To His Excellency the Honourable Pierre Duchesne
Lieutenant-Governor of Québec
Parliament Building
Québec

Your Excellency,

The undersigned has the honour of presenting to Your Excellency the Public Accounts of the
Gouvernement du Québec for the fiscal year ended March 31, 2007.

A handwritten signature in black ink, appearing to read 'Monique Jérôme-Forget', with a stylized flourish at the end.

Monique Jérôme-Forget
Minister of Finance,
Minister of Government Services,
Minister responsible for Government Administration
and Chair of the Conseil du trésor

Québec, December 2007

Mrs. Monique Jérôme-Forget
Minister of Finance,
Minister of Government Services,
Minister responsible for Government Administration
and Chair of the Conseil du trésor
Parliament Building
Québec

Dear Madam,

In accordance with the commission entrusted to me, I have the honour of presenting the Public Accounts of the Gouvernement du Québec for the fiscal year ended March 31, 2007. These accounts have been prepared under section 86 of the *Financial Administration Act (R.S.Q., c. A-6.001)*, in accordance with the Government's accounting policies.

Respectfully yours,

A handwritten signature in black ink that reads "Carole Boisvert". The signature is written in a cursive, flowing style.

Carole Boisvert, CA
Comptroller of Finance

Québec, December 2007

Presentation of the Public Accounts

The *2006-2007 Public Accounts* present the financial position of the Gouvernement du Québec and its operations. They include a financial analysis and a glossary to make them easier to understand and thus increase their usefulness and transparency.

The Ministère des Finances is aware that the use of indicators is extremely efficient for observing changes in the state of the Government's finances. Therefore, seven representative indicators are presented in the section "Analysis of the financial statements."

Preparing the Public Accounts requires the participation and collaboration of many employees from different Government departments, agencies, funds and enterprises. We would like to thank all of them for their help in publishing this document.

Prior to the publication of the Public Accounts, the Ministère des Finances regularly informs the public about the state of the Government's finances and the results of its financial transactions, notably through the *Monthly Report on Financial Transactions*.

The *2006-2007 Public Accounts* present information on the actual results for fiscal 2006-2007. The original forecasts were presented in the *2006-2007 Budget* of March 23, 2006 and revised in the October 24, 2006 *Update in Québec's Economic and Financial Situation*. The preliminary results were presented in the *2007-2008 Budget* on May 24, 2007.

The Public Accounts for the fiscal year ended March 31, 2007 have been prepared by the Comptroller of Finance for the Minister of Finance in accordance with the accounting policies established by the Conseil du trésor and pursuant to the provisions of section 86 of the *Financial Administration Act (R.S.Q., c. A-6.001)*. They are published in two volumes.

Volume 1 – Consolidated financial statements of the Gouvernement du Québec

Volume 1 presents the consolidated financial statements of the Gouvernement du Québec, as well as a financial analysis that allows a better understanding of the transactions carried out in fiscal 2006-2007.

The consolidated financial statements consist mainly of the following:

- A consolidated statement of operations, which presents the annual surplus or deficit arising from operations during the fiscal year. It discloses the Government's revenue, the cost of services and other current expenses, as well as the variance between the current fiscal year and the previous one.

- A consolidated statement of accumulated deficit, which presents the change in accumulated deficits taking into consideration the results for the year and various restatements, where applicable.
- A consolidated statement of financial position, which presents the financial resources of the Québec government as well as its obligations. It shows the net debt from which the net value of non-financial assets must be subtracted to determine the accumulated deficit.
- A consolidated statement of change in the net debt, which presents the combined effect on the net debt of the results for the fiscal year, variances due to non-financial assets, items charged directly to accumulated deficits and various restatements, where applicable.
- A consolidated statement of cash flow, which provides information on the Government's liquid assets derived from its operating activities and used for its investment activities, and shows how the Government financed its activities over this period.
- Notes and appendices, which provide additional information on the items that make up the various consolidated statements and which are an integral part of the consolidated financial statements. The notes also include a summary of the main accounting policies used in preparing the consolidated financial statements.

The report of the Auditor General of Québec presents his opinion on the consolidated financial statements.

Volume 2 – Revenue, appropriations, expenditure and investments of the Consolidated Revenue Fund and financial information on the special funds of the Gouvernement du Québec

Volume 2 is divided into three sections. The first two sections report on the operations of entities whose revenue is cashed into the Consolidated Revenue Fund or the Health Services Fund and entities whose operating activities are paid for out of these funds using appropriations allotted by Parliament. Such entities include Government departments, budget-funded agencies, the National Assembly and persons designated by it, and other portfolios. The third section presents summary financial information on the special funds and the sinking funds.

Glossary

The following terms are used in the section "Analysis of the financial statements" and throughout the financial statements contained in this volume.

Accrual basis of accounting

An accounting method that involves taking into account when the revenue is earned and the expenditures incurred in determining an entity's net results, without considering the moment the transactions were settled through cash receipts or disbursements or in any other manner.

Budget cycle

The budget cycle is defined by two main principles:

- planning revenue and expenditure through the publication of the *Budget Speech* and the tabling of the *Expenditure Budget*; and
- monitoring changes in revenues and implementing the expenditure budget.

Consolidated budget balance

The consolidated budget balance represents the difference between consolidated budgetary revenue and expenditure taking into account allocations to the Generations Fund and to the budgetary reserve.

Consolidated Revenue Fund

The Consolidated Revenue Fund consists of funds collected or received from various sources and over which Parliament has a right of allocation. The Fund is constituted by the National Assembly, persons designated by the National Assembly, departments as well as the budget-funded agencies listed in Schedule 1 of the *Financial Administration Act*.

Consolidation methods

Line-by-line consolidation method

The accounts of the Consolidated Revenue Fund and the other entities included in the Government reporting entity, other than Government enterprises and organizations of the health and social services and the education networks, are harmonized according to the government's accounting policies and combined, line by line. Inter-entity transactions and balances are eliminated.

Glossary (cont'd)*Modified equity method*

Investments in Government enterprises and the accounts of the health and social services and the education networks are recorded using this method. In the case of enterprises, investments are recorded at cost, which is adjusted annually by the Government's share in the results of these enterprises, with an offsetting entry to revenue, and in the other components of their comprehensive income, with an offsetting entry to accumulated deficits. The cost of the investment is reduced by declared dividends. This method requires no harmonization of the accounting policies of enterprises with those of the Government.

In the case of the accounts of organizations of the health and social services and the education networks, their net equity representing the total of their financial and non-financial assets less their liabilities, is recorded as a component of the net investment in the health and social services and the education networks. The annual surplus or deficit of the organizations is recorded in the expenditures of the mission concerned. This consolidation is done on the basis of the financial statements of the organizations, after adjusting to eliminate the major differences between their accounting policies and those of the Government.

Debt representing accumulated deficits

The debt representing accumulated deficits corresponds to the portion of the net debt relating to the accumulation of deficits over prior fiscal years.

Derivative instruments

Instruments whose value fluctuates depending on an underlying interest, regardless of whether the underlying interest is actually held or issued.

Direct debt

Direct debt corresponds to borrowings contracted on financial markets to meet the financial requirements of the Consolidated Revenue Fund and consolidated organizations, excluding those of the health and social services and the education networks and of the municipal bodies.

Financial assets

Assets that could be allocated to repaying existing debts or to funding future activities and that are not intended to be consumed in the normal course of the Government's activities.

Glossary (cont'd)

Financial instruments

Liquid assets, equity securities in an entity, or contracts that are both a source of financial assets for one of the two contracting parties and a source of financial liabilities or equity instruments for the other contracting party.

Generations Fund

The Generations Fund was created on January 1, 2007 under the *Act to reduce the debt and establish the Generations Fund*. Under this act, the Minister of Finance invests the amounts constituting the Fund with the Caisse de dépôt et placement du Québec. The Fund is used exclusively to repay the Government's debt.

Government accounting policies

The Government's accounting policies define how financial transactions are recorded in its books and adequately reported to the general public. These policies were enacted by a decision of the Conseil du trésor.

Gross debt

The gross debt corresponds to the total of the direct debt, the debt to fund the health and social services and the education networks, the debt to fund the work of municipal bodies and the net liability of the retirement plans, in addition to future social benefits. The balance of the Generations Fund is subtracted from this amount.

Gross domestic product (GDP)

The value of all goods and services produced within the geographical limits of a country or a territory during a given period.

Indicators

Tools of measurement that make it possible to monitor and assess the attainment of an objective, the implementation of a strategy or the accomplishment of a task or an activity.

Missions

The basic activity areas of a government that constitute its *raison d'être*. In Québec, there are six missions: Health and Social Services, Education and Culture, Support for Individuals and Families, Economy and Environment, Administration and Justice, and Debt Service.

Glossary (cont'd)**Net debt**

The net debt corresponds to the difference between the Government's financial assets and its liabilities. It consists of accumulated deficits and non-financial assets.

Net financial requirements

Net total cash and cash equivalents required for operating and investing activities.

Non-financial assets

Assets that normally do not generate cash capable of being used to repay existing debts.

Own-source revenue

Total own-source revenue consists of revenue from income and property taxes, consumption taxes, duties, permits and miscellaneous revenue, Government enterprises and the Generations Fund.

Pre-financing

Borrowings made by the Consolidated Revenue Fund during a fiscal year that will be used to meet the financial requirements of the next fiscal year.

Reporting entity

The Government's reporting entity encompasses the financial transactions of the National Assembly, persons designated by the National Assembly, departments and any organizations, funds and enterprises under the Government's control. Control is defined as the power to direct the financial and administrative policies of an entity, such that its activities provide the Government with expected benefits or expose it to a risk of loss.

Retirement Plans Sinking Fund (RPSF)

Under the *Financial Administration Act*, the Minister of Finance may make long-term investments by depositing money from the Consolidated Revenue Fund with the Caisse de dépôt et placement du Québec, up to an amount equal to the sums recorded as the pension plans liability, in order to create a sinking fund to provide for the payment of all or part of the benefits awarded under these plans.

Glossary (cont'd)

Total debt

Concept used for the purposes of the *Act to reduce the debt and establish the Generations Fund* and for the purposes of analysis of the financial statements, the Government's total debt consists of the direct debt, excluding advance borrowings and deferred exchange gains or losses, and the net pension plans liability minus the amounts accumulated in the Generations Fund.

- The Retirement Plans Sinking Fund, an asset created in order to pay the pension benefits of public and parapublic sector employees, is subtracted from the pension plans liability.
- The debt to fund the health and social services and the education networks, the debt to fund the work of municipal bodies and the debt resulting from the change in status of organizations under the accounting reform are excluded from the direct debt.

Transfer

Funds transferred by a government to an individual, an organization or another government, on account of which the government that makes the transfer:

- i) does not receive any goods or services in return, contrary to what occurs in purchase/sale transactions;
- ii) does not plan to receive income, as it would with an investment.

ANALYSIS OF FINANCIAL STATEMENTS

1. Accounting reform

When she tabled the *2007-2008 Budget*, the Minister of Finance set up a Task Force on Government Accounting to propose a reform of its accounting practices. The Task Force, consisting of representatives from the Ministère des Finances, the Comptroller of Finance and the Auditor General, began its work in June 2007 and submitted its report in December 2007. The government has announced that it will act on all the recommendations in the report.

Under the accounting reform, whose main items are described in note 3 to the consolidated financial statements, the health and social services and the education networks will in particular be incorporated into the Government reporting entity and the Government's accounting policies will comply with public sector generally accepted accounting principles (GAAP).

However, the impacts of this reform had not been anticipated in the initial forecasts shown in the *2006-2007 Budget*. In addition, the comparative figures for March 31, 2006, have not been adjusted to reflect the changes made to the accounting policies, since, in particular, the effort required to obtain the necessary financial data would be unreasonable, in view of the scope of the reform. Accordingly, care must be taken in comparing the real results for March 31, 2007, with the forecast results in the budget, and with the real results for March 31, 2006, because part of the observed differences is due to these accounting changes.

The accounting reform has had the following effects on various items of the financial statements of this fiscal year:

	Increase <u>(decrease)</u> (in millions of dollars)
Accumulated deficits as at April 1, 2006	6 426
Operating results	
Revenue	609
Program spending	248
Debt service	264
Surplus for the fiscal year	97
Financial position as at March 31, 2007	
Financial assets	(1 110)
Debt	13 556
Other liabilities	4 018
Net debt	18 684
Net investment in the networks	9 883
Fixed assets and other non-financial assets	2 472
Accumulated deficits at the end	6 329

The impacts of the accounting reform are also shown separately in the table in section 5, page 23.

2. Highlights for the fiscal year

- Real gross domestic product (GDP) for 2006 grew by 1.7%, while the *2006-2007 Budget* forecast an increase of 2.5%.
- Actual results show an annual surplus of \$1 993 million.
- Total revenues were \$65 196 million, up \$3 406 million from the March 23, 2006 budget and up 8.6% from fiscal 2005-2006.
- Consolidated expenditure amounts to \$63 203 million, or \$1 487 million more than forecast on March 23, 2006. This represents an increase of 5.4% compared with the previous fiscal year.
- The \$1 993 million annual surplus made it possible to allocate \$584 million to the Generations Fund and \$1 300 million to the reserve for use in the years to come. Consequently, after the amounts allocated to the Generations Fund and the reserve, the budget balance was \$109 million.
- Consolidated financial requirements were \$2 826 million, up \$2 331 million from the *2006-2007 Budget*. The bulk of this difference is due to the effects of the accounting reform.
- The Government's total debt has been revised upward by \$1 477 million since the Budget of March 23, 2006.

2007

(1) Including revenue of \$74 million of the Generations Fund.

(2) Including revenue of \$584 million of the Generations Fund

3. Overview of the 2006-2007 Budget

In the *2006-2007 Budget*, the Government committed itself to maintaining a balanced budget.

Own-source revenue, excluding revenue from Government enterprises and the Generations Fund, was expected to grow by 3.2%. This growth takes into account the full impact of the income tax reductions announced in the *Budget 2006-2007* and previous budgets. This forecast also reflected the impact of the measures announced in the past two years in order to support economic growth.

