Whitehorse Copper Lots

PS Sidhu Trucking Ltd (Contractor) has truck/heavy equipment warning signs posted, please take note that this an active construction site, care and attention should be taken with heavy equipment and trucks hauling gravel etc, and that **everyone needs to take full responsibility and travel at their own risk on the job site**. Phase 1 roads will continue to be an active construction zone until the entire road construction project is completed in September 2007.

In addition, the three (3) Alaska Highway accesses construction will commence later this month and successful lot purchasers should plan for construction delays at the Mt. Sima Rd. intersection and the McCrae intersection. The Meadow Lakes Golf Course intersection access will not open to local traffic until late October 2007.

Also, please be made aware that if you are a successful lot purchaser that road BST surfacing and asphalt paving will be completed in 2008 as well as the ditch back slope hydroseeding. So there will be continued construction work in the 2008 construction season.

We thank you in advance for your understanding and patience.

Thanks
