

# It's time...

B.C. is growing like never before, and so too is our demand for reliable electricity.

The Province's electricity grid now needs its first major upgrade in 30 years.

BCTC's plan will meet the electricity needs of British Columbians – today and in the future.

**It's been more than 30 years since the last major upgrade of British Columbia's electricity transmission system.**

It's time to upgrade our transmission system to meet the growing demand today – and in the future.

British Columbia Transmission Corporation (BCTC) is embarking on a 10-year, \$3.2 billion capital plan that will expand the system to ensure we have safe, secure electricity for the next 30 years and beyond. This plan also supports the Provincial goal of electricity self-sufficiency within a decade.

To learn more about BCTC's innovative capital plan and our commitment to talking with communities throughout B.C., visit [bctc.com](http://bctc.com), or call **1-866-647-3334**.