Revenue from Government enterprises was forecast to grow by 6.7%. This increase, compared with the results achieved in 2005-2006, was based mainly on the anticipated rise in the profits of Hydro-Québec and the Société des alcools du Québec.

The *2006-2007 Budget Speech* announced the creation of the Generations Fund in order to tackle the debt problem. At March 31, 2007, the Fund balance was \$74 million.

Revenue from Federal Government transfers was expected to grow by 8.3% in 2006-2007. This forecast stemmed notably from the Federal Government's November 8, 2005 decision to increase Québec's share of the equalization payment budget to reflect more recent taxation and economic data.

The *2006-2007 Budget* forecast that program spending would grow by 3.9%. This forecast presented a growth rate that was less than the nominal GDP, estimated at 4.2% and was similar to the growth observed over the past three years.

In addition, the Government continued to include health and education among its main priorities. The Budget Speech of March 23, 2006 announced an increase of over \$1.3 billion in the health budget and over \$600 million in the education budget. For fiscal 2006-2007, the spending forecasts for the "Health and Social Services" mission and the "Education and Culture" mission were \$22.9 billion and \$13.7 billion, respectively.

The cost of debt service was expected to rise 5.2%. The growth envisaged was due primarily to the increase in interest rates.

4. Risks and uncertainties

The Government establishes its annual budget on the basis of economic forecasts. Any changes observed, particularly with regard to growth in the economy, the Consumer Price Index or interest rates, can cause actual results to differ from those forecast. For example, a 1% difference in nominal GDP has an impact of about \$450 million on the Government's own-source revenue.

Federal Government transfers, which represented more than 18% of the Government's total revenue in 2006-2007, are affected by revisions of economic, taxation or population data and by negotiations with the Federal Government, both of which are carried out on a regular basis. These revisions and negotiations can affect the level of revenue from Federal Government transfers.

As regards program spending, the level of spending allocated to certain programs is also related to the economic situation: for example, changes in the labour market affect the cost of employment assistance and income security programs. Similarly, in the health sector, the aging of the population raises the risk of cost overruns for medication and public services.

In addition, fluctuations in interest rates and in the value of the Canadian dollar in relation to the other currencies that make up the debt have an impact on debt service.

Lastly, the Government is faced with pending or potential claims and lawsuits, which are discussed in Note 11 of the financial statements.

(1) These data include, in addition to the Consolidated Revenue Fund, the revenue and expenditure of specified purpose accounts and the Government's organizations and special funds and, for the real results as at March 31, 2007, the annual deficit of the health and social services and the education networks.

(2) These figures exclude revenue from Government enterprises and of the Generations Fund.

(3) The Generations Fund became operational on January 1, 2007.

(4) The other missions are: "Economy and Environment", "Support for Individuals and Families", and "Administration and Justice".

5. Variance analysis (cont'd)

Consolidated revenue

Comparison of actual results with the Budget

Own-source revenue, excluding revenue from Government enterprises and the Generations Fund, is \$1 955 million more than forecast in the *2006-2007 Budget*. This rise consists of increases with respect to income and property taxes, duties, permits and miscellaneous revenue, which are offset in part by a drop in consumption taxes. It also includes an impact of \$610 million relating to the accounting reform.

The \$970-million increase in revenue from Government enterprises, minus the \$500 million allocated to the Generations Fund, is attributable primarily to the additional profits earned by Hydro-Québec through gains on the sale of shares abroad.

The variation in revenue from Federal Government transfers compared to the Budget is \$29 million and:

- results from the \$219-million increase in transfers to the Consolidated Revenue Fund due essentially to additional revenue of \$185 million from equalization under the federal budget of May 2006;
- is offset by the \$248-million decrease in transfers allocated to consolidated organizations and specified purpose accounts due primarily to delays in projects to be subsidized by the Société de financement des infrastructures locales du Québec and which also benefit from contributions from the Federal Government.

5. Variance analysis (cont'd)

Consolidated revenue

Comparison of actual results with the previous fiscal year

The increase of \$4 330 million, or 8.9%, in own-source revenue can be attributed mainly to the following factors:

- \$2 030 million or 12.3% in additional revenue from personal income taxes. This upturn reflects, notably:
 - high taxation receipts linked to the steady growth of economic activity;
 - the adjustment of the breakdown of payroll deductions and tax instalments from the Health Services Fund (HSF) and the Régie des rentes du Québec (RRQ) to reflect actual data. An estimated basis for breakdown is used when deductions or instalments are cashed and annual reconciliation allows the necessary adjustments to be made;
 - the impact of retroactive pay equity adjustments paid to Government employees before March 31, 2007;
 - the change in accounting policy under the reform, designed to recognize revenue on an accrual accounting basis.

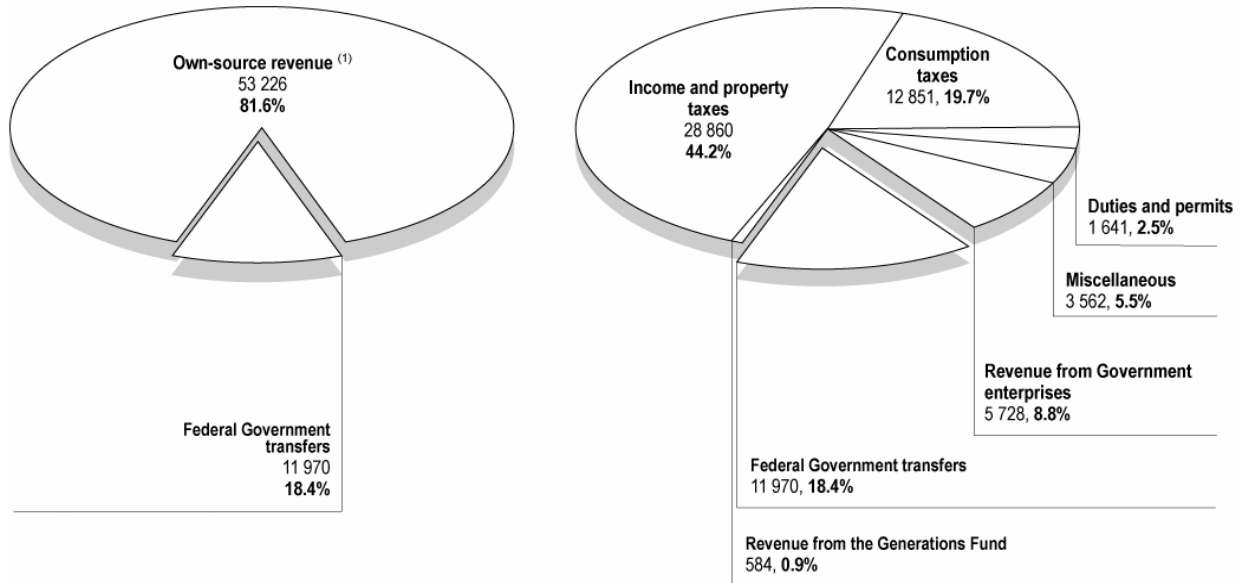

- \$1 720 million, an increase of over 74.0%, in revenue from Hydro-Québec, resulting notably:
 - from earnings totalling more than \$900 million on the sale of this Government enterprise's investments in foreign businesses;
 - from additional profits resulting from earnings on exchange rates.

5. Variance analysis (cont'd)

Consolidated revenue
 FISCAL YEAR ENDED MARCH 31, 2007
 (in millions of dollars)

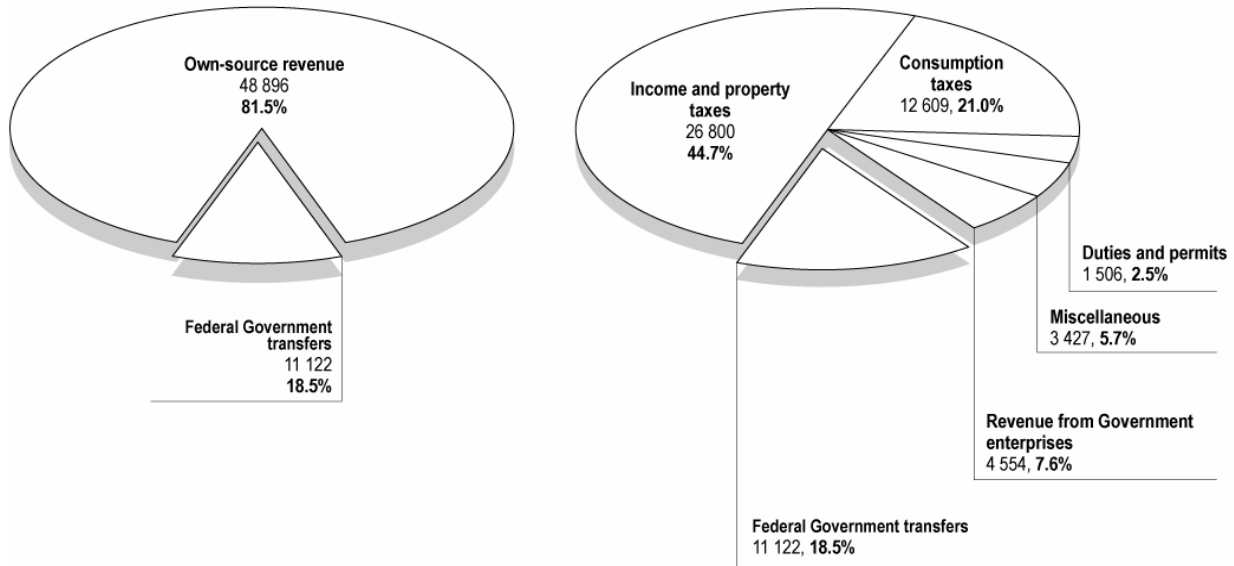

2007

Total revenue: 65 196
By source

2006 ⁽²⁾

Total revenue: 60 018
By source

(1) Including revenue of \$584 million allocated to the Generations Fund.

(2) The comparative figures for 2006 have not been restated to reflect the changes in accounting policies. Certain figures were reclassified, however, for consistency with the presentation adopted in 2007.

5. Variance analysis (cont'd)

Consolidated expenditure

Comparison of actual results with the Budget

For 2006-2007, consolidated expenditure excluding debt service is \$1 481 million higher than forecast in the *2006-2007 Budget*. Program spending was revised upward to take into account, among other things:

- a \$339-million increase in expenditures by consolidated agencies and specified purpose accounts. This increase stems in particular from the addition of the expenditures of a few agencies, formerly considered Government enterprises and whose status has been changed under the accounting reform;
- the \$338-million increase in the Ministère de la Santé et des Services sociaux budget to reflect, notably, additional prescription drug insurance and medical services costs;
- the \$273-million increase in the expenditure for the provision for doubtful debts to Revenu Québec, mainly as a recurring expenses recognized at the 2005-2006 fiscal year-end;
- the \$242-million impact of the Commission de l'équité salariale's decision to spread the wage adjustments resulting from the pay equity settlement over seven payments and six years;
- the incorporation of the health and social services and the education networks within the Government reporting entity. The deficit of the health and social services and the education networks for fiscal year 2006-2007 is \$219 million.

Debt service is comparable with what was forecast. However, since the changes to the accounting policies resulted in a rise of \$264 million, expenditure is in fact down compared to the forecast. This decrease results primarily from the fact that medium- and long-term interest rates were lower than forecast and that the Canadian dollar performed more favourably than expected compared to the yen and U.S. dollar.

5. Variance analysis (cont'd)

Consolidated expenditure

Comparison of actual results with the previous fiscal year

The increase of \$2 887 million, or 5.5%, in expenditure excluding debt service can be attributed primarily to the following factors:

- a rise of \$1 508 million, or 6.8%, in the "Health and Social Services" mission, for the Government's commitment to continue to maintain health investment as a top priority. This increase results notably from the growth in the cost of programs and new collective agreements, including adjustments related to pay equity;
- a rise of \$306 million, or 2.3%, in the "Education and Culture" mission, to, notably, add hours of teaching time at the elementary level and improve support for students experiencing difficulties;
- an increase of \$1 073 million, or 6.3%, in "Other missions," caused notably by:
 - the addition of the expenditures of a few agencies whose status has been changed under the accounting reform;
 - recognition of the retroactive wages to be paid to Québec judges following a recent Superior Court ruling;
 - the cost of developing the network of day care centers (CPE);
 - the impact on the annual expenditure budget of the Ministère des Transports of increasingly large investments on the road network;
 - the cost of the general elections held in March 2007.

Lastly, the debt service expenditure is \$335 million higher than in 2005-2006. The changes to the accounting policies resulted in an increase in expenditure of \$264 million, due in particular to the addition of the debt service of a few agencies whose status has been changed. The difference results from the increase in the amount of the debt, though that is offset by additional interest income generated by the growth of the Retirement Plans Sinking Fund.

5. Variance analysis (cont'd)

Consolidated expenditure

5. Variance analysis (cont'd)

Consolidated net financial requirements

Compared to the 2006-2007 *Budget*, consolidated net financial requirements have risen by \$2 331 million, chiefly as a result of the unanticipated impact of the accounting reform. Although the annual surplus exceeded the forecast of \$1 919 million, the changes to the accounting policies largely contributed to the additional requirements of \$4 250 million reflected in non-budgetary transactions. These additional requirements stem mainly from:

- an increase in requirements of \$2 929 million under the heading “Other accounts” attributable essentially to the change in accounts receivable and payable and expenses payable. This change stems in particular from the move to accrual accounting for income and property tax revenue, consumption taxes and duties and permits, as well as from the retroactive payment of pay equity adjustments to provincial employees in March 2007 ;
- requirements of \$1 221 million under the heading “Loans and advances to the networks”. This amount, included further to the accounting reform, corresponds to the advances made during the fiscal year to entities of the health and social services and the education networks;
- an increase in requirements of \$651 million under the heading “Investments, loans and advances”. This change is due in particular to the fact that only a fraction of the additional profits earned by Hydro-Québec was paid to the government as dividends.

