handbook (TP 143) listing the official Transport Canada aircraft type designators and the designators of various domestic and international air carriers. This handbook and another titled "Canada flight supplement" listing various airport codes serve as references to help ensure the reporting of the proper aircraft identity and the point of origin and destination of flights.

The processing system contains editing procedures designed to identify data errors occurring during transcription or during data capture of forms. Identified errors are manually corrected by ASC editing staff.

Errors may occur if an aircraft type code which exists is reported or data captured in error for a flight. For example, the reporting or keying of B727 for a flight actually performed by a B737 may not be detected during the system editing. That the aircraft type information is recorded by highly trained air traffic control tower staff using a common handbook of official aircraft codes will minimize this problem.

Similarly, the breakdown of the data on a geographic basis by use of location codes can be subject to error. For smaller locations, alphanumeric location codes are often used and the sequence of numbers and letters determines the geographic area to which the data are assigned. In some cases, where a sequence error has been introduced into the system either at the reporting unit or at data capture, a domestic movement may be classified as transborder or vice versa. The use of common manuals of location identifiers works to minimize this occurrence.

### Factors influencing the data

Roberval – the Flight Service Station closed in November 2006. As of December 2006, Roberval appears in Volume II – Airports without air traffic control towers.

Harmony Airways ceased its operations on April 9, 2007.

Icelandair began regular service from Halifax, Nova Scotia to Iceland on May 17, 2007.

# Appendix I

---

## Glossary of terms

### Air carrier

Aircraft operators licensed by the Canadian Transportation Agency to transport persons, mail and/or goods by air.

**Levels I to III air carriers (Defn 2000)** – This includes every Canadian air carrier that, in each of the two calendar years immediately preceding the report year, realized annual gross revenues of \$1,000,000 or more for the air services for which the air carrier held a licence. Also includes foreign air carriers.

**Levels IV to VI air carriers (Defn 2000)** – Canadian air carriers not classified in report level I-III that, in each of the two calendar years immediately preceding the report year, realized annual gross revenues of less than \$1,000,000 for the air services for which the air carrier held a licence. Since 2000, levels IV and VI are no longer applicable.

### Aircraft movement

A take off, a landing, or a simulated approach by an aircraft. ATC Manops amendment 8-8-83. NC-703.

### Class of operation

Aircraft movements are classified as either “Itinerant” or “Local”.

### Commercial

Flights by aircraft operators licensed by the Canadian Transportation Agency to perform commercial air services. Commercial operations are divided into two categories: **Air carrier** and **Other commercial**.

### Domestic itinerant movements

Movements, at a Canadian airport, of aircraft departing to or arriving from another point in Canada.

### FSS

Flight service station.

### Government – Civil

Aircraft owned by federal, provincial and municipal bodies as well as foreign states, but excluding those owned by crown corporations, boards and commissions. Such aircraft are coded “3” under “Purpose” in the Canadian civil aircraft register.

### Government – Military

Aircraft of any branch of the armed forces of any nation.

### Gross take-off weight

The maximum weight for which the aircraft is licensed to operate. For operational purposes, all weights are rounded upwards to the next 1,000 kilograms. Thus 3,200 kilograms becomes 4,000 kilograms.

### I.F.R. flight

A flight conducted in accordance with Instrument flight rules.

### International movements

Movements, at a Canadian airport, of aircraft arriving from or departing to a point outside Canada. International movements are subclassified into “transborder” (to or from a point in the United States including Alaska but excluding Hawaii), and “other international” (to or from points in countries other than Canada and the United States).

Since aircraft movements are reported on the basis of place “arrived from” or “departed to”, an arrival at Mirabel airport from London, England would appear under “other international”. If the same aircraft moved on to Toronto, both the departure at Mirabel and the arrival at Toronto would be shown as “domestic”.

### Itinerant movements

At Airports **with** control towers and/or Flight service stations: for the purpose of completing air traffic records, itinerant movements are considered as movements in which aircraft proceed to or arrive from another location; or where aircraft leave the circuit but return without landing at another airport. At Airports **without** control towers: an aircraft movement in which the aircraft arrives from or departs to a point other than the reporting airport; or a movement by an aircraft that leaves the close proximity of an airport and returns without landing at another airport.

### Local movements

At Airports **with** control towers and/or Flight service stations: for the purpose of completing air traffic records, local movements are considered as movements in which the aircraft remains in the circuit. At Airports **without** control towers: an aircraft movement in which the aircraft remains in the close proximity of the airport. Local movements are often carried out during training flights (touch-and-go), equipment tests etc.

### Other commercial

Flights performed by **Commercial** aircraft operators not included in the **Air carrier** categories. Flying schools, agricultural sprayers, water-bombers, aerial photography and survey, etc.

### Power plant

The source of propulsion. For example, piston engines, turbo-propellers and jet engines. “Helicopters”, in this report, include both piston and turboshaft-driven engines.

### Private aircraft

Aircraft used solely for private purposes, not for hire and compensation, which are classified as “Private” or “Private Restricted” in the Canadian civil aircraft register or similar registries of other countries. Owners include individuals, groups and business firms.

### **Runway 88**

Through control zone flights, i.e. flights which communicate with the tower while transiting the tower control zone to another destination without landing at the reporting airport.

Data for these runways are not included in the grand total.

### **Simulated approaches**

Movements that are either missed instrument or practice instrument approaches without landing.

### **TC**

Transport Canada

### **Tower control zone**

A controlled airspace within the proximity of an air traffic control tower, usually within a radius of less than 24 kilometres of the tower.

### **V.F.R. flight**

A flight conducted in accordance with Visual flight rules.

### **Weight group**

The classification of weight classes in groups for statistical purposes.
