Courriel : don_boyer@hc-sc.gc.ca

Introduction

L'Index de mots-clés des matériels médicaux a été préparé afin de vous aider à vérifier la classe de matériel médical à laquelle vous avez déterminé que votre produit appartenait après avoir appliqué les Règles de classification des instruments médicaux du *Règlement sur les instruments médicaux*. Vous devriez utiliser l'Index en vous servant également du document intitulé « Orientation pour le système de classification fondé sur le risque, GD006/RevDR-MDB ». Veuillez noter que ce document est destiné à servir de guide et qu'en cas d'écart entre ce guide et les Règles de classification des matériels médicaux du *Règlement sur les instruments médicaux*, ces dernières prévalent.

Qu'est-ce que l'Index de mots-clés?

L'Index de mots-clés des matériels médicaux est une liste alphabétique de tous les mots qui apparaissent dans tous les descripteurs abrégés de tous les groupes de matériels qui ont été identifiés par le Bureau des matériels médicaux. Il contient des synonymes et des termes qui sont utilisés couramment dans l'industrie pour décrire les produits appartenant à ces groupes de matériels médicaux.

La liste contient les quatre champs suivants : **Mot-clé**, Code de nom privilégié ou **CNP**, **Classe de risque** et **Description** selon la présentation et l'ordre suivants :

Mot-clé	Code de nom priv. (CNP)	Classe de risque	Description
Pompe	80FRN	3	Pompe, Infusion

Définitions

Mot-clé signifie tous les mots qui apparaissent dans les descripteurs abrégés de tous les groupes de matériels génériques ainsi que les synonymes et les termes utilisés couramment dans l'industrie pour décrire ces groupes de matériels.

Le **CNP** ou le **Code de Nom Privilégié** est un code alphanumérique à cinq caractères (2 chiffres et 3 lettres) qui identifie un groupe de matériels. Les trois lettres désignent le groupe de matériels et les deux chiffres désignent la spécialité médicale dans laquelle le matériel est habituellement, mais pas nécessairement exclusivement, utilisé. Dans la mesure du possible, ces codes sont harmonisés avec ceux de la USFDA.

- 73 - Anesthésiologie
- 74 - Cardiovasculaire
- 76 - Médecine dentaire
- 77 - Oto-rhino-laryngologie
- 78 - Gastroentérologie et urologie
- 79 - Chirurgie générale et plastique
- 80 - Utilisation générale dans les hôpitaux et utilisation personnelle
- 84 - Neurologie
- 85 - Obstétrique et gynécologie
- 86 - Ophtalmologie
- 87 - Orthopédie
- 89 - Médecine physique
- 90 - Radiologie

La **classe de risque** est un chiffre de 1 à 4, le chiffre 4 correspondant à la classification de risque la plus élevée qui a été déterminée par le Bureau des matériels médicaux comme étant représentative de la majorité des produits actuellement enregistrés dans la base de données et portant ce code de groupe de matériels (CNP).

La **description** est une chaîne d'au moins deux mots qui définit un groupe de matériels.

Version électronique de l'Index de mots-clés

La version électronique de la base de données de l'Index de mots clés contient plus de 10 000 lignes d'information et est présenté en PDF.

Utilisation de l'Index de mots-clés

Instructions :

Copiez le fichier PDF sur votre ordinateur. Pour chercher un groupe de matériels dans le fichier PDF, allez à Outils / Recherche et tapez soit le mot-clé, soit le CNP, soit la description que vous cherchez dans le champ « Rechercher ».

À noter que la classe de matériel assignée à un groupe de matériels **n'est qu'une indication** de la classe à laquelle appartiennent la majorité des matériels de ce type. **Il ne s'agit pas d'une**

détermination exacte. Il incombe à chaque fabricant d'appliquer les Règles de classification des instruments médicaux du *Règlement sur les instruments médicaux* pour déterminer à quelle classe spécifique son produit appartient.

Exemple : tube de trachéotomie (73BTO)

La majorité de ces matériels appartiennent à la Classe II en fonction de la règle 2(1). Cependant, si un fabricant affirme que ce matériel peut rester en place pendant plus de 30 jours, la classe de matériel devient Classe III, en fonction de la règle 2(3).

Keyword	Pref Name	Risk Class	Description
