

**Thompson/Okanagan
Development Region**

1	General Economy
<p>Regional Districts in Development Region: Okanagan-Similkameen, Thompson-Nicola, Central Okanagan, North Okanagan, Columbia-Shuswap</p> <p>The main economic drivers in this region are forestry, tourism and agriculture. This region contains the most productive agricultural areas within the province. The climate of the area, which is so conducive to agriculture, also draws a large number of tourists and retirees to the region. Mining is also an important industry, particularly in the Kamloops area, where the largest mine in the province, the Highland Valley Mines, is located.</p> <p>Developments in the resource sectors will affect the population flows to and from this region. Four major mines have closed in this region in the last few years due either to ore depletion or poor metal prices. Although the impact of these closures on a regional basis will probably be small, the local impacts could be significant. The Highland Valley Mines is projected to close sometime around 2008 and will have the most significant impact in terms of job loss and population movement.</p>	

SAMPLE

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P25 completed in the summer of 2000. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. They are available on diskette or on paper. While fewer than 5 areas are free, individual areas are priced at \$5 each when 5 or more are requested. Paper copies of all LHAs cost \$150 and all regional districts are \$80. The full B.C. level projection and summaries of the region projections appear on our Web site: <http://www.bcstats.gov.bc.ca>.

Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
 Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
 Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
 Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
 Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
 Employees: Respondents are asked for average month-end employment.
 Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

**Thompson/Okanagan
Development Region**

13 Demographics

This region experienced net outflows of migrants during the mid-eighties, probably due to the downturn in the forest sector at that time. Since then, net migration to the region has been high, contributing to strong population growth for the region. The median age of the population in this region is significantly higher than the provincial median, probably due to the substantial number of retirees located in the region. The proportion of elderly (aged 65 and over) to working age population (aged 18 to 64) is also significantly higher than the provincial ratio.

14 Projection

The high net migration inflows to this region will likely begin to taper off somewhat, but should remain fairly strong throughout the projection period. The natural increase (i.e., the excess of births over deaths) is falling, and will continue to fall, likely becoming negative in about 10 years. However, the strong inflows of migrants will more than compensate for any losses due to natural increase and this region will continue to experience strong population growth.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							Households (,000)	Dependency Ratios			Year

Age groups reflect pre-school, school, advanced education, family formation, mature workers and retired.

Child Dependency: (ages 0-17) / (ages 18-64)

Elderly Dependency: (ages 65+) / (ages 18-64)

Source: Population data are Projection P-25, run in May 2000. Figures are adjusted for Census undercount and are for July 1st of stated year.