5. Variance analysis (cont'd)

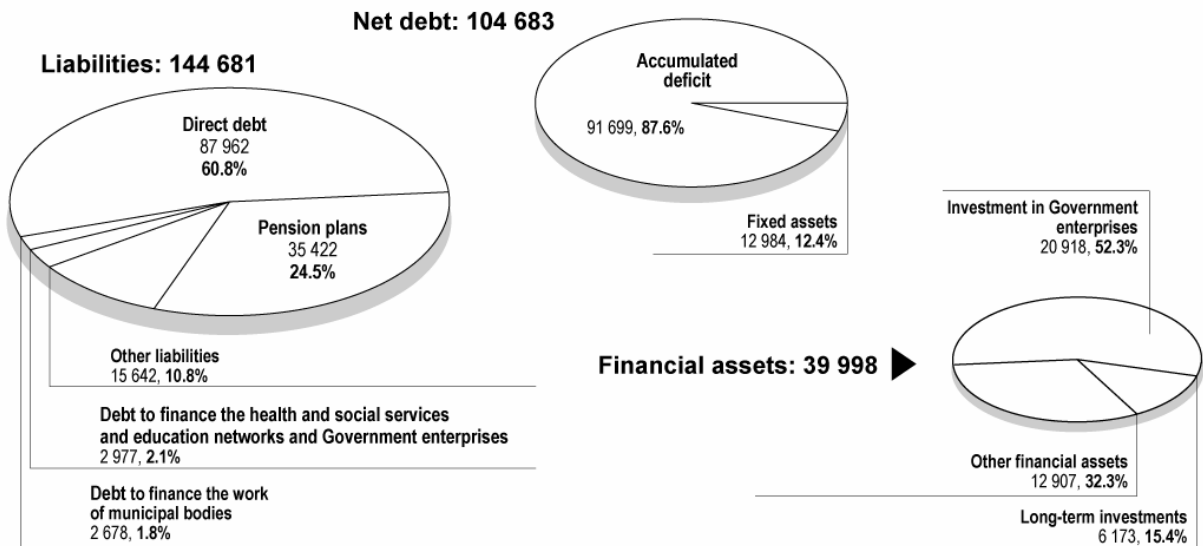

Government's financial assets and liabilities

Comparison of actual results with the previous fiscal year

The difference between the Government's financial assets and its liabilities corresponds to the **net debt**. As at March 31, 2007 the net debt amounted to \$122 191 million, up \$17 508 million from the previous fiscal year, i.e. \$227 million resulting from transactions in fiscal 2006-2007 and \$17 281 million resulting from accounting restatements further to the reform, mostly due to the integration within the reporting entity of agencies that fund the health and social services and the education networks.

Financial assets grew by \$7 734 million in fiscal 2006-2007. This is attributable essentially to an increase of \$3 860 million in accounts receivable, a rise of \$3 197 million in short-term investments and an accumulated amount of \$584 million in the Generations Fund. The details of financial assets are shown in appendices 8 to 12 of the consolidated financial statements.

The Government's **liabilities** consist mainly of direct debt, pension plans, debt contracted to finance the networks, and accounts payable and accrued expenses. In fiscal year 2006-2007, the increase in the Government's liabilities is attributable chiefly to the \$10 486-million rise in its direct debt, including \$6 069 million of advance borrowings, and the addition, further to the accounting reform, of \$12 623 million to the debt to fund the networks, to reflect, in particular, the change in status of Financement-Québec following the inclusion of the health and social services and the education networks within the government reporting entity.

The table on the following page shows the change in the Government's debt compared with the forecast in the *2006-2007 Budget* and the change compared with the previous fiscal year.

(1) For the purposes of the *Act to reduce the debt and establish the Generations Fund*.

(2) Excluding \$31 million for a fiduciary and a non-profit organization.

5. Variance analysis (cont'd)

Change in the Government's total debt

Comparison of actual results with the Budget

The upward adjustment of \$1 477 million to the total debt for the purposes of the *Act to reduce the debt and establish the Generations Fund* forecast in the *2006-2007 Budget* is attributable mainly to retroactive adjustments relating to pay equity totalling \$1 397 million that were disbursed in March 2007.

Comparison of actual results with the previous fiscal year

As at March 31, 2007, the total debt for the purposes of the *Act to reduce the debt and establish the Generations Fund* of the Government stood at \$122 600 million, up \$4 298 million compared to March 31, 2006. This increase is attributable in particular to:

- the increase of \$1 953 million in the interest in Government enterprises, particularly Hydro-Québec, essentially due to the portion of earnings not paid as dividends;
- the total investment of \$2 373 million in fixed assets that, after deducting depreciation and reductions in value of \$1 154 million, raised its net value by \$1 219 million;
- retroactive adjustments relating to pay equity totalling \$1 397 million that were disbursed in March 2007.

6. Allocation of the annual surplus

Consolidated budget balance

The Gouvernement du Québec adopted legislation to maintain a strict budget balance yet allowing some flexibility in order to deal with important events that might affect financial balances.

To do so, virtually the entire \$1 993-million annual surplus presented as at March 31, 2007 was allocated to the Generations Fund and the reserve.

Consequently, the consolidated budget balance after the amount allocated to the Generations Fund and the reserve is \$109 million.

Consolidated budget balance (in millions of dollars)

	2007		2006
	Budget	Actual data	Actual data
Annual surplus	74	1 993	37
Revenue of the Generations Fund	(74)	(584)	--
Allocation to the reserve	--	(1 300)	--
Consolidated budget balance after amounts allocated to the Generations Fund and the reserve	--	109	37

6. Allocation of the annual surplus (cont'd)

Generations Fund

In the March 2006 Budget, the Government estimated Generations Fund revenue at \$74 million in 2006-2007. Given an additional payment of \$500 million from the earnings of Hydro-Québec's sale of its share in Transelec Chile, the amounts accumulated in the Fund reached \$584 million at March 31, 2007.

Revenue of the Generations Fund at the end of fiscal 2006-2007 breaks down as follows:

Revenue⁽¹⁾ (in millions of dollars)

	2007	
	Budget	Actual results
Own-source revenue		
Water-power royalties	73	76
Unclaimed property	--	5
Investment income		
Revenue from participation deposits	1	2
Revenue from demand deposits	--	1
Total own-source revenue	74	84
Revenue allocated by the Government		
Revenue from the sale of Hydro-Québec's share in Transelec Chile	--	500
Revenue	74	584

(1) No comparative data are presented since the Generations Fund became operational on January 1, 2007.

6. Allocation of the annual surplus (cont'd)

Reserve

Under the *Act to establish a budgetary surplus reserve fund (R.S.Q., c. R-25.1)*, the Government set up a reserve to finance fixed assets projects and other projects to be completed within a fixed period of time. However, when the Government believes that it is in the public interest to do so, it can use the reserve for projects other than those for which it was created. Further, the Government may allocate all or part of the reserve maintaining a balanced budget.

In the Budget Speech, the Minister of Finance determines the portion of the surplus for the fiscal year exceeding the budgetary objective to be allocated to the reserve and the amounts to be allocated to the different components.

In the *2007-2008 Budget Speech*, the Minister announced that a \$1 300 million surplus of revenue over expenditure was allocated to the reserve.

In 2007-2008, the Government intends to pay an additional \$200 million into the Generations Fund from the amounts allocated to the budgetary reserve in 2006-2007. The reserve balance, i.e. \$1 100 million, is slated for use to maintain a balanced budget in 2008-2009

Reserve

(in millions of dollars)

	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Opening balance	--	--	--	--
Allocation to the reserve	200	1 100	1 300	--
Closing balance	<u>200</u>	<u>1 100</u>	<u>1 300</u>	<u>--</u>

7. Results of the indicator analysis

The financial indicator analysis shows that the state of the Government's finances has improved since 1997-1998. Indeed, the indicators reveal that the Government's ability to meet its commitments is greater than before. Moreover, the financial risk management policy has made the Government less vulnerable to foreign exchange rate fluctuations on financial markets.

Indicator 1: Debt representing accumulated deficits to gross domestic product (GDP)

The indicator of the debt representing accumulated deficits of the government to GDP illustrates the degree of indebtedness in relation to the portion of the net debt relating to the accumulation of deficits over prior fiscal years of the government.

Since 1998, the indicator of the debt representing accumulated deficits to GDP has consistently improved, from 43.8% as at March 31, 1998 to 33.6% as at March 31, 2006. After the accounting reform, it stands at 33.9% as at March 31, 2007. This reduction in the weight of the debt in the economy stems from the fact that a balanced budget was maintained in a context of sustained economic growth over that period.

DEBT REPRESENTING ACCUMULATED DEFICITS ⁽¹⁾ (as a % of GDP)

(1) Prior to the allocation of the amounts to the reserve.

(2) After taking the net results of the Generations Fund into account.

7. Results of the indicator analysis (cont'd)

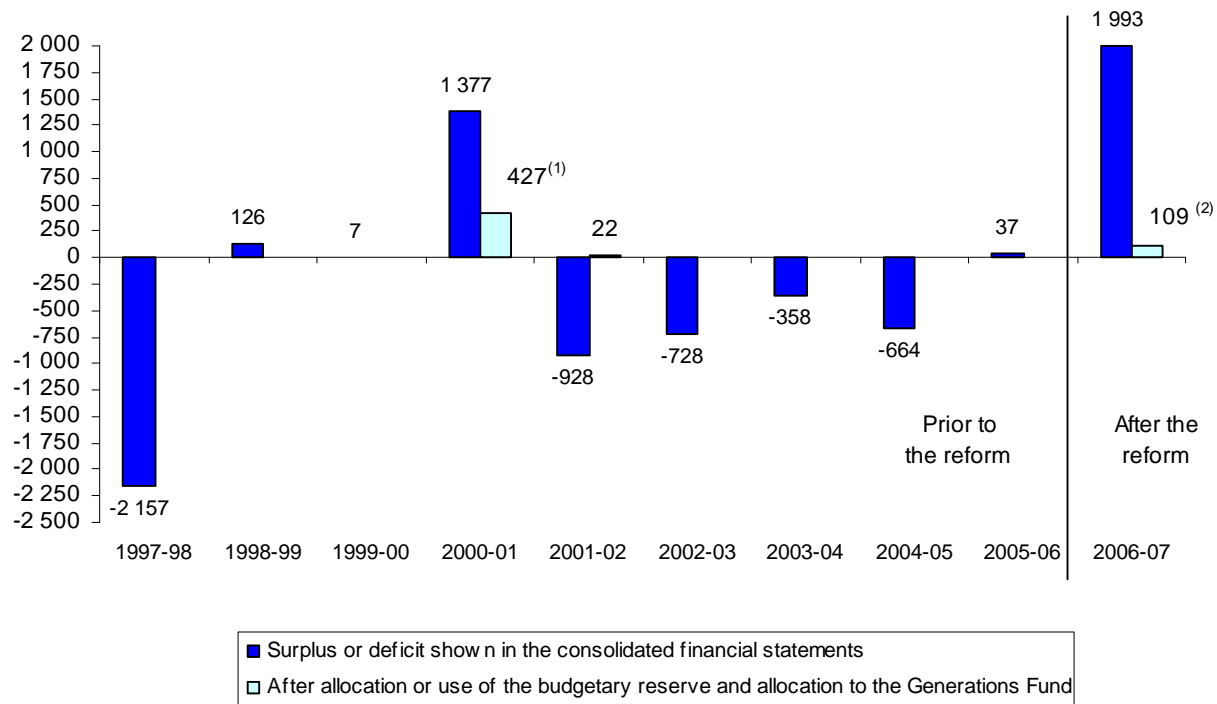

Indicator 2: Change in consolidated budget balance

The consolidated budget balance represents the difference between consolidated budgetary revenue and expenditure. The change in the consolidated budget balance shows the extent to which the Government is able to meet its annual financial obligations from its revenue (own-source revenue and federal transfers). It also shows the extent to which the Government can meet its balanced budget forecasts.

In keeping with the commitment it made by adopting the *Act respecting the elimination of the deficit and a balanced budget (R.S.Q. c. E-4.01)*, now called the *Balanced Budget Act (R.S.Q., c. E-12.00001)*, the Government is targeting a balanced budget. Indeed, the deficits posted from 2001-2002 to 2004-2005 offset the budgetary surplus achieved in 2000-2001. It should be noted that Section 9 of the Act stipulates that "if the Government achieves a surplus in a fiscal year, it may incur overruns in subsequent fiscal years up to the amount of that surplus." For 2006-2007, the Government posted a \$109-million surplus, after allocations to the Generations Fund and the reserve.

CONSOLIDATED BUDGET BALANCE

(in millions of dollars)

(1) An amount of \$950 million was posted to the budgetary reserve in 2000-2001 and was used in full in 2001-2002.

(2) An amount of \$1 300 million was posted to the budgetary reserve in 2006-2007 and \$584 million was allocated to the Generations Fund.

7. Results of the indicator analysis (cont'd)

Indicator 3: Debt service to total revenue

The debt service to total revenue indicator measures the Government's ability to cover the cost of its borrowings from its revenue as a whole. It shows the extent to which the borrowings contracted limit the Government's ability to meet its commitments.

As at March 31, 1998, debt service represented 17.7% of total revenue, compared with 12.1% as at March 31, 2007. This represents a decrease of close to a third of the ratio within the space of nine years.

DEBT SERVICE ⁽¹⁾

(as a % of total revenue)

(1) Does not include the debt service of entities of the health and social services and the education networks. Instead, transfers to cover these costs are included in program spending.

(2) For 2006-2007, the accounting reform has caused an increase in debt service of \$264 million and in total revenue of \$609 million. Without these impacts, the ratio would have been 11.8%.

7. Results of the indicator analysis (cont'd)

Indicator 4: Own-source revenue to GDP

The own-source revenue to GDP indicator measures the proportion of collective wealth that the Government collects in the form of income tax and other taxes and of other revenue derived from its enterprises in particular. The Government's own-source revenue includes all revenue apart from transfers received from the Government of Canada.

It can be noted that this ratio dropped steadily from 1998-1999 to 2001-2002, from 19.2% of GDP to 17.5% respectively. The indicator remained stable from 2001-2002 to 2005-2006. The increase in the ratio to 18.8% in 2006-2007 is due in large part to Hydro-Québec's additional profits, resulting from the sale of investments in enterprises.

