YUKON RELEASES GUIDE FOR PROJECT ACTIVITIES

WHITEHORSE – An up-to-date permit/authorization guide is being released today by the Yukon government.

“We have produced a guide that integrates permitting requirements across government into one document,” Energy, Mines and Resources Minister Archie Lang said. “This is another step in the Yukon government’s efforts to improve its integrated resource management process.”

The Permit/Authorization Guide for Activities in the Yukon Territory serves as a reference tool to identify specific government authorizations and contacts for project development activities.

This guide incorporates the most recent sources of information available to industry. It is intended to be helpful during any phase of project development but does not replace legislation or regulation that governs Yukon project developments.

The Permit/Authorization guide is a result of coordinated efforts between various Yukon government departments including Energy, Mines and Resources, Environment, Community Services, Highways and Public Works, Tourism and Culture and the Development Assessment Process Branch of the Executive Council Office in addition to the federal government departments of Fisheries and Oceans, and Environment Canada.

The new guide is available at all Yukon government permitting offices, at the main inquiry desk, various non-government organizations and on-line at www.gov.yk.ca/depts/eco/dap.

Permit and Authorization Guide for Yukon Activities

The guide is the result of a coordinated effort between the federal government's Department of Fisheries & Oceans and Environment Canada and several Yukon government's departments including Energy, Mines & Resources, Environment, Community Services, Highways & Public Works, Tourism & Culture and the Executive Council Office (Development Assessment Process Branch).

Purpose

This is a reference tool for people who need to identify specific federal and territorial government authorizations and contacts for project development activities. The guide may be helpful during any phase of project development but it does not replace any legislation or regulation that governs project development in Yukon.

Points to Remember

Processing applications for permits, licenses and authorizations takes time; please contact the relevant government departments early in the application process to assist you in meeting your project plan timelines. Contact information for each authorization or permit can be found in the last column of each table in the permit guide.

You may be required to pay a fee depending on the type of permit. Fees may also vary depending on the type of permit. For more detailed information on permit fees, please contact the government department or agency that is issuing the permit or authorization.

If you are not familiar with the authorization process, you may want to first consider consulting the relevant government department as they may be aware of details that could be important to your project application.

Please ensure that you contact the government department or agency listed in the guide to determine whether or not your project will require further review or authorization by *other* governments (First Nation, municipal etc.).

In addition, your project may also require an environmental assessment. The government department or branch issuing the permit can either inform you of any environmental assessment requirements or direct you to the appropriate office for further assistance.

How to Use this Guide

1. Find the general activity that best describes your project in the table of contents.
2. Locate the specific activity that best describes your project in the first column of each table.(Notes page 3)*
3. Find the column headings; they will guide you to permit/authorization information. (Notes page 3)**

Environmental Assessment

In the near future, Yukon will have transitioned from the Yukon's *Environmental Assessment Act* (EAA) and the *Canadian Environmental Assessment Act* (CEAA) to the new *Yukon Environmental and Socio-economic Assessment Act* (YESAA).

To find out about environmental assessments and the legislation mentioned above please contact the following:

- the government department issuing the permit/authorization for your project;
- the Yukon Environmental and Socio-Economic Assessment Board (YESAB) at (867) 668-6420, yesab@yesab.ca and www.yesab.ca; or
- the Yukon government Development Assessment Process (DAP) Branch at (867) 456-3818 and www.gov.yk.ca/depts/ located at room 310, Elijah Smith Building in Whitehorse, Yukon.

Activities on Settlement Land

Any activities done on Settlement Land (under a Yukon First Nation Final Agreement) will require permission or a permit from the First Nation. Please check with the First Nation in the area where your project is proposed to find out more about permission or permit requirements.

Work in Municipalities

Authorizations for work done in municipalities may not be listed in this guide. Please contact the appropriate municipal government for more information on what authorizations are required for your project.

Notes

*If your project includes more than one of the activities listed, your project may require more than one authorization, please check with the corresponding government departments (Responsible Authorities) for more information.

**The names of the Acts, government departments, contact numbers and e-mail addresses have been included where available. The *green italicized* indicates a territorial Act or regulation and the *red italicized* indicates a federal act or regulation.
