

Statistical Supplement to the **Annual Report** 1998

### **Statistical Supplement** to the

### Annual Report 1998

This publication is a supplement to the Workplace Safety and Insurance Board's 1998 Annual Report. It contains aggregate injury and illness, claim and employer registration data for 1998 as well as 10-year trend figures where available. All data reflects legislation in the province of Ontario at the time of reporting.

Implementation of the new *Workplace Safety and Insurance Act* on January 1, 1998 resulted in a number of reporting changes that are reflected in this statistical supplement:

- Long- and short-term disability benefits are now called loss of earnings benefits (LOE).
- Future economic loss benefits (FEL) are only applicable to injuries and illnesses that occurred from January 2, 1990 to December 31, 1997. The FEL tables that appeared in past statistical supplements have been replaced by a single table entitled Active FEL Awards and Supplements.
- In previous issues of the Statistical Supplement, the WSIB included data for the number of workers referred by the adjudicators for vocational rehabilitation and the number of workers who completed vocational rehabilitation programs. However, since July 1998, employers and workers have had greater statutory responsibilities for their own return-to-work activities. Beginning in July 1998, WSIB adjudicators did not refer workers into the vocational rehabilitation stream if those workers were involved in return-to-work activities with their employers in the workplace. This significantly impacted the number of vocational rehabilitation referrals and outcomes reported in 1998, with the result that it is not possible to offer valid comparisons with previous years.

For more information about the statistics in this report, contact Corporate Data at (416) 344-4700.

### Claim volumes

The tables in this section provide insight into the numbers of injuries and illnesses that occur in Ontario workplaces each year and the workplace safety insurance claims that result.

Table 1 lists the number of claims according to the year a claim is reported and registered. This provides an indication of the administrative workload at the WSIB.

Delays in reporting and processing some complex cases complicate the tabulation and reporting of injury and illness statistics. The number of accidents for any given year grows or matures as more claims are reported and decisions are made. The process by which claim numbers

grow after the end of the year is called maturing.

Tables two through four present the number of claims according to when injuries or illnesses actually occurred. Table 2 provides a snapshot of the number of injuries or illnesses by industry and firm size as of March 31 following the year of accident. Table 3 provides a snapshot of the accident counts by claim status as of March 31 following the year of accident. Table 4 presents injury and illness data 15 months after the end of the year, when most maturing has occurred.

More details and background on these summary statistics are in the explanatory notes that accompany each table.

#### Number of Registrations in a Year (1989 - 1998)

Figures in this table show the number of claims registered with the WSIB in each year. Annual volumes of claim registrations provide a measure of the overall administrative workload at the WSIB.

Although most claims are reported and registered in the same year the accident occurred, there are cases in which the claim is reported and registered after the year of accident. This table provides a breakdown of registered claims for accidents that occurred in the current year and in

prior years. The figures encompass all claims reported to the WSIB in the reference year, including those that are allowed, not allowed and those pending at the end of the year (such as those awaiting further information upon which to base an entitlement decision).

The breakdown of claims by accidents in the current year and in prior years provides a relative measure of reporting delays in different years.

#### Number of Accidents in a Year Registered as of March 31 of the Following Year by Industry Sector (1997 - 1998)

Figures in this table show the number of accidents which occurred in the reference year and registered by March 31 of the following year. Some claims are not reported and/or not allowed in the same year as the accident occurred. Therefore, these figures are not complete counts of all accidents that may have occurred during the reference year. Rather, they are an accurate representation of decisions made up to three months after the year of accident (in other words, up to March 31 of the following year).

<sup>\*</sup>Schedule 2 figures are included in Large Business

Note: To better serve our customers, the WSIB reorganized its operations into 17 Industry sectors and small business units. This reorganization took effect in November 1997. (Schedule 2 is grouped as an Industry Sector)

#### Number of Accidents in a Year Registered as of March 31 of the Following Year (1989 - 1998)

Figures in this table show the number of accidents which occurred in the reference year and registered by March 31 of the following year.

Some claims are not reported and/or not allowed in the same year as the accident occurred. Therefore, the figures below are not complete counts of all accidents that may have occurred during the reference year. Rather, they are an accurate representation of decisions made up to three months after

the year of accident (in other words, up to March 31 of the following year). The breakdown by type of claim (lost-time, no lost-time, etc.) is also based on the status of claims as of March 31 of the following year. This status, particularly the pending status, may change after March 31. For

based on the status of claims as of March 31 of the following year. This status, particularly the pending status, may change after March 31. For instance, a claim with pending status on March 31 may later change to lost-time, no lost-time, or not allowed.