OWN-SOURCE REVENUE

(as a % of GDP)

(1) For 2006-2007, the accounting reform has caused an increase in own-source revenue of \$619 million. Without this impact, the ratio would have been 18.6%.

7. Results of the indicator analysis (cont'd)

Indicator 5: Program spending to GDP

The program spending to GDP indicator reveals the relative importance of the cost of public services in the economy.

Program spending as a percentage of GDP fell from 18.9% in 1998-1999 to 18.3% in 2006-2007. This means that the size of the Government has decreased in relation to collective wealth as a whole.

PROGRAM SPENDING

(as a % of GDP)

(1) For 2006-2007, the accounting reform has caused a decrease in program spending of \$93 million. This impact is not sufficiently significant to cause the ratio shown to vary.

7. Results of the indicator analysis (cont'd)

Indicator 6: Transfers received from the Federal Government to total revenue

Transfers received from the Federal Government comprise equalization payments, payments from transfers for health care and for post-secondary education and other social programs, and amounts transferred by the federal government under various cost-sharing agreements. This indicator measures the portion of the Québec Government's revenue that is received from the Federal Government.

In 1999-2000, the proportion of federal transfers in total revenue was 13.9%, an historic low compared with the proportion of nearly 29% observed in 1983-1984. In 2000-2001 and 2001-2002, the proportion grew substantially, to 18.9%. Since then it has remained fairly stable, standing at 18.4% in 2006-2007.

FEDERAL TRANSFERS

(as a % of total revenue)

(1) For 2006-2007, the accounting reform has caused a decrease in federal transfers of \$10 million and an increase in total revenue of \$609 million. Without these impacts, the ratio would have been 18.5%.

7. Results of the indicator analysis (cont'd)

Indicator 7: Debt in foreign currency as at March 31

The debt in foreign currency indicator as a percentage of debt aims to highlight the Government's vulnerability to fluctuations in the Canadian dollar.

Since 1998, the proportion of the debt denominated in foreign currencies has fallen sharply, from 21.7% as at March 31, 1998 to 8.0% as at March 31, 2006. After the accounting reform, it stands at 6.1% as at March 31, 2007. This decrease makes the Government less vulnerable to fluctuations in the Canadian dollar in relation to other currencies.

DEBT IN FOREIGN CURRENCY AS AT MARCH 31 ^{(1) (2)}

(as a % of debt)

(1) Including borrowings made in advance and excluding the balance of deferred exchange losses (gains) and after taking into account financial instruments used by the government in managing its debt.

(2) Before the reform, the debt in foreign currencies is shown compared to the total debt, whereas after the reform, it is shown compared to the gross debt.

Financial statistics

FISCAL YEAR ENDED MARCH 31, 2007

(in millions of dollars)

This table presents the trends observed over the past ten years for several financial statement items. In addition, explanatory notes identify the changes made to previous financial statements.

1997-1998	41 548	43 705	(2 157)	98 385	(88 597) ⁽²⁾	6 016	(82 581)

* Certain figures were reclassified for consistency with the presentation adopted in 2006-2007.

** Caution must be applied in comparing the data for 2006-2007 with those of prior years because of the impact of the accounting reform.

(\$M: millions of dollars)

- (1) Net debt represents total liabilities minus financial assets, recorded in the consolidated statement of financial position.
- (2) The net debt of (\$64 833 M) as at April 1, 1997 was increased by (\$21 607 M), including (\$13 173 M) for the recording of unrecorded pension plan obligations, (\$6 889 M) for the consolidation of Government enterprises, agencies and special funds, (\$731 M) for the change to the method used to record borrowings, (\$461 M) for the recording of public sector restructuring measures and (\$353 M) for the recording of fixed assets.
- (3) The net debt was increased by (\$339 M), including (\$217 M) for fixed assets, (\$25 M) for accounts payable and accrued expenses and (\$97 M) for other accounts.
- (4) The net debt was increased by (\$359 M) for fixed assets.
- (5) The net debt was increased by (\$423 M), including (\$473 M) for fixed assets, (\$12 M) for sick leave and vacations and \$62 M for investments in Government enterprises.
- (6) The net debt was increased by (\$1 386 M), including (\$1 068 M) for fixed assets, \$88 M for the Government's share of enterprises' foreign exchange gains or losses, (\$215 M) for the correction of the error made by the Canada Customs and Revenue Agency, (\$65 M) for the change in the accounting policy for certain recoveries and (\$126 M) for the recording of employer contributions in respect of obligations relating to sick leave and vacations, for the change in the status of a Government enterprise and for costs related to the improvement of premises. In addition, accounting changes made by Government enterprises increased the net debt by (\$2 250 M), including (\$1 338 M) for foreign currency translation and (\$912 M) for the introduction of a provision for deviations in the real rate of return.
- (7) The net debt was increased by (\$1 714 M), including (\$1 482 M) for fixed assets, (\$122 M) for the Government's share of enterprises' foreign exchange gains or losses and (\$110 M) for a change in the application of the accounting policy for debts and an adjustment to the accounts receivable of a consolidated agency. In addition, accounting changes made by Government enterprises increased the net debt by (\$387 M), including (\$363 M) relating to the capping mechanism used in calculating deferred foreign exchange gains and losses on the basis of the real rate of return assumption.
- (8) The net debt was increased by (\$1 059 M), including (\$1 019 M) for fixed assets and (\$40 M) for the Government's share of enterprises' foreign exchange gains or losses. In addition, a correction of the allowance for sick leave and vacations made by a Government enterprise increased the net debt by (\$7 M).

Financial statistics (cont'd)

- (9) The net debt was increased by (\$1 353 M), including (\$1 083 M) for fixed assets, (\$126 M) following a reassessment of subsidies for school boards, (\$147 M) for a correction to the allowance for doubtful accounts and \$3 M for the Government's share of enterprises' foreign exchange gains or losses.
- (10) The net debt was increased by (\$5 678 M), including (\$1 166 M) for fixed assets, (\$3 384 M) for the change in the accounting policy for revenue from Federal Government transfers, (\$270 M) for a change in the application of the accounting policy for the allowance for losses on guaranteed financial initiatives, (\$264 M) following the new actuarial valuations of the pension plans, (\$552 M) for the change in the recording of revenue from registration fees, (\$41 M) for the harmonization of the accounting policies of consolidated organizations and \$24 M for the Government's share of the translation adjustments of Government enterprises. Restatements by Government enterprises raised the net debt by (\$25 M).
- (11) The net debt has risen by (\$19 501 M), i.e. (\$1 219 M) for fixed assets, (\$10 M) for inventories and prepaid expenses, (\$1 002 M) in net investment in the health and social services and the education networks, \$841 M for the change to the accounting practice concerning the recognition of financial instruments in the adjustments made by government enterprises, (\$468 M) for the change to the accounting practice concerning obligations arising from the rehabilitation of contaminated land recorded as an environmental liability and (\$17 643 M) for adjustments resulting from the accounting reform. These adjustments are distributed as follows: (\$6 426 M) for accumulated deficits (see note 3 to the financial statements), (\$2 184 M) for fixed assets, (\$152 M) for inventories and prepaid expenses and (\$8 881 M) in net investment in the health and social services and the education networks.
- (12) Does not take the budgetary reserve of (\$950 M) into account.
- (13) \$1 300 M was posted to the budgetary reserve and \$584 M was allocated to the Generations Fund.

CONSOLIDATED FINANCIAL STATEMENTS

Statement of responsibility

The Government is responsible for the integrity and objectivity of the consolidated financial statements prepared by the Comptroller of Finance for the Minister of Finance in accordance with the *Financial Administration Act* (R.S.Q., c. A-6.001, s. 86). The analysis of the financial statements contained in Volume 1 was also prepared by the Québec government.

To fulfil its accounting and financial reporting responsibilities, the Government maintains systems of financial management and internal control designed to provide reasonable assurance that transactions are duly authorized by Parliament and properly executed and recorded.

The Comptroller of Finance takes care of Government accounting and obtains all the information needed to meet its accounting requirements from Government departments, agencies, enterprises and funds.

The Government submits its consolidated financial statements for audit assurance to the Auditor General who, in his report to the National Assembly, states the nature and scope of his audit as well as his opinion.

The financial statements are part of the Public Accounts tabled annually in the National Assembly by the Minister of Finance.

On behalf of the Gouvernement du Québec,

Jean Houde
Deputy Minister of Finance

Carole Boisvert, CA
Comptroller of Finance

Québec, November 29, 2007

Auditor General's report

To the National Assembly,

I have audited the consolidated statement of the financial position of the Government of Québec as at March 31, 2007 as well as the consolidated statements of operations, accumulated deficit, change in the net debt and cash flows of the fiscal year ended on that date. The Minister of Finance is responsible for the preparation of these financial statements. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the government, as well as evaluating the overall financial statement presentation.

In my opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Government of Québec as at March 31, 2007 as well as the results of its activities, the changes in its accumulated deficits, its net debt and its cash flows for the fiscal year then ended in accordance with Canadian generally accepted accounting principles.

In other respects, as required by the *Auditor General Act*, I express the opinion that these consolidated financial statements present fairly, in all material respects, the financial position of the Government of Québec as at March 31, 2007 and the results of its activities, the changes in its accumulated deficits, its net debt and its cash flows for the fiscal year then ended in accordance with the accounting policies of the Government of Québec set out in note 1 of the consolidated financial statements. Moreover, in accordance with that Act, I report that, in my opinion, except for the retroactive application, without adjusting the figures of the previous year, of the changes to the accounting policies explained in note 3, these accounting policies have been applied on a basis consistent with that of the preceding fiscal year.

Auditor General's report (cont'd)

Other information and comments on the financial statements and on this report are presented in my special report to the National Assembly concerning the audit of the consolidated financial statements of the Government of Québec for the fiscal year ended on March 31, 2007.

A handwritten signature in black ink, reading "Renaud Lachance". The signature is written in a cursive style with a large initial 'R'.

Renaud Lachance, CA
Auditor General of Québec

Québec, November 29, 2007

Consolidated statement of operations
FISCAL YEAR ENDED MARCH 31, 2007
(in millions of dollars)

Appendix	2007		2006 ⁽²⁾
	Budget ⁽¹⁾	Actual results	Actual results
6	REVENUE

Notes to financial statements

1. Significant accounting policies

The Gouvernement du Québec accounts for its financial transactions in accordance with the accounting policies disclosed below. When necessary, the information included in the consolidated financial statements is based on best estimates and judgments.

Reporting entity

The Government's reporting entity encompasses the financial transactions of the National Assembly, persons designated by the National Assembly, departments as well as the agencies, funds and enterprises under the control of the Government. Control is defined as the power to direct the financial and administrative policies of an entity such that its activities will provide the Government with anticipated benefits or expose it to the risk of loss. The entities of the Government's reporting entity are listed in appendices 1 to 4 of the consolidated financial statements.

Fiduciary transactions carried out by the entities mentioned in Appendix 5 are not included in the Government's reporting entity.

Consolidation method

The accounts of the Consolidated Revenue Fund and the other entities included in the Government's reporting entity, with the exception of Government enterprises and organizations of the health and social services and the education networks, are consolidated line by line in the financial statements. Accordingly, the accounts are harmonized according to the Government's accounting policies and combined line by line. Inter-organization transactions and balances have been eliminated.

Investment in Government enterprises is accounted for using the modified equity method. According to this method, investments are recorded at cost, which is adjusted annually by the Government's share in the results of these enterprises with an offsetting entry to revenue, and in the other items of their comprehensive income with an opposite entry to accumulated deficits. The value of the investment is reduced by declared dividends and adjusted by the elimination of unrealized inter-organization gains and losses relating to transactions on assets that remain within the Government reporting entity. This method requires no harmonization of enterprises' accounting policies with those of the Government. A Government enterprise has all of the following characteristics:

- a) it is a separate legal entity that has the authority to enter into contracts in its own name and to go before a court;

1. Significant accounting policies (cont'd)

- b) it is vested with the financial and administrative power to carry out commercial activities;
- c) its main activity is the sale of goods or the delivery of services to individuals or to organizations not included in the Government's reporting entity;
- d) it may, during the normal course of its operations, pursue its activities and settle its debts using revenue from sources not included in the Government's reporting entity.

The accounts of organizations of the health and social services and the education networks are accounted for using the modified equity method. This consolidation is carried out on the basis of the financial statements of the organizations, after adjustments to eliminate material differences between their accounting policies and those of the Government, in particular concerning fixed assets. According to this method, the net equity of these organizations, representing the total of their financial and non-financial assets reduced by their liabilities, is recognized as a component of the net investment in the health and social services and the education networks. The annual surplus or deficit of organizations is recognized in the expenditures of the mission concerned. Where the fiscal year-end of an organization differs from that of the Government, its financial results are adjusted only if the financial transactions carried out during the interval materially affect the Government's financial position or results.

Revenue

Revenue is recorded using the accrual method, i.e. in the fiscal year during which the transactions or the events giving rise to the revenue occurred. Revenue not collected at the end of the fiscal year and refunds not yet issued are recorded on the basis of estimates established according to transactions that will take place in the three months following the end of the fiscal year. Revenue that would be too difficult to measure prior to reception is recorded at the time the funds are received. Sums received or receivable in regard to revenue that will be earned in a subsequent year are deferred and presented as deferred revenue.

More specifically:

- Revenue from income and property tax is recognized when the taxpayer earned the income subject to tax.
- Revenue from consumption taxes is recognized at the time of the sale of the products or the delivery of the services, after deducting tax credits.
- Corporate income tax revenue is recorded at the time the funds are received, because amounts receivable or refundable cannot be accurately estimated. Taxable corporate income varies

1. Significant accounting policies (cont'd)

significantly from year to year and the time allowed for filing corporate returns means that information cannot be obtained in time to make adjustments to revenue on the closing date of the Government's financial statements. An adjustment is made to account for notices of assessment issued before the end of the fiscal year.

