

ATTACHMENT 1

BIBLIOGRAPHY OF CBM ENVIRONMENTAL REFERENCES

References are coded as follows where information applies:

1. Reference
2. Keyword phrases
3. Access for source document
4. Geographic location
5. Name of formation, coalfield, or basin

In the list below, references preceded by a star are annotated in a separate report (Peterson, E.B.; Peterson, N.M. 2002 *Selected annotated references on water handling, environmental, and land-use aspects of coalbed methane development*, prepared by Western Ecological Services Ltd., Victoria for B.C. Ministry of Energy and Mines, Victoria, B.C.).

Groups of references that provide information for each of 40 keyword phrases are listed in Attachment 2. Attachment 3 contains additional references that were not keyword coded or annotated because they could not be obtained by the time this review ended (28 February 2002).
