

## What's New Version 1.12.3

### 1. Block Status Report

This report has been upgraded to only report active licensees operating in the requested org unit.

### 2. Detailed and Summary Ledgers

Upgrades have been made to harmonize both ledgers.

### 3. Add block submission date to ledger requests

As previously requested by some users, block submission date range has been added to screen 402, as below.

The screenshot shows the 'WASTE System' web application in Microsoft Internet Explorer. The browser address bar shows 'http://apps30.for.gov.bc.ca/waste/'. The application has a navigation menu with 'Annual Plan', 'Reporting Unit', 'Reports', and 'Ledgers'. The main content area is titled 'WASTE402 - Ledger Reports'. It contains several search and filter fields:

- Report: [Dropdown] \*
- Org unit: [Dropdown] \*
- Licensee: [Text] ...
- Annual Plan ID: [Text] ...
- Reporting Unit ID: [Text] ...
- Forest File ID: [Text]

- Survey Checked: [Dropdown]
- Surveyor Number: [Text]
- Delivery Type: [Dropdown] (Options: DIR - Direct online delivery)
- Email Address: [Text] (Value: John.Wai@gov.bc.ca)

### 4. Child Blocks in Rejected Status

A fix has been made to have rejected child blocks converted to the same status as the parent block.