- Tax revenue does not include estimates for amounts of unreported taxes. These amounts are recorded when assessments are issued, following audits.
- Revenues from duties and permits are recognized when receivable. Where duty or permit revenue is refundable on demand and is linked to clearly identifiable goods and services that the government must supply to the holder of the duty or the permit, the revenue is deferred and recognized over the reference period of such duty or permit.
- Transfers from the Federal Government are recorded as revenue in the fiscal year during which the events giving rise to them occur, provided the transfers were authorized, the eligibility criteria were met and it is possible to make a reasonable estimate of the amounts involved.
- Interest income ceases to be recorded when there is no reasonable assurance that the principal or interest will be recovered.

Expenditure

Expenditure includes the cost of goods consumed and services obtained during the fiscal year, including annual depreciation of the cost of fixed assets.

Transfers, whether entitlements, transfers relating to shared-cost programs or grants, are recorded in the fiscal year during which the events that give rise to them occur, insofar as the transfers have been authorized and once the beneficiaries have met the eligibility criteria. The determining factor for recognizing an entitlement is the beneficiary's satisfaction of the eligibility criteria stipulated in a law or a regulation, while for a transfer relating to a shared-cost program it is the incurring by the beneficiary of eligible costs, and for a grant it is its authorization by the Government.

Debt service interest charges resulting from transactions in foreign currency are translated into Canadian dollars at the rates in effect at the time of the transactions.

1. Significant accounting policies (cont'd)

Financial assets

Short-term investments are recorded at the lesser of cost and market value. Accounts receivable are initially recorded at cost and then brought down to their net recoverable value by means of an allowance for doubtful accounts. The annual change in this allowance is charged to expenditure.

Investment in Government enterprises is recorded using the modified equity method.

Long-term investments are recorded at cost.

For loans and other investments with concessionary terms, their face value is discounted at the average rate of Government borrowings to determine the value of the grant component, which is recognized as a transfer at the time the investments are made. The discount on loans and other investments is amortized over their lifetime using the real interest method, and recognized as interest income.

Long-term investments are reduced using valuation allowances. An allowance is recorded for loans and advances where the facts or circumstances point to a future loss. For other long-term investments, an allowance is recorded when a durable loss in value is recognized. The annual change in these allowances is charged to expenditure. Any investment write-off reduces the cost of investments as well as the valuation allowance relating to such investment. The residual balance is charged to expenditure. The subsequent recovery is recorded as a reduction in expenditure.

Generations Fund

Demand and participation deposits in a particular fund of the Caisse de dépôt et placement du Québec are recorded at cost.

At the time of disposition of participation deposits, the difference between the amount received and the book value of these units established using the average cost method is charged to operations. Where participation deposits suffer a durable loss in value, their book value is reduced to reflect this decline. The reduction is taken into account in the determination of the results for the fiscal year.

The revenue and expenditure of the Generations Fund are recorded according to the Government's accounting policies.

1. Significant accounting policies (cont'd)

Liabilities

Other liabilities

Allowance for losses on guaranteed financial initiatives

Obligations resulting from borrowings and other financial initiatives guaranteed by the Government are recorded on the basis of probable losses. The allowance is established on the balance of the guaranteed financial initiatives, reduced by the estimated realizable value of the security and surety obtained. The annual change in the allowance is charged to expenditure.

Probable losses are estimated by grouping financial initiatives into various risk classes and applying an average loss rate to each class, based on past experience and the nature of the initiatives. In the case of enterprises with an exceptionally high cumulative balance of financial initiatives guaranteed by the Government or with particular features, the estimate of probable losses relating to these initiatives is made using a case-by-case analysis, regardless of risk class. Probable losses are revised annually.

Environmental liability

The obligations resulting from the remediation of contaminated land under the Government's responsibility, or probably under its responsibility, are recorded as environmental liabilities as soon as contamination occurs or as soon as the Government is informed. An environmental liability includes the estimated cost of contaminated land management and remediation. The remediation cost evaluation is based on the best information available and is revised annually.

Given the difficulties inherent in evaluating this liability, the Government's obligations, which will be recognized until March 31, 2010 for contaminated land existing as at March 31, 2006, will be posted to accumulated deficit.

Pension Plans and other future social benefits

Pension Plans

Government pension plans are defined benefit pension plans. Within the context of preparing the Government's financial statements, obligations relating to vested benefits are evaluated using the actuarial projected benefit method prorated on service, according to the most probable assumptions set by the Government with regard, notably, to inflation, interest and employee remuneration. This method has been adjusted, however, to reflect the way in which benefits are earned by employees.

1. Significant accounting policies (cont'd)

Total cost of plans

The annual cost of vested benefits for all pension plans, including the cost of changes to the plans, and the amortization of adjustments to estimates based on actuarial gains or losses, is charged to expenditure, with an offsetting entry in the retirement plans account, i.e. pension plan liability. Changes to actuarial assumptions are included in the adjustments to estimates based on actuarial gains or losses.

In the case of the Government and Public Employees Retirement Plan (RREGOP), the Pension Plan of Management Personnel (PPMP), the Civil Service Superannuation Plan (CSSP), the Teachers Pension Plan (TPP), the Pension Plan of Certain Teachers (PPCT) and transfers from the TPP and the CSSP to RREGOP and the PPMP, adjustments to estimates based on actuarial gains or losses are amortized using the straight-line method over a period corresponding to the estimated average remaining years of service of participants in these plans as a whole. However, adjustments to estimates based on actuarial gains or losses for the other pension plans are amortized over a period corresponding to the estimated average remaining years of service of participants in each plan.

The total cost of the pension plans also includes interest charges on obligations relating to vested benefits, with an offsetting entry to liabilities in the retirement plans account.

Retirement Plans Sinking Fund (RPSF)

Under the *Financial Administration Act (R.S.Q., c. A-6.001)*, the Minister of Finance may make long-term investments, by way of a deposit with the Caisse de dépôt et placement du Québec, using part of the Consolidated Revenue Fund up to an amount equal to the sums recorded as the pension plans liability, in order to create a sinking fund to provide for the payment of all or part of the benefits awarded under these plans. The sinking fund's investments are valued at an adjusted market value, where the difference between the real return based on market value and the forecast return is amortized over five years.

The annual income of the sinking fund is obtained by applying the rate of return stipulated in the actuarial valuations of the retirement plans to the fund balance. The adjustments recognized annually, arising from actuarial gains and losses attributable to the use of the stipulated rate of return, are amortized using the straight-line method over the estimated average length of the remaining active career of retirement plans participants. The amortization of these adjustments is recorded as investment income of the fund.

The RPSF's investment income is subtracted in calculating interest charges on obligations relating to vested benefits.

1. Significant accounting policies (cont'd)

Other future social benefits

The long-term obligations arising from other social benefits granted to employees are valued using actuarial methods, according to the most likely assumptions determined by the Government. The resulting obligations and corresponding expenditures are recorded on the basis of the acquisition method of these social benefits by employees, i.e. either based on services provided or on the occurrence of the event giving rise to this employment-related benefit.

The cost of these social benefits acquired during the year, the cost of changes to the provisions of these social benefits, the amortization of adjustments relating to estimates arising from actuarial gains and losses and the interest charges on these obligations are charged to expenditure of the fiscal year with an offset to the “Other future social benefits” account.

Any fund set up to provide for the payment of obligations relating to these other future social benefits and the revenue arising from it are accounted for on the basis of the same accounting policies as the RPSF, with the necessary adjustments if needed.

Debts

Borrowings are recorded at the amount received at the time of issue, adjusted by the premium or discount amortization to obtain the amount of principal repayable at maturity. The amortization is calculated using the effective rate for each borrowing.

Issue expenses related to borrowings are deferred and amortized over the term of each borrowing using the straight-line method. The unamortized balance is included in deferred expenses related to debts.

Borrowings in foreign currency are translated into Canadian dollars at the rates in effect on March 31.

Foreign exchange gains or losses resulting from the translation of borrowings are deferred and amortized over the remaining term of each borrowing using the straight-line method.

Derivative instruments

The Government uses derivative instruments to manage foreign exchange and interest rate risks related to debts. These instruments are recorded at cost.

1. Significant accounting policies (cont'd)

Derivative instruments used to manage the foreign exchange risk associated with the repayment of interest and principal on borrowings and with the cash management transactions such risk management entails, including currency swap contracts and foreign exchange forward contracts, are translated into Canadian dollars at the rates in effect on March 31. The components of these instruments, namely, financial assets and liabilities, are offset against one another and shown as "Debts" items.

Interest rate exchanges stemming from interest rate swap contracts used to change exposure to interest rate risk over the long term are reconciled with interest charges for the borrowings with which these swap contracts are associated.

Gains or losses on derivative instruments are deferred and amortized over the term of each contract.

Debt Sinking Fund

Securities held by the sinking fund are recorded at the amount paid at the time of purchase, adjusted by the premium or discount amortization to obtain the amount of principal receivable at maturity. The amortization is calculated on the basis of the effective rate for each security.

The difference between the book value of a security and the amount received at the time of its disposal is charged to results.

Non-financial assets

Land in the public domain and natural resources, such as forests, water and mining resources, which the Government holds by virtue of the fact that they were devolved to the state and not purchased, are not recorded in the Government's consolidated financial statements. Intangible items do not constitute non-financial assets for the Government.

Fixed assets

Fixed assets consist of acquired, built, developed or improved non-financial assets, whose useful life extends beyond the fiscal year and which are intended to be used on an ongoing basis for producing goods or delivering services.

They include land, buildings, facilities such as parks and outdoor recreational areas, complex networks such as dams, canals, roads and bridges, equipment such as vehicles and furniture and the development of data processing systems.

1. Significant accounting policies (cont'd)

Fixed assets are recorded at cost and depreciated – except for land, which is not depreciated - using a logical and systematic method over a period corresponding to their useful life. Cost includes financing charges capitalized during their construction, improvement or development. The cost of fixed assets held under capital leases is equal to the present value of payments due. Fixed assets under construction or being developed are not depreciated until they are put into service.

Works of art and historic property are not recorded as fixed assets. Their cost is charged to expenditure for the fiscal year during which they are acquired.

Fixed assets acquired through donation or for a nominal fee are recorded at their fair value at the time of acquisition with an offsetting entry to deferred revenue, except for land where the offsetting entry is recognized in revenue for the year of acquisition. Contributions for the acquisition of fixed assets, received from organizations outside the reporting entity, are recorded in deferred revenue, with the exception of those intended for the purchase of land, which are recorded in revenue in the year of acquisition. Deferred revenue is amortized in revenue at the same rate as the depreciation of the cost of the corresponding fixed assets.

Net investment in the health and social services and the education networks

The net investment in the health and social services and the education networks includes the net equity of the organizations of these networks included in the reporting entity, advances made to them by the Government and the sinking funds relating to their borrowings to finance fixed assets. Net equity is recorded using the modified equity method described in the “Consolidation method” section, while advances and sinking funds are recorded according to the accounting practice for long-term investments.

Inventories

Inventories consist of supplies that are consumed in the normal course of operations during the coming fiscal year(s). These inventories are valued at the lower of cost and net realizable value. Inventories intended for sale are presented as financial assets.

Prepaid expenses

Prepaid expenses represent outlays made before the end of the fiscal year for services the Government will receive during the coming fiscal year(s). These expenses are charged to expenditure when the Government receives the services acquired.

2. Measurement uncertainty

In preparing its financial statements, the Government must deal with the uncertainty inherent in measuring some of the items recognized or presented in the financial statements. The value of these elements is determined using estimates based on various assumptions.

The estimates are in turn based on the most reliable data available at the time the financial statements are prepared. They are adjusted annually according to new data that become available.

Estimates are used in particular for amounts receivable or refundable relating to income and property tax and consumption taxes established using the accrual accounting method, obligations of the retirement plans and other social benefits valued using actuarial methods, the useful life of fixed assets, environmental liabilities and allowance for doubtful accounts of debtors, valuation allowances on investments, losses on guaranteed financial initiatives and losses resulting from lawsuits and claims against the Government.

3. Accounting changes

Changes to accounting policies

As part of the 2006-2007 accounting reform and the measure announced in the *2007-2008 Budget*, many Government accounting policies have been changed to comply with generally accepted accounting principles in Canada for the public sector in effect in 2006-2007

The main changes concern the following:

Reporting entity and consolidation method

The criterion for inclusion in the Government reporting entity is now based on the control exercised by the Government. Consequently, the Government reporting entity now includes the vast majority of organizations of the Government's health and social services and the education networks. These entities are included on the basis of the modified equity method. Their net assets are recognized as non-financial assets in the new item "Net investment in the health and social services and the education networks".

Revenue

All revenue from income and property taxes, consumption taxes and duties and permits is now recorded using the accrual accounting method. Previously, some of these revenue were recognized on the basis of the amounts received, with adjustments to reflect assessments and accounts issued before the end of the fiscal year.

Expenditure

The factors determining the time when transfer expenditures are recognized, according to the type of transfer, have been specified in the accounting policies. This implies a reassessment of when the expenditure is recognized.

Long-term investments

The grant portion arising from the concessionary terms allowed on investments and loans to third parties is now recorded as a transfer expenditure.

3. Accounting changes (cont'd)

Other liabilities

Obligations arising from the remediation of contaminated land under the Government's responsibility, or likely to come under its responsibility, are now recorded as an environmental liability as soon as the contamination occurs or once the Government is informed. Previously, only the cost of the remediation work completed but unpaid was recorded as a liability.

The allowance for losses on guaranteed financial initiatives is now based on the remaining balance of such initiatives, whereas previously it was calculated on the authorized amount at the time of authorization.

Retirement plans and other future social benefits

The annual income of the Retirement Plans Sinking Fund is now calculated on the adjusted market value of the investments. Previously, it was based on the book value of the fund. In addition, actuarial gains and losses to be amortized relating to the return on the fund are recognized on an annual basis, rather than being determined only every three years at the time of the actuarial valuation.

The allowance for sick leave is now determined on the basis of an actuarial method, whereas previously it was based on the cost of unused sick days accumulated by employees.

Actuarial gains and losses relating to the accounting for the survivor pension plan are now amortized over remaining life expectancy of the beneficiaries rather than being amortized over five years. In addition, the annual income of the assets is now determined on the basis of the rate of return stipulated in the actuarial valuations rather than being based on the return achieved during the fiscal year.