#### Notes:

- Reporting claim volumes in the above manner started in 1989.
- 2. Lost-time claims include claims by workers who have lost wages as a result of a temporary disability as well as those who have a permanent impairment with time lost from work.
- 3. No lost-time claims involve accidents in which no wage-loss benefits were paid to the worker. Permanent impairment injuries or occupational diseases where the worker did not lose time from work beyond the day of the accident are also included.
- 4. Abandoned claims include cases in which the WSIB could not collect information from the worker to substantiate the claim or the worker withdraws a claim.
- 5. Denied claims include cases in which the injuries or diseases are not work related, (denial based on merit), or the workers/employers are not covered by the Act, (denial based on status).
- 6. Employers in Ontario are categorized as either Schedule 1 or Schedule 1 employers are required to pay annual premiums, which form the WSIB's Insurance Fund. Compensation and health care for injured workers are inister employersinOntarioareinSchedule1. Schedule2 employersareliableforpayingthebenefitcostsofanyworkerwhosuffersanoccupationalinjuryordisease. Employersinthiscategoryincludemunicipal, provincialandfederalgovernirlinesandtelephonecompanies.

  The WSIB administers the Government Employees Compensation Act (Canada) in Ontario, and therefore covers federal government workers on the same terms and conditions as other workers in Ontario. Throughout this document, the federal employer numbers are cluded in Schedule 2.

ed by the WSIB. The majority of

#### Number of Accidents in a Year with Estimate for Maturing (1989 - 1998)

This table is an extension of Table 3. Its purpose is to provide, as closely as possible, a count of the claims which ultimately will be registered and allowed for accidents occurring in the reference year.

The process by which the counts grow after the end of the year, due to registrations and dispositions of pending claims, is called maturing. A matured count of claims more accurately reflects the base upon which the liabilities of the workers' compensation system are based.

The figures below show the number of accidents in the reference

year, based on registrations and decisions made up to 15 months after the end of the accident year. For example, the figures for 1989 show the number of accidents registered and adjudicated for that year by March 31, 1991.

By comparing these figures to those reported in Table 3, an estimate can be obtained of the maturing that results from additional claims reported after March 31 of the following year, and also from changes in status, such as from pending to allowed.

<sup>\*</sup>The 1998 data is estimated, based on prior registration experience and the probabilities associated with the disposition of new and pending claims.

## **Detailed claims profiles**

The tables in this section provide, by year of accident, detailed analyses of lost-time injuries and occupational diseases. As reported in Table 3, lost-time claims reported and allowed as of March 31 of the following year are included.

Since 1996, a national coding standard, Z795, has been used to record accident details by the nature of injury or disease, part of body, event (type of accident) and source of injury or disease. In addition, the National Occupational Classification (NOC) is used for injured workers' occupations, and industry classification is used for employers' industries. The Standard Industrial Classification (SIC) is used for employers' industries as well as the WSIB's industry sectors.

Please note that figures since 1996 are not comparable to previous years' data. To provide coherence with previous years' data from 1996 onwards, coding has been converted to previous standards. However, due to a change in coding practices driven by the new coding standards, the conversion cannot be perfect. Please read detailed notes in individual tables for specific impacts.

#### *Note:*

As indicated in the explanatory notes for Table 3, the total number of accidents shown in these profiles is not a complete count of accidents that have occurred in the reference year. The figures are the result of a snapshot taken as of March 31 of the following year. For further details, please read the explanatory notes in Table 3.

### Lost-Time Claims by Age Group (1989 - 1998)

<sup>1.</sup> The drop in the number of hearing loss claims starting in 1991 is due to the reclassification of claim type from lost-time to no lost-time.

<sup>2. 1996</sup> figures have been revised due to reclassification of certain nature of injury and disease categories.

<sup>3.</sup> Starting in 1996, the Z795 standard provides more specific codes for multiple injuries. This has led to a decrease in counts for the sprains and strains, and the contusion, crushing, bruise categories.

<sup>4.</sup> NEC stands for not elsewhere classified.

#### Note:

Under the Z795 coding standard, when a disease, disorder, or condition originated in aparticular internal body part, that body part is selected for coding purposes, then grouped in the general categories above. Prior to 1996, most occupational diseases are categorized under Not applicable.

<sup>1.</sup> The increase in counts from infectious and parasitic agents is due to a change in coding practices, specifically naming the actual agent as the source of injury rather than the carrier of that agent.

2. The reduction in the noise category is due to the reclassification of hearing loss claims. See note in Table 7.

<sup>1.</sup> Since 1996, figures which use the National Occupational Classification (NOC) are not comparable to previous years. Please refer to the introduction to the detailed claims profile on page 7.

<sup>2.</sup> The two major attributes of jobs which are used as classification criteria in developing the NOC are skill level and skill type. Management occupations are not assigned to a skill level category and form their own group. This has led to the increase in counts in the managerial, administrative and related occupations category.

<sup>3.</sup> NEC stands for not elsewhere classified.

