This report is derived by summing data for Census Divisions (CD) that constitute the Development Region (DR). Since data for all CDs is randomly rounded to preserve privacy of individuals, there is some loss of accuracy in the aggregated figures. Figures such as medians and standard errors, which cannot be calculated from data available to BC Stats, are omitted.

## Notes

**Population** - effective since the 1991 Census, non-permanent residents included in total population.  
**1996 Census population** - based on 2001 boundaries.  
**Economic family** - refers to two or more persons living in the same dwelling, related to each other by blood, marriage, common-law or adoption.  
**Experienced labour force** - includes persons who worked since Jan 1, 2000 and who were employed or unemployed during the reference week.  
**Non-movers** - on Census Day were living at the same address as one or five years previous.  
**Non-migrant movers** - lived at a different address but in the same census subdivision (CSD).  
**Average** - or arithmetic mean is calculated by dividing the sum of included categories by the number of included categories.  
**Median** - an alternate measure of 'averageness'. Median income of a specific group is that amount which divides their income size distribution into two halves (below and above the median).  
**Incidence of low income** - the percentage of a specific group below Statistics Canada's low income cut-offs (LICO).

Data presented in this report are subject to suppression and random rounding in order to preserve the confidentiality of respondents to the census. The effect is significant in areas with little population or where a particular category drew few responses.

The census is a rich source of demographic data for even small communities, at five year intervals. The information presented here is drawn from a large dataset. Other variables are available by request on a fee for service basis.