Debts

Exchange gains and losses on short-term foreign exchange contracts are now recognized over the life of these contracts rather than the remaining life of the portfolio of borrowings in the currency concerned.

Inventories and prepaid expenses

Inventories and prepaid expenses are now recognized as Government non-financial assets and charged to expenditure of the fiscal year in which the goods are consumed and the services received. Previously, these costs were charged to expenditure at the time the goods and services were acquired. In addition, inventories intended for sale are now recognized as a financial asset rather than being charged to expenditure upon acquisition.

3. Accounting changes (cont'd)

Other accounting changes

In addition, the accounting reform has given rise to certain other adjustments.

The main adjustments concern the line-by-line consolidation of certain organizations, which previously were recorded using the modified equity method as investments in Government enterprises. This change stems chiefly from the inclusion in the Government reporting entity of organizations of the health and social services and the education networks.

The effect of all these accounting changes on transactions prior to March 31, 2006 has been recognized retroactively, as at April 1, 2006, as adjustments in the statement of accumulated deficits for the fiscal year ended March 31, 2007.

However, the comparative figures for the fiscal year ended March 31, 2006 have not been restated to reflect these changes since the effort required to obtain the financial information needed to do so would be unreasonable.

3. Accounting changes (cont'd)

	As at March 31, 2007										
				Liabilities			Net debt			Accumulated deficits as at April 1, 2006	
	Revenue	Expenditure	Surplus	Financial assets	Debt	Other liabilities	Accumulated deficits	Net investment in the networks	Fixed assets		Other non-financial assets

(1) Including debt offsets amounting to \$2 946 million as at April 1, 2006 of the Financing Fund for the funding of advances to the Corporation d'hébergement du Québec (\$1 916 million) and to Financement-Québec (\$1 030 million).

4. Income and property taxes

According to applicable legislation, revenue from income and property taxes is recorded after deducting the following amounts:

	<u>2007</u>	<u>2006</u>
	(in millions of dollars)	
Personal income tax		
Refundable tax credits		
Child Support Program	2 112	2 030
Sales tax	495	486
Day care expenses	161	177
Home-support services for seniors	127	97
New graduates working in remote resource regions	8	75
Work premium	355	77
Other	114	82
Property tax refunds	276	252
	<u>3 648</u>	<u>3 276</u>
Corporate taxes		
Refundable tax credits		
Scientific research and experimental development	729	609
Cinematographic productions	90	94
Reporting of tips	46	48
Salaries paid to employees working in the Cité du commerce électronique	56	88
Job creation in a designated region	91	61
Credit for corporations established in the Cité du multimédia	41	41
Other	338	268
	<u>1 391</u>	<u>1 209</u>
	<u>5 039</u>	<u>4 485</u>

5. Duties and permits

According to applicable legislation, duties and permits are recorded after deducting the following amounts:

	<u>2007</u>	<u>2006</u>
	(in millions of dollars)	
Gross revenue	1 841	1 756
Deductions		
Silvicultural work and other forest management activities	187	188
Highway carrier monitoring	--	56
Other	13	6
	<u>200</u>	<u>250</u>
Net revenue	<u>1 641</u>	<u>1 506</u>

6. Transfers from the Federal Government to be repaid

	<u>2007</u>	<u>2006</u>
	(in millions of dollars)	
Federal Government transfers		
Equalization and Canada Health and Social Transfer ⁽¹⁾	2 271	2 640
Other programs	247	317
	<u>2 518</u>	<u>2 957</u>

(1) Including a balance of \$2 140 million on an original amount of \$2 377 million to be repaid over 10 years as of 2006-2007, in regard to the measures adopted by the Federal Government to mitigate the decrease in transfers in 2003-2004 and 2004-2005. Also including a balance of \$131 million on an original amount of \$656 million to be repaid in 2007-2008, in regard to a change made by the Federal Government in February 2002 to the method for measuring the provinces' fiscal capacity with respect to property tax.

7. Pension plans and other future social benefits

Liability regarding retirement plans and other future social benefits

	Actuarial obligations relating to vested benefits	Adjust- ments	Liability as at March 31, 2007	Liability as at March 31, 2006
	(in millions of dollars)			
Pension plans	64 627	(4 906)	59 721	57 193
Retirement Plans Sinking Fund	(26 569)	(308)	(26 877)	(22 563)
	38 058	(5 214)	32 844	34 630

	38 807	(5 211)	33 596	35 422

Pension plans

The Gouvernement du Québec contributes to several pension plans for its employees. Employees of the public and parapublic sectors, the Members of the National Assembly and the judges of the Court of Québec participate in these plans.

	Estimated number of participants as at December 31, 2006	Number of beneficiaries as at December 31, 2006
Government and Public Employees Retirement Plan (RREGOP)	485 000	146 953
Pension Plan of Management Personnel (PPMP)	26 150	17 595
Teachers Pension Plan and Pension Plan of Certain Teachers (TPP and PPCT)	825 *	49 037 *
Civil Service Superannuation Plan (CSSP)	950 *	23 974 *
Superannuation Plan for the Members of the Sûreté du Québec (SPMSQ)	5 200	4 269
Pension Plan of Peace Officers in Correctional Services (PPPOCS)	3 100	1 268
Pension Plan of the Judges of the Court of Québec (PPJCO)	270	314
Pension Plan for Federal Employees Transferred to Employment with the Gouvernement du Québec (PPFEQ)	245	100
Pension Plan of the Members of the National Assembly (PPMNA)	123	297
	521 863	243 807

* These plans have not admitted any new participants since July 1, 1973.

7. Pension plans and other future social benefits (cont'd)

These plans are “defined benefit” pension plans, which means that they guarantee participants a set income upon retirement, calculated on the basis of participants’ average income for the best paid years, generally five, and their number of years of service. The portion of benefits accrued prior to July 1, 1982 is usually indexed to the cost of living, while those accrued after that date are partially indexed.

There are two types of pension plans: — cost-sharing pension plans;
— cost-balance pension plans.

Cost-sharing pension plans

In the case of RREGOP and the PPMP, the Government covers costs at a rate of 50% for years of service since July 1, 1982 and 58.33% (7/12) for years of service prior to July 1, 1982. The contributions of participants and independent employers are remitted to the Caisse de dépôt et placement du Québec.

In the case of the PPPOCS, the Government covers 46% of costs, while employees cover 54%. Employee contributions are paid into the Consolidated Revenue Fund.

In the case of the SPMSQ, the Government covers 2/3 of the cost of the plan for years of service since January 1, 2007. Prior to this date, the plan was a cost-balance plan. As of January 1, 2007, the contributions of participants and employers for these years of service are paid into two separate funds with the Caisse de dépôt et placement du Québec. The Government is not obliged to contribute on a monthly basis. Based on the actuarial valuations required by the Minister of Finance, the latter determines the contributions which might, from year to year but no later than every three years, be capitalized to reflect the Government’s commitments to this plan for years of service after December 31, 2006.

Cost-balance pension plans

Cost-balance pension plans are plans for which employers cover the difference between the cost of plans and the contributions paid by participants. This is the case for all Government plans apart from the shared-cost plans listed above.

The contributions of participants and independent employers to these cost-balance plans are paid into the Consolidated Revenue Fund. The Government covers the difference between the cost of each plan and the contributions paid by participants and independent employers.

7. Pension plans and other future social benefits (cont'd)

Value of actuarial obligations relating to vested benefits for the pension plans as a whole

The value of actuarial obligations relating to vested benefits for the pension plans as a whole for service rendered as at a given date is determined by actuaries of the Commission administrative des régimes de retraite et d'assurances (CARRA). For this purpose, they use the actuarial projected benefit method prorated on service and take into account, among other things, the most probable long-term economic assumptions.

Long-term economic assumptions:

- Yield, net of inflation	4.75%
- Inflation rate	2.75%
- Salary escalation rate, net of inflation	0.50%
- Discount rate for actuarial obligations relating to vested benefits	7.50%

Pension plans liability

The Government's liability with regard to the pension plans is recorded in conformity with the recommendations of the Canadian Institute of Chartered Accountants for public sector pension plans.

The liability recorded with respect to the pension plans is established on the basis of the value of actuarial obligations relating to vested benefits for the pension plans as a whole, taking into account certain adjustments stemming from actuarial gains or losses noted during the actuarial valuations prepared every three years and the extrapolations made between two valuations. These gains or losses are amortized using the accounting policy established for this purpose. The accumulated restatements at the end of the fiscal year correspond mainly to the unamortized balance of actuarial gains and losses and to adjustments made because of the three-month gap between the date on which actuarial obligations related to vested benefits are evaluated, i.e. December 31, and the date on which the pension plans liability is evaluated.

As shown by the following table concerning the main pension plans, the Government's liability with regard to the pension plans as a whole is estimated at \$59 721 million as at March 31, 2007, including \$37 148 million for RREGOP and the PPMP.

7. Pension plans and other future social benefits (cont'd)

	Actuarial obligations relating to vested benefits	Adjust- ments	Pension plans liability as at March 31, 2007	Pension plans liability as at March 31, 2006
	(in millions of dollars)			
RREGOP				
- regular service	30 131	(1 891)	28 240	26 063
- transferred service	2 484	(212)	2 272	2 289
PPMP				
- regular service	6 284	(754)	5 530	5 013
- transferred service	1 236	(130)	1 106	1 109
TPP and PPCT	14 736	(1 330)	13 406	13 724
CSSP	4 942	(258)	4 684	4 797
Other	4 814	(331)	4 483	4 198
Pension Plans liability	64 627	(4 906)	59 721	57 193
Sinking fund ^{(1) (2)}	(26 569) ⁽³⁾	(308)	(26 877)	(22 563)
	38 058	(5 214)	32 844	34 630

(1) During fiscal 2006-2007 the Minister of Finance made investments of \$3 000 million in the Retirement Plans Sinking Fund (\$3 000 million in 2005-2006); 1 440 million in investment income (\$1 230 million in 2005-2006) was reinvested in the sinking fund for this period.

(2) In 2006-2007, the forecast return on sinking fund assets is 6.79% (6.98% in 2005-2006); its actual return is 11.93% (14.70% in 2005-2006).

(3) The fair value of investments with the Caisse de dépôt et placement du Québec as at March 31, 2007 is \$28 859 million (\$23 042 million as at March 31, 2006).

Actuarial valuations and subsequent estimates

The value of actuarial obligations relating to vested benefits is determined on the basis of actuarial valuations and extrapolations made from them for years between two valuations.

The most recent extrapolations, which were filed and issued in 2007, were determined on the basis of actuarial valuations:

- as at December 31, 2005 for the CSSP, the TPP, RREGOP and the PPMP, other than service transferred from the TPP and the CSSP to RREGOP and the PPMP, and for the PPMP (RRAS);
- as at December 31, 2004 for the PPMNA, the PPPOCS, the PPJCQ, the PPFEQ, and the PPMP (RRAS);
- as at December 31, 2003 for the PPCT, the SPMSQ and service transferred from the TPP and the CSSP to RREGOP and the PPMP.

7. Pension plans and other future social benefits (cont'd)

Total cost of pension plans

	<u>2007</u>	<u>2006</u>
	(in millions of dollars)	
Pension costs		
Cost of vested benefits excluding interest charges	1 542	1 394
Employee contributions	(68)	(78)
Independent employer contributions	(5)	(6)
	<u>1 469</u>	<u>1 310</u>
Cost of changes	24 ⁽¹⁾	--
Amortization of adjustments to estimates based on actuarial gains or losses	382	372
	<u>1 875</u>	<u>1 682</u>
Interest on pension plans	2 643 ⁽²⁾	2 831 ⁽²⁾
Total	<u><u>4 518</u></u>	<u><u>4 513</u></u>

(1) A Superior Court ruling handed down on June 4, 2007 involves amendments to the means used to index Pension Plan for Judges of the Court of Québec pensions. Further, the *Act to amend the Act respecting the National Assembly and the Act respecting the conditions of employment and the pension plan of the Members of the National Assembly (Q.S., 2006, c. 10)* also introduced amendments to the means used to index Pension Plan for Members of the National Assembly pensions. The impacts of these amendments are \$20 million and \$4 million respectively, for a total of \$24 million as at March 31, 2007.

(2) After deducting Retirement Plans Sinking Fund investment income of \$1 440 million in 2006-2007 (\$1 230 million in 2005-2006).

Funding of pension plans

Actuarial valuations for funding purposes for regular service under "cost-sharing" pension plans (RREGOP, PPMP AND PPPOCS)

By law, CARRA actuaries are required to prepare, every three years, an actuarial valuation for funding purposes for each of the pension plans in order to determine the rates of contribution for these plans. To that end, the actuaries take legislative provisions and collective agreements into account using the valuation method agreed upon by the parties concerned and economic assumptions that are more conservative than those used to prepare valuations for accounting purposes.

According to these valuations, the Government commitment for funding purposes is calculated as the fund that the Government would have amassed had it been required to pay contributions since 1973 on the same bases as those used to determine the rate of contribution of participants. In the case of RREGOP and the PPMP, this fund was estimated at \$52 113 million at fair value and \$54 780 million at

7. Pension plans and other future social benefits (cont'd)

cost as at December 31, 2006 (\$46 164 million at fair value and \$50 165 million at cost as at December 31, 2005). In the case of the PPPOCS, for which employee contributions were paid into the Consolidated Revenue Fund, the value of the fund that would have been amassed by employees and the Government was \$921 million at cost as at December 31, 2006 (\$860 million as at December 31, 2005).

The difference between these amounts and the liability recorded for these three plans represents a non-payable amount that does not have to be recorded as a liability of the Government. A number of the Government's labour-management associations submitted an application to the Québec Superior Court requesting that it recognize that this difference constitutes a Government commitment. In July 2004, the ruling handed down by the Québec Superior Court on this application concluded that:

- in every fiscal year since 1973, the Government has disclosed, in an appropriate manner and in accordance with the standards of the Canadian Institute of Chartered Accountants, its financial commitments regarding the sharing of the cost of the Government and Public Employees Retirement Plan (RREGOP), the Pension Plan of Management Personnel (PPMP) and the Pension Plan of Peace Officers in Correctional Services (PPPOCS), as provided in the legislation concerned;
- sharing the cost of financing the pension plans concerned, namely, RREGOP, the PPMP and the PPPOCS, does not commit the Government to using the same actuarial bases as those employed to constitute the pension funds of participating employees, especially since the evidence revealed no risk of a detrimental impact on the pension wealth of each covered participating employee at any time.

