## Campgrounds and Rest Areas

Avoid driver fatigue. Take a break. The long daylight hours of Yukon summers can cause you to lose track of time. Government campgrounds and rest areas are situated at many locations along major Yukon highways. Take advantage of these facilities to avoid becoming too tired while you are driving.

Highlighted areas  = campgrounds

km 3.6	

## Safe Driving Tips

Before you begin your trip, make sure your vehicle is in good mechanical condition and that you have appropriate emergency backup and equipment (spare tire, fan belt, etc.).

When you decide to stop to observe wildlife or scenery, or to take a break, be sure to pull over and park well off the roadway. An ideal place to stop is at one of the many designated rest areas along the highway. Do not stop at the top of a hill, on a bridge, or within a curve. Also, do not leave your vehicle doors open because this restricts traffic flow and may cause a collision. Blocking the roadway is illegal and may result in a fine.

For specific information on highway conditions, check with the Yukon Road Report, visitor information centres, or any RCMP detachment. Radio stations also provide highway and weather information. This information is listed in this brochure.

- **Buckle up.** Seat belt use is mandatory in the Yukon and is the single most effective way to reduce injuries and deaths in collisions.

- **Drive with headlights on low beam.** Headlight use is mandatory at all times in the Yukon.

- **Obey Yukon's posted speed limits.** Speed limits are set for ideal road conditions. Slow down in poor weather, on curves, bridges and down hills. Speeds are expressed in kilometres per hour. (e.g. 80 km/hr= 50 mph)

## For a Safe Journey

Travellers should remember they are in a wilderness area, and service stations are not found at every turn in the road. As well, the highways are constantly exposed to the forces of nature and require continual repair. For a safe and comfortable journey, be prepared for:

- Potholes or surface break-up. This is most prevalent during late spring and early summer and is caused by continual freezing and thawing of moisture in the road bed. PLEASE SLOW DOWN on these sections, especially when pulling a trailer.
- Occasional washouts. These may occur in late spring or early summer as a result of heavy rain or rapid melting of the alpine snow pack after warm weather.
- Surveyors and flag persons working on or adjacent to the road. Please obey all signs.
- Snow plowing in winter.

# Driving Yukon Highways 2007

# 2007 Yukon Highway Construction Schedule

Travellers can expect delays during these times due to road construction activities.

## Alaska Highway #1

KM	PROJECT	STATUS
1042	Guiderrail repairs Big Creek Bridge	Workers and equipment in driving lane — June
1099-1114	BST	Resurfacing, minor delays — May to June
1133-1136	BST	Resurfacing, minor delays — May to June
1218	Subgrade improvements, Strawberry Creek	Highway construction, minor delays — June
1296	Deck replacement, Teslin River Bridge	Single lane traffic, 15 minute delays — April to September
1417	Guiderrail installation	Workers and equipment in driving lane — July
1543-1547	BST	Resurfacing, minor delays — July
1692-1700	BST	Resurfacing, 15 minute delays — May to July
1700-1707	Construction	Major reconstruction, 15 minute delays — May to October
1820-1835	Permafrost test sections	Highway construction, minor delays — August to October
1857-1862	BST	Resurfacing — May to June
1872	Koidern River #2 Bridge repairs	Minor delays — August
1872-1873	BST	Resurfacing, minor delays — May to July
1905-1916	BST	Resurfacing, minor delays — May to July
1918-1930	BST	Resurfacing, minor delays — May to June

Road construction is scheduled to take place along the Alaska Highway in the Sheep Mountain area, adjacent to Kluane National Park. Travellers are encouraged to check in with Yukon Information Centres for daily updates of highway construction.

## Klondike Hwy #2

KM	PROJECT	STATUS
37-42	BST	Resurfacing, minor delays — June to July
82-84	South Klondike rock fall barrier	Workers and equipment in driving lane — July
204-212	Pavement overlay, Burma Road North	Paving crews and equipment, 15 minute delays — July
304	Guiderrail installation, Coffin Lake	Workers, equipment in driving lane — July
357	Paint repairs Yukon River Bridge, Carmacks	Workers, equipment in driving lane, minor delays — July
463-468	BST	Resurfacing, minor delays — July to August
559-568	BST	Resurfacing, minor delays — July to August
613-620	BST	Resurfacing, minor delays — June to July
646-657	BST	Resurfacing, minor delays — June to July

## Haines Road #3

KM	PROJECT	STATUS
174-193	Paving	Paving crews and equipment, 15 minute delays — July to August

## Campbell Highway #4

KM	PROJECT	STATUS
10-17	Reconstruction (Culvert Installation)	Reconstruction, minor delays — June to July
17-28	BST	Resurfacing, minor delays — May to June
508-519	BST	Resurfacing, minor delays — July 11 to August 15

## North Canol #6

KM	PROJECT	STATUS
421	Bridge work, Jeff Creek	Long delays — August to September
421	Bridge work, Macmillan #3	Long delays — August to September

## Atlin Road #7

KM	PROJECT	STATUS
1-6	Guiderrail installation and BST	Guiderrail and surfacing, minor delays — May to June
