

## Tourism Industry Monitor Annual 2006

## 2006 in Review: Another Good Year for BC Tourism Sector

## Revenues continued on an upward trend

Room revenues at hotels, motels and other establishments in British Columbia increased 7.8%, reaching over \$1.8 billion in 2006, the highest level since 1995. The persistent growth for the third consecutive year highlights the strength of BC's tourism economy.

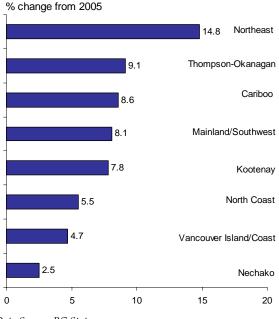

#### Persistent growth in room revenues in 2006 in BC

Data Source: BC Stats

#### Northeast continued to be the top performer in 2006

Northeast outperformed the rest of BC in 2006

Data Source: BC Stats

All regions of the province experienced increases in revenues in 2006. For the fourth time, the Northeast region outperformed the rest of BC, posting a growth rate of 14.8%. This follows a gain of 22.1% in 2003, 12.2% in 2004, and 21.9% in 2005. Thompson-Okanagan (+9.1%), Kootenay (+7.8%) and Vancouver Island/Coast (+4.7%) continued their upward trend since 1997. BC's most populated region, Mainland/Southwest (+8.1%), also made significant gains in room revenues. Cariboo (+8.6%) was also a major engine of revenue growth, as was North Coast (+5.5%). After a robust increase of 15.2% in 2005, revenues in Nechako rose only a moderate 2.5%.

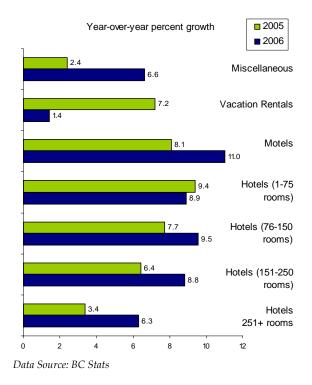

### Revenues up at all types of establishments

Motels (+11.0%) outperformed hotels (+8.1%), vacation rentals (+1.4%), and other types of accommodation properties (+6.6%; including bed and breakfast, fishing lodges and other types of short-term accommodation). This is not much different from 2005, when revenues at motels (+8.1%) surpassed those of hotels (+6.0%) and vacation rentals (+7.2%).

In 2006, motels posted strong, persistent and consistent increases, proving themselves to be strong competition for hotels, and replacing small hotels (1-75 rooms, +8.9%) as the top performers in 2006. Hotels with 76-150 rooms posted the strongest gain (+9.5%) among hotels, followed by large hotels (151-250 rooms, +8.8%). Very large hotels (251+ rooms) grew faster than they did in 2005, showing a 6.3% increase in revenues.

The long-run downward trend in visitor entries continued in 2006 as the number of visitor entries to Canada via BC fell 5.2% to about 6.8 million, the lowest number in more than a decade. Entries were weak throughout the year, with all four quarters showing overall declines and down 19.3% since 2000.

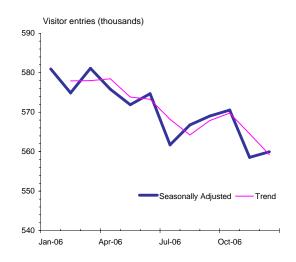

# US entries continued to fall for the sixth consecutive year since 2001

Accounting for the largest source of foreign visitors to the province, the US is a major tourism market. The number of visitors from the US has been declining every year since 2001 and continued to fall (-6.5%) in 2006 with same-day entries dropping dramatically (-15.8%) and overnight travel off slightly (-0.2%).

Last year's count of 1.9 million same-day visitors from the US was the lowest level since 1989. In 2006, overnight travel from the US remained relatively unchanged at 3.4 million visitors.

#### Downward trend in visitor entries continues in 2006

Data Source: Statistics Canada

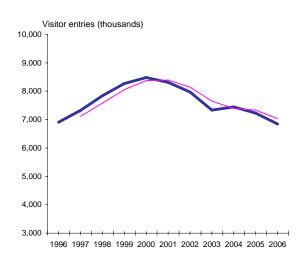

Prior to 2001, the number of same-day trips was only slightly lower than the number of overnight stays. In 2006, the number of overnight visitors was nearly twice that of same-day travellers. The gap between overnight and same-day entries has grown since the end of 2001, reaching 1.5 million in 2006.

#### A growing gap between the US same-day and overnight travel

Data Source: Statistics Canada

Data Source: Statistics Canada

Ongoing security concerns, which have resulted in longer line-ups and delays at border crossings since September 2001, may have made same-day travel less appealing to potential and formerly frequent visitors from the US. Additionally, an appreciation in the value of the Canadian dollar has increased the cost of travel to BC from the US and made activities such as shopping and sightseeing trips less of a bargain. All of this, coupled with the rapidly rising cost of gasoline, may be keeping some American travellers away from the province.

