Data presented in this report are subject to suppression and random rounding in order to preserve the confidentiality of respondents to the census. The effect is significant in areas with little population or where a particular category drew few responses.

The census is a rich source of demographic data for even small communities, at five year intervals. The information presented here is drawn from a large dataset. Other variables are available by request on a fee for service basis.

Okanagan-Similkameen RD

1000 Octions population - based on 2001
boundaries.
Economic family - refers to two or more persons
living in the same dwelling, related to each other
by blood, marriage, common-law or adoption.
Experienced labour force - includes persons who
worked since Jan 1, 2000 and who were employed
or unemployed during the reference week.
Non-movers - on Census Day were living at the
same address as one or five years previous.
Non-migrant movers - lived at a different address
but in the same census subdivision (CSD).
Average - or arithmetic mean is calculated by
dividing the sum of included categories by the
number of included categories.
Median - an alternate measure of 'averageness'.
Median income of a specific group is that amount which divides their income size distribution into two halves (below and above the median).

Notes

Population - effective since the 1991 Census, non-

1996 Census population - based on 2001

permanent residents included in total population.

Data presented in this report are subject to suppression and random rounding in order to preserve the confidentiality of respondents to the census. The effect is significant in areas with little population or where a particular category drew few responses.