The Government's labour-management associations appealed this ruling in August 2004. In January 2006, the Québec Court of Appeal suspended the appeal to allow the labour organizations of employees who participate in these plans to bring a new application before the Québec Superior Court for a declaratory judgment on this subject. An application to this effect was filed by these organizations in April 2006. Consequently, the suspension of the appeal will remain in effect until a final ruling on the new application is handed down by the Superior Court.

Other future social benefits

In addition to the retirement plans, the Government sponsors two other programs of future social benefits for its employees, namely the sick leave accumulation program and the survivor pension plan. These programs give rise to long-term obligations for the Government, which assumes the entire cost of the two programs.

7. Pension plans and other future social benefits (cont'd)

The sick leave accumulation program allows employees to accumulate the unused sick leave days they are entitled to annually and monetize them at 50% in case of termination of employment, retirement or death, up to an amount representing the equivalent of 66 days. In addition, employees can utilize these unused days as fully paid leave days for preretirement. Currently, payments under the program are not funded.

The survivor pension plan stipulates that a pension is paid to the spouse and dependent children following the death of an eligible person. The plan chiefly covers management and similar personnel in the public and parapublic sectors, accounting for 90% of the insured population. The Government pays amounts into a fund with the Caisse de dépôt et placement du Québec, dedicated specifically to the payment of benefits earned by plan beneficiaries.

Liability regarding other future social benefits

The obligations of the sick leave accumulation program accumulate as employees provide the Government with services. The value of these obligations is established using an actuarial method that allocates the cost of the program over the active career of employees. This method reflects how employees earn benefits.

For the survivor pension plan, an obligation is recognized when the death of an eligible person occurs. The value of the obligations is established using an actuarial method that determines the present value of pensions then acquired by beneficiaries.

Adjustments arising from actuarial gains and losses, recognized at the time of the actuarial valuations of the obligations of the two programs, are amortized over the estimated average remaining active career of participants in the case of the sick leave accumulation program and, in the case of the survivor pension plan, over the remaining average life expectancy of the beneficiaries. The aggregate adjustments at the end of the fiscal year mainly correspond to the unamortized balance of actuarial gains and losses.

Actuarial valuations and subsequent estimates

The value of the actuarial obligations regarding vested rights and pensions is established using actuarial valuations or extrapolations of such valuations for the years between two valuations. An actuarial valuation of the sick leave accumulation program was done as at March 31, 2006. The survivor pension plan has been established on the basis of an actuarial valuation as at December 31, 2005. For both these programs, extrapolations as at March 31, 2007, were produced.

7. Pension plans and other future social benefits (cont'd)

The value of actuarial obligations is estimated using the most likely long-term economic assumptions, as follows.

	Sick leave accumulation program	Survivor Pension Plan
- Yield, net of inflation	4.75%	4.75%
- Inflation rate	2.75 %	2.75%
- Salary escalation rate, net of inflation	0.50%	
- Discount rate for actuarial obligations relating to vested benefits	7.50 %	7.50%

Liability regarding other future social benefits

	Actuarial obligations relating to vested benefits	Adjust- ments	Liability regarding other future social benefits as at March 31, 2007	Liability regarding other future social benefits as at March 31, 2006
		(in millions of dollars)		
Sick leave accumulation program	788		788	791
Survivor Pension Plan	361	27	388	358
	1 149	27	1 176	1 149
Survivor Pension Plan Fund ^{(1) (2)}	(400) ⁽³⁾	(24)	(424)	(357)
	749	3	752	792

(1) During fiscal year 2006-2007, an amount of \$13 million (\$17 million in 2005-2006) was invested in the Survivor Pension Plan Fund; investment income of \$24 million (\$33 million in 2005-2006) was reinvested in this fund for this period. During the same period, pension benefits of \$29 million (\$28 million in 2005-2006) were paid from the amounts invested in this fund.

(2) In 2006-2007, the forecast return on assets of the Survivor Pension Plan Fund is 6.75% (6.85% in 2005-2006); its actual return is 13.61% (16.56% in 2005-2006).

(3) The fair value of investments with the Caisse de dépôt et placement du Québec as at March 31, 2007 is \$456 million (\$417 million as at March 31, 2006).

7. Pension plans and other future social benefits (cont'd)

Total cost relating to other future social benefits

	<u>2007</u>	<u>2006</u>
	(in millions of dollars)	
Cost of other future social benefits		
Cost of vested rights and pensions	63	17
Amortization of adjustments based on actuarial gains or losses	(2)	--
	<u>61</u>	<u>17</u>
Interest on account of other future social benefits	50 ⁽¹⁾	(10) ⁽¹⁾
Total	<u>111</u>	<u>7</u>

(1) After deducting \$24 million in investment income of the Survivor Pension Plan Fund in 2006-2007 (\$33 million in 2005-2006).

8. Risk management and derivative instruments

To meet the financial requirements arising from its operations for repaying maturing loans and for maintaining the desired level of liquid assets, the Government has provided itself with an annual financing and debt-management program targeting Canadian and international financial markets.

Participation in these markets involves various types of risk. Therefore, the Government devises risk-management strategies by using the different derivative instruments at its disposal.

Foreign exchange risk

Foreign exchange risk is the risk that the cash flows needed to repay the interest and principal on loans in foreign currency will vary according to market fluctuations. To manage this risk, the Government uses derivative instruments such as currency swap contracts and foreign exchange forward contracts. The purpose of such contracts is to exchange cash flows from one currency to another. These contracts mature at various dates until 2036.

After taking into account derivative instruments used to manage foreign exchange risk, the structure of the debt as at March 31, 2007 was 92% in Canadian dollars, 1% in U.S. dollars, 1% in yen, 3% in Swiss francs and 3% in euros (as at March 31, 2006: 89% in Canadian dollars, 2% in U.S. dollars, 3% in yen and 6% in Swiss francs).

For the 2006-2007 fiscal year, \$134 million was posted to results as an amortization of the deferred foreign exchange gain included in debt service (\$126 million for fiscal 2005-2006).

Interest rate risk

Interest rate risk is the risk that debt service will vary unfavourably according to interest rate fluctuations. To reduce its exposure to interest rate risk, the Government uses interest rate swap contracts or short-term derivative products. Interest rate swap contracts make it possible to exchange payments of interest at fixed rates for payments of interest at variable rates or vice versa on the basis of a reference par value.

After taking into account derivative instruments used to manage interest rate risk, the structure of the debt as at March 31, 2007 was 68% at fixed rates and 32% at variable rates (as at March 31, 2006: 69% at fixed rates and 31% at variable rates).

The fixed-rate debt is the debt that will not mature, and whose rates will not change, over the coming year.

8. Risk management and derivative instruments (cont'd)

Credit risk

Credit risk is the risk that a counterparty will default on his contractual obligations, an event that could entail financial losses for the Government. To protect itself from such a risk within the scope of derivative instrument transactions, the Government has adopted a credit risk management policy that limits potential losses by a counterparty.

A credit limit is set for each counterparty based mainly on his credit rating. When this limit is exceeded, a process is implemented to ensure that the amounts owed by the counterparty concerned fall within the limits set.

The Government deals with major financial institutions whose credit rating is equal to or higher than its own by using as a reference the ratings granted by major rating agencies. As at March 31, 2007, the entire derivative instrument portfolio was associated with counterparties whose credit rating was equal to or higher than that of the province of Québec with at least one of these agencies.

Liquidity risk

Liquidity risk is the risk that the Government will not be able to meet its financial commitments over the short term. To offset this risk, the Government has obtained lines of credit totalling C\$1 175 million from various Canadian banking institutions.

In addition, the Government has concluded credit agreements for U.S.\$3 500 million with a Canadian and international banking syndicate.

As at March 31, 2007, none of these credit lines or agreements had been drawn upon.

(3) Under the water treatment program, the Government is committed, in accordance with an agreement with the municipalities and the Société québécoise d'assainissement des eaux (SQAE), to contributing to the financing of work costs by repaying, based on date of maturity, the principal and interest on borrowings contracted by the SQAE.

(4) The Government held \$3 472 million worth of its securities as at March 31, 2007 (\$3 815 million in 2006), including \$2 206 million (\$2 303 million as at March 31, 2006) held by the Sinking Fund.

(5) In 2006 and 2007, other currencies included the pound sterling, the Mexican peso, the Australian dollar, the New Zealand dollar and the Hong Kong dollar. A detailed table by type of currency and debt is presented in Appendix 17.

(1) This schedule takes into account \$2 950 million for Treasury bills and \$1 951 million for short-term borrowings in 2008 and was drawn up considering projected repayments of \$938 million in 2008, \$410 million in 2009, \$335 million in 2010, \$542 million in 2011, \$450 million in 2012 and \$2 205 million in 2013-2017 for savings products redeemable on demand.

(2) This schedule reflects, in 2008, \$1 415 million for short-term borrowings and \$323 million maturing for Treasury bills.

(3) This schedule includes an amount of \$23 million, for Treasury bills, maturing in 2008.

(4) These schedules take into account the sinking fund of \$3 699 million for debts in Canadian dollars and \$695 million for debts in U.S. dollars.

9. Debts (cont'd)

Repayment of debt by the sinking fund ⁽¹⁾

	<u>7 697</u>	<u>8 237</u>	<u>1 442</u>	<u>974</u>	<u>572</u>	<u>599</u>	<u>19 521</u>

Contractual obligations with regard to transfers are broken down in Appendix 20.

11. Contingencies

- A) Under its various financial assistance programs, the Government guarantees borrowings and other financial initiatives by third parties for an amount of \$10 487 million as at March 31, 2007 (\$10 774 million as at March 31, 2006). These net guaranteed financial initiatives are summarized in Appendix 21.
- B) A number of claims have been instituted against the Government, which is also involved in legal proceedings before the courts. These different disputes result from breaches of contract, damages suffered by individuals or property, and related elements. In some cases, the amounts claimed are mentioned; in others, no mention is made of them. The cases for which claim amounts have been established represent \$1 039 million. Since the outcome of these disputes is uncertain, the Government cannot determine its potential losses. The Government records a provision to this effect under “Accounts payable and accrued expenses” only once it appears likely that these cases will give rise to disbursements and the amount can be reasonably estimated.
- C) Some of Québec’s First Nations have instituted legal proceedings involving \$15 925 million in damages and interest against the Government for land claims, the recognition of certain ancestral rights and other related elements. These files, which are at different stages (some proceedings are currently suspended), are following their course and should be resolved through negotiations or rulings to intervene. Since their conclusion is uncertain, the Government cannot determine its potential losses.
- D) Since 2006-2007, the Government has recorded an environmental liability for the cost of remediation contaminated land under its responsibility, or likely to come under its responsibility, to the extent that the amount can be estimated. A survey of contaminated lands was conducted for this purpose. As at April 1, 2006, \$468 million was posted to “Other liabilities” for the approximately 450 properties inventoried.

In some cases, the probability that the Government will have to cover the remediation cost could not be established. In others, the value of the costs it will have to assume could not be estimated. The Government has given itself until March 31, 2010 to implement its new accounting policy, given the difficulties inherent in evaluating such a liability. The Government’s obligations, which will be recorded until March 31, 2010 for contaminated properties existing as at March 31, 2006, will be posted to accumulated deficit.

11. Contingencies (cont'd)

- E) The Government may be called upon to guarantee the execution of any obligation to which the Association des hôpitaux du Québec is bound in relation to the management of a deductible pertaining to a civil and professional liability insurance contract it negotiated and entered into for its members. It may also advance to this association any amount considered necessary in the course of such management. This guarantee represents an amount of \$90 million as at March 31, 2007.

Total	94	23 403	23 497	20 918

(1) Equity value was determined on the basis of audited financial statements as at March 31, 2007.

(2) Equity value was determined on the basis of audited financial statements as at December 31, 2006, and adjusted according to unaudited interim results as at March 31, 2007.

(3) Equity value was determined on the basis of audited financial statements as at December 31, 2006.

(4) Equity value was determined on the basis of unaudited financial statements as at March 31, 2007.

(5) Loans and advances to Hydro-Québec have no fixed maturity date, while those to IQ FIER inc. do not bear interest and mature between June 2020 and September 2021.

(6) In 2006-2007, the enterprise status of these entities was changed to that of government organization, because of either the integration within the reporting entity of organizations of the health and social services and the education networks, or the change in their operating activities and their financial position.

Investment in Government enterprises (cont'd)
AS AT MARCH 31, 2007

Summary of the financial statements of Government enterprises

Restatements ⁽⁴⁾			
Adjustments ⁽⁵⁾			225
			5 728

(1) Equity value was determined on the basis of audited financial statements as at March 31, 2007.

(2) Equity value was determined on the basis of audited financial statements as at December 31, 2006.

(3) Equity value was determined on the basis of unaudited financial statements as at March 31, 2007.

(4) The restatements result primarily from the application since January 1, 2007, by certain Government enterprises, of the new Canadian Institute of Chartered Accountants (CICA) standards governing financial instruments for the private sector.

(5) These adjustments stem mainly from unaudited interim results as at March 31, 2007.

(6) In 2006-2007, the enterprise status of these entities was changed to that of government organization, because of either the integration within the reporting entity of organizations of the health and social services and the education networks, or the change in their operating activities and their financial position.

(7) The Government guarantees the corporation's borrowings contracted in various currencies. The net value of these borrowings stands at \$34 742 million as at March 31, 2007 (\$33 917 million as at March 31, 2006). This amount includes a financial guarantee for Gentilly-2 of \$685 million in 2007 (\$525 million in 2006), for which Hydro-Québec has set up a trust of \$36 million (\$32 million in 2006).