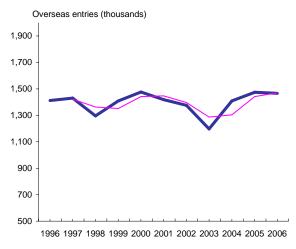

# Overseas travel to BC only slightly off in 2006

Travel to BC from overseas markets was down slightly (-0.5%) in 2006, a slowdown following increases recorded in 2004 (+17.6%) and in 2005 (+4.6%). A decline in the number of travellers from Europe (-0.2%), Asia (-0.9%), and Oceania (-1.5%) was also observed in 2006.

Entries started the year weak in January, but recovered quickly through the first quarter. From there and throughout the rest of the year the number of visitors ebbed and flowed from month to month, with the third quarter showing a net loss in the number of travellers to BC. These losses were recovered in the late year with an increase in December (+1.6%).

The number of entries from Asia was off slightly (-0.9%) in 2006. The most significant change in Asian entries was a sharp decline (-10.5%) in the number of travellers from Japan. Entries from South Korea, the second largest Asian market after Japan, were up (+4.6%), but residents of Taiwan (-6.5%) paid fewer visits to BC while the number of guests from Hong Kong increased only marginally (+0.3%).

## Recent growth in overseas visits slows in 2006

Data Source: Statistics Canada

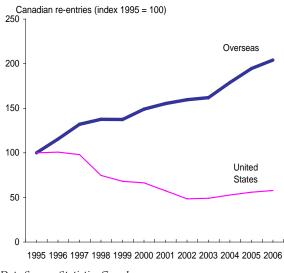

European entries were down slightly (-0.2%) to 493,000 in 2006, as the number of guests from the UK (-2.0%) and Germany (-3.3%) fell. BC also saw fewer (-1.5%) arrivals from Oceania (Australia, New Zealand, and other parts of the South Pacific).

# More Canadians return home from overseas travels

The number of Canadians re-entering the country via BC advanced (+3.6%) in 2006. Travel to overseas destinations has been trending upward over the past decade as Canadians explore the world beyond North America. Overseas travel has more than doubled (+104.0%) between 1995 and 2006 with the number of entries rising 4.9% to almost 1.2 million travellers in 2006.

Since 1995, the number of Canadians returning home from visits to the US has nearly halved (-42.2%). However, this downward trend began to increase in 2003, likely due to the ongoing appreciation of the Canadian dollar against the US greenback. In 2006, the number of Canadians returning from the US rose 3.4%.

#### Canadian re-entries from overseas have doubled between 1995 and 2006, while re-entries from US have nearly halved

Data Source: Statistics Canada

### **Other Annual Indicators**

In the hotel industry, the occupancy rate increased by 1.9 percentage points to 65.9% in 2006, while average room prices rose 5.5%, to \$123.1.

BC Ferries carried marginally fewer vehicles (-0.1%), while passenger volumes on board inched lower (-0.5%) as well. On the Coquihalla Highway, 1.3% fewer passenger vehicles passed through tollbooths last year.

Employment in key tourism-related industries improved (+5.1%) in 2006, with increases seen in all sectors. Air transport (+4.1%), food and beverage (+4.7%) arts, entertainment and recreation (+5.8%), and accommodation (+6.5%) industries all hired more workers.

Note:pp. percentage points

Despite the downturn in international visitor entries in 2006, airport traffic statistics continued to increase. Passenger traffic at Vancouver airport rose to over 16.9 million travellers, 3.1% higher than in 2005, with higher volumes on most types of flights. US trans-border (+3.7%) and domestic traffic (+4.4%) all increased, with the decrease in the number of passengers on other international flights being relatively small (-0.1%). Victoria airport welcomed 1.4 million travellers, a 5.4% increase from 2005. In BC, restaurant and tavern receipts surged 6.7% to over \$6.5 billion in 2006 with a 9.6% increase in sales at food services establishments, offering a dramatic 21.2% in receipts at drinking places.

#### Conclusion

While the tourism sector in BC has seen a downturn in the number of international travellers from the US and overseas, a rise in hotel occupancy rates, room revenues and tourism-related employment indicates that the province's tourism sector is performing better overall.

While comprehensive provincial tourism data for 2006 are not available, this scenario seems quite plausible when examined on the national level. The Canadian Tourism Commission reports that while foreign tourism expenditures in Canada were down 1.8%, domestic tourism spending rose 10.0% in 2006 to \$49.7 billion leading total expenditures to \$66.9 billion, an increase of 6.7%.

This suggests that while Canada and, by implication, BC cannot neglect the importance of American and overseas visitors it is growth in domestic travel, either inter- or intraprovincial, that was fundamentally supporting the tourism sector in BC.