(8) Borrowings of \$341 million as at December 31, 2006 (\$368 million in 2005) by some of the Société's companies and subsidiaries are guaranteed by various types of security on accounts receivable, inventories and other tangible and intangible assets and by hypothecs on the universality of property, whose book value totalled \$962 million as at December 31, 2006 (\$956 million in 2005).

Investment in Government enterprises (cont'd)
AS AT MARCH 31, 2007

Government's share of restatements made by Government enterprises

Since January 1, 2007, certain Government enterprises have had to comply with the new Canadian Institute of Chartered Accountants (CICA) standards for financial instruments in the private sector, adopting the recommendations of CICA handbook section 3855 “Financial Instruments – Recognition and Measurement”, which states the requirements for recognizing and measuring financial instruments, section 3865, “Hedges”, which specifies how hedge accounting may be applied and the information to disclose in this context, section 3861, “Financial instruments – Disclosure and Presentation », and section 1530, “Comprehensive Income”. The latter establishes the disclosure and presentation standards for comprehensive income, which includes net profits and other elements of comprehensive income.

Hydro-Québec

The application of these new standards increased the Société's retained earnings by \$298 million as at January 1, 2007. This increase is due essentially to the abolition of the transitional rules related to the application of CICA handbook guideline AcG-13 “Hedging Relationships”, the cumulated ineffectiveness of hedges and the replacement of the straight-line method by the effective interest rate method for the depreciation of financial assets and liabilities.

The application of these new standards also increased the accumulated other elements of comprehensive income as at January 1, 2007 by \$479 million, due primarily to the recognition of the efficient portion of cash flows hedging relationships.

The Government thus corrected and increased its share in this enterprise by \$777 million as at April 1, 2006, without restating the results for past years.

Société générale de financement du Québec

The application of these new standards decreased the Société's accumulated deficit as at January 1, 2007 by \$4 million. This decrease is due primarily to the recognition of the restatement of the fair value of the long-term debt as at January 1, 2007 of a subsidiary consolidated line by line in the Société's financial statements.

Investment in Government enterprises (cont'd)
AS AT MARCH 31, 2007

Government's share of restatements made by Government enterprises (cont'd)

Société générale de financement du Québec (cont'd)

The application of these new standards also increased the cumulated other elements of comprehensive income as at January 1, 2007 by \$49 million, due primarily to the recognition of the restatement of the fair value of assets available for sale as at January 1, 2007, i.e. long-term investments in the Société's subsidiaries.

The Government thus corrected and increased its share in this enterprise by \$53 million as at April 1, 2006, without restating the results for past years.

Total impact

These restatements increase (decreased) the following items :

	2007
	(in millions of dollars)
Investment in Government enterprises	830
Accumulated deficits and net debt, beginning of year	(830)

The impact of these new standards on revenue from Government enterprises for the fiscal year cannot be established.

Commitments

Hydro-Québec

Hydro-Québec has provided for capital investments of \$4 204 million in 2007 (\$3 972 million in 2006).

As at December 31, 2006, the Société had contracted commitments under contracts for the purchase of electricity, representing an installed capacity of roughly 3 960 MW. It plans to purchase about 13 TWh of energy annually over the terms of these contracts, which extend to 2045. Most of the contracts include renewal clauses.

Investment in Government enterprises (cont'd)
AS AT MARCH 31, 2007

Commitments (cont'd)

Hydro-Québec (cont'd)

Taking into account electricity purchase contracts as a whole, the Société plans to make the following payments over the next five years:

	December 31, 2006
	(in millions of dollars)
2007	942
2008	1 047
2009	1 132
2010	1 166
2011	1 189
Total	5 476

IQ Immigrants Investisseurs inc.

During the normal course of its activities, this enterprise contracted various commitments totalling \$142 million in 2007 (\$142 million in 2006). These commitments represent non-refundable financial contributions whose cash outflow has not been authorized, as well as sums allocated to financial contributions to Emploi-Québec and for which the expenditure has not yet been incurred by the latter. The total amount of these commitments does not necessarily represent future cash requirements, as some of them may be cancelled before they give rise to disbursements.

Moreover, the Société committed \$35 million in 2007 (\$24 million in 2006) to paying fees for financial intermediaries to seek immigrant investors, enterprises to recommend to them and to close files involving them.

Investment in Government enterprises (cont'd)
AS AT MARCH 31, 2007

Commitments (cont'd)

IQ FIER inc.

During the normal course of its activities, this enterprise contracted various commitments totalling \$219 million (\$205 million in 2006). These commitments represent investment agreements authorized by the Société. The total amount of these commitments does not necessarily represent future cash requirements, as some of them will expire or may be cancelled before they give rise to disbursements.

Société générale de financement du Québec

The Société is committed to acquiring tangible assets and purchasing services and raw materials aggregating \$37 million over the next few years (\$31 million in 2006).

Various enterprises

Under operating and long-term leases, certain Government enterprises were committed, as at March 31, 2007, to making minimum undiscounted payments totalling \$491 million (\$556 million in 2006).

Schedule

	491

Some enterprises contracted commitments during the normal course of their activities. These commitments, totalling \$141 million (\$164 million in 2006), represent authorized commitments that had not been disbursed as at March 31, 2007. Some of them might not be paid if the events do not take place.

Investment in Government enterprises (cont'd)
AS AT MARCH 31, 2007

Contingency

Hydro-Québec

Hydro-Québec provided those who acquired its shares with guarantees on all of the statements and guarantees contained in the sales agreements, for which no liability was recognized. The maximum potential quantifiable risk under these guarantees represents approximately \$322 million. Hydro-Québec's statements and guarantees are valid for a period ending no later than February 24, 2008, except for potential tax liabilities and certain other usual statements, which remain in effect until the end of the prescription periods applicable.

As at March 31, 2007, the potential maximum amount the Société could have to pay under letters of credit or guarantees totalled \$391 million (\$410 million in 2006). Of this amount, \$310 million (\$313 million in 2006) relates to the purchase of energy, for which a liability in the amount of \$14 million (\$23 million in 2006) has been recorded. Some guarantees expire between 2007 and 2019, while others do not have maturity dates.

(1) Bonds and notes as well as loans and advances to municipalities and municipal bodies bear interest at rates of 3.55% to 10.0%.

(2) Loans and advances to students bear interest at rates of 4.25% to 14.875%.

(3) Loans to enterprises bear interest at rates of up to 15.0%.

(4) Guarantees received for loans and advances amount to \$151 million as at March 31, 2007 (\$118 million as at March 31, 2006).

(5) Loans and advances include, among others, loans with special repayment clauses based on royalties, for a total amount of \$100 million.

(6) These investments were reduced by \$331 million as at March 31, 2007 to reflect the grant portion relating to the concessionary terms.

(7) Bonds and notes to universities excluded from the Government reporting entity funded investments in fixed assets and are repayable mainly through subsequent budgetary appropriations from the Government.

(8) All other loans and advances as well as bonds and notes bear interest at rates of up to 12.25%.

(9) Under the *University Investments Act (R.S.Q., c. I-17)*, the Government created a sinking fund in which the amounts deposited by the responsible minister are allocated exclusively to the repayment of borrowings (principal and interest) for the funding of fixed assets of university institutions in Québec.

AS AT MARCH 31, 2007

Commitments

In the normal course of their activities, organizations of the health and social services and the education networks enter into various commitments, such as operating leases, long-term leases, supply and service contracts and contracts to acquire fixed assets. These commitments amount to a total of \$2 724 million and represent authorized commitments not disbursed as at March 31, 2007. Some of these amounts may not be paid if the events do not take place.

The total non-discounted future minimum amounts payable under these contracts breaks down as follows:

	<u>2007</u>
	(in millions of dollars)
Agencies and public institutions ⁽¹⁾	1 657
School boards ⁽²⁾	596
Colleges ⁽²⁾	107
Université du Québec and its constituents ⁽³⁾	<u>364</u>
	<u>2 724</u>

Contingencies

Certain organizations of the health and social services and the education networks are the object of various lawsuits whose outcome cannot be determined and provide loan guarantees to third parties. These contingencies represent a total of \$459 million that breaks down as follows:

	<u>2007</u>
	(in millions of dollars)
Agencies and public institutions ⁽¹⁾	354
School boards ⁽²⁾	47
Colleges ⁽²⁾	13
Université du Québec and its constituents ⁽³⁾	<u>45</u>
	<u>459</u>

(1) As at March 31, 2007.

(2) As at June 30, 2006.

(3) As at May 31, 2006.

Fixed assets

AS AT MARCH 31, 2007

Fixed assets are recorded at cost. They are depreciated over their useful life using the following methods:

Category	Depreciation method	Useful life
Buildings, including those rented under capital leases	Straight-line and annuity	10 to 50 years
Facilities	Straight-line	5 to 10 years
Complex networks	Straight-line	10 to 40 years
Equipment, including those rented under capital leases	Straight-line	3 to 20 years
Development of data processing systems	Straight-line	5 to 10 years

Works of art and historic property consist mainly of paintings, sculptures, drawings, prints, photographs, installations, films and videos and their cost is charged to expenditures for the fiscal year in which they are acquired.

The following table presents a summary of the operations and balances of the main categories of fixed assets:

	Land	Buildings	Facilities	Complex networks	Equip-ment	Development of data processing systems	2007 Total	2006 Total
Cost of fixed assets							(in millions of dollars)

Impact of disposal and reductions in value		(17)	(8)		(105)	(22)	(152)	(47)
Closing balance	--	2 877	132	10 220	1 865	1 097	16 191	14 686
Fixed assets	626	4 466	119	9 022	1 036	1 118	16 387 ⁽¹⁾	12 984 ⁽¹⁾

(1) Including fixed assets rented under capital leases totalling \$160 million in 2006-2007 (\$148 million in 2005-2006). The depreciation amount related to these fixed assets was \$14 million in 2006-2007 (\$12 million in 2005-2006). The total for fixed assets includes \$1 891 million in 2006-2007 (\$1 393 million in 2005-2006) in property under construction or development for which no depreciation was taken.

*Transfers – Agreements**Agreement between the Gouvernement du Québec and the Québec Cree*

An agreement was signed by the Government and the Québec Cree in February 2002 to help the Cree achieve more autonomy and take charge of their development. The agreement also allows the Cree to play a greater role in economic development activities in the territory covered by the James Bay and Northern Québec Agreement (JBNQA).

The February 2002 agreement provides in particular for annual transfer payments to the James Bay Cree over a period of 50 years, i.e. from 2002-2003 to 2051-2052. In return, the Cree assume the obligations of the Gouvernement du Québec, Hydro-Québec and the Société d'énergie de la Baie James under certain provisions of the JBNQA pertaining to the Cree's economic and community development. The minimum annual payments provided for over the coming years amount to \$70 million, subject to indexation, until 2052. As at March 31, 2007, the balance payable was \$3 150 million (\$3 220 million in 2006).

Agreement respecting global funding for the Kativik Regional Government

An agreement was signed by the Gouvernement du Québec and the Kativik Regional Government in March 2004 to simplify the payment of transfers from various Québec government departments. It also grants the Kativik Regional Government greater autonomy in allocating funds based on regional priorities.

The agreement provides for the payment over 24 years, i.e. from 2004-2005 to 2027-2028, of annual transfer payments of \$27.5 million, subject to indexation, as of January 1, 2005. As at March 31, 2007, the balance payable was \$744 million (\$737 million in 2006).

Partnership agreement on economic and community development in Nunavik

A partnership agreement on economic and community development in Nunavik was signed in April 2002 between the Gouvernement du Québec, the Makivik Corporation and the Kativik Regional Government to meet the specific needs of the people of Nunavik by funding economic and community projects and providing local communities with better economic and community development prospects. It was amended on August 1, 2006 by Order-in-Council 696-2006. The agreement runs 25 years, i.e. from 2002-2003 to 2026-2027.

Breakdown of contractual obligations (cont'd)
AS AT MARCH 31, 2007

Transfers – Agreements (cont'd)

Partnership agreement on economic and community development in Nunavik (cont'd)

As of 2006-2007, the annual transfer payments for the Inuit of Nunavik are \$25 million indexed until 2027. As at March 31, 2007, the balance payable was \$541 million (\$331 million in 2006).

Other agreements

Other agreements include notably agreements on new fiscal and financial partnerships with the municipalities for \$1 970 million as at March 31, 2007 (\$389 million as at March 31, 2006), the national policy on rural areas for \$280 million as at March 31, 2007 (\$21 million as at March 31, 2006), the subsidy agreement reached with the Ville de Montréal for \$227 million as at March 31, 2007 (\$235 million as at March 31, 2006), the agreement concerning block funding for northern villages in the Kativik region for \$224 million as at March 31, 2007 (\$209 million as at March 31, 2006), and the agreement on breakdown of Government reinvestment of \$172 million in higher education. They also include other contributions for \$915 million as at March 31, 2007 (\$678 million as at March 31, 2006)

Reserve
AS AT MARCH 31, 2007

	Additional payment to the Generations Fund	Mainte- nance of a balanced budget	2007	2006
Opening balance	--	--	--	--
Allocated to the reserve	200	1 100	1 300	--
Closing balance	200	1 100	1 300	--

Under the *Act to establish a budgetary surplus reserve fund (R.S.Q., c. R-25.1)*, the Government set up a reserve to finance fixed assets projects and other projects to be completed within a fixed period of time. However, when the Government believes that it is in the public interest to do so, it can use the reserve for projects other than those for which it was created. Further, the Government may allocate all or part of the reserve to maintaining a balanced budget.

In the Budget Speech, the Minister of Finance determines the portion of the surplus for the fiscal year exceeding the budgetary objective to be allocated to the reserve and the amounts to be allocated to the different components.

In the *2007-2008 Budget Speech*, the Minister announced that a \$1 300 million surplus of revenue over expenditure, excluding revenue from the Generations Fund, for the fiscal year ended March 31, 2007 was allocated to the reserve.

In 2007-2008, the Government intends to pay an additional \$200 million into the Generations Fund from the amounts allocated to the budgetary reserve in 2006-2007. The reserve balance, i.e. \$1 100 million, is slated for use to maintain a balanced budget in 2008-2009.