- 1. To better serve our customers, the WSIB reorganized its operations into 17 Industry sectors and small business units. This reorganization took effect in November 1997. (Schedule 2 is grouped as an Industry Sector)
- 2. 1989 industry sector breakdown is not available.

### Occupational fatalities

Fatal claims refer to all claims where a fatality has occurred and fatal benefits are being claimed. This section shows the distribution of fatal claims submitted (Table 14) and fatal claims allowed (Table 15). The number of allowed fatal claims is irrespective of the year in which the claim was registered or the year in which the fatality occurred. Therefore, numbers within each of the two tables are not comparable.

Fatal claims are categorized into the following:

- occupational diseases the worker had an occupational disease and died;
- traumatic accidents the worker had an accident at work and died either the same day or at a later date due to a traumatic injury; and
- 100% disability pensions the worker who died was receiving a 100% permanent disability pension.

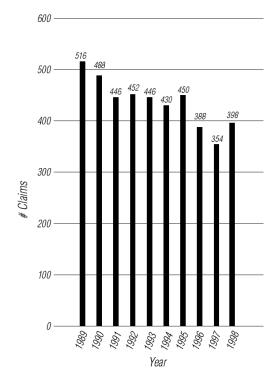

Figures in the above categories are mutually exclusive.

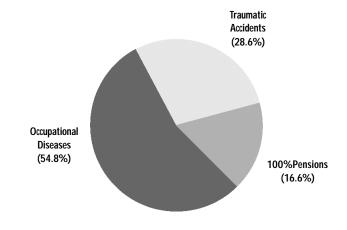

#### Occupational Fatalities by Year of Registration (1989 - 1998)

## Estimated duration of short-term disability benefits

This section shows the composite measure of the average duration of short-term disability benefits. This measure was adopted in February 1994 as a standard for reporting by the members of the Association of Workers' Compensation Boards of Canada Steering Committee on Comparability. Short-term disability benefits include all benefit periods under section 37 of Ontario's *Workers' Compensation Act, 1990 (as amended)* (i.e. temporary compensation and short-term vocational rehabilitation) which are awarded while reaching maximum medical rehabilitation.

Under Bill 162, which was in effect from January 2, 1990 to December 31, 1997, workers who suffer an injury or occupational disease resulting in temporary disability for twelve continuous months are eligible for future economic loss (FEL) benefits under section 43. Benefit periods under sections 147(2) and 43(9) are not included.

Under Bill 99, which came into effect January 1, 1998, loss of earnings, whether short term or long term, are paid under section 43.

The composite approach uses short-term disability benefit days paid in the current year to estimate an average lifetime duration of short-term disability over the life of a claim. Days of short-term disability paid in the current year are separated by year of accident into a series of components, including:

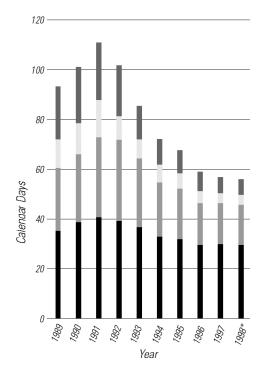

- benefit days paid in the current year for accidents that happened in the current year, divided by the number of lost-time injuries or occupational diseases in the year – an estimate of the duration during the first year of accident;
- benefit days paid in the current year for accidents that happened in the calendar year prior to the current year, divided by the number of lost-time injuries or occupational diseases in that year – an estimate of the duration during the first year after the year of accident;
- benefit days paid in the current year for accidents that happened two
  calendar years prior, divided by the number of lost-time injuries or
  occupational diseases in that year an estimate of the duration during
  the second year after the year of the accident; and
- benefit days paid in the current year for accidents that happened
  three or more calendar years prior, divided by the number of lost-time
  injuries or occupational diseases in that year an estimate of the
  duration during the third year after the year of accident.

### **Estimated Duration of Short-Term Disability Benefits (1989 - 1998)**

Average Duration Components	1989	1990	1991	1992	1993	1994	1995	1996	1997	1998*
Current Year	35.2	38.7	40.7	39.2	36.6	32.9	31.9	29.6	28.9	29.5
First Year After	25.2	27.2	32.1	32.5	27.7	21.7	20.3	16.7	16.5	16.0
Second Year After	11.6	12.6	14.9	9.6	7.6	7.2	6.1	4.9	4.2	4.0
Third and Subsequent Years After	21.3	22.6	23.1	20.5	13.5	10.3	9.3	7.7	7.0	6.1
Lifetime Duration (calendar days)	93.3	101.1	110.8	101.8	85.4	72.0	67.6	58.9	56.5	55.7

#### **Duration of Short-Term Disability Benefits**

- 1. Data is as of 15 months after year-end.
- The sum of figures for current, first, second, third and subsequent years after may not add up to lifetime duration (i.e. total calendar days) due to rounding.

### **Future economic loss awards**

- 1. Compensation for future economic loss (FEL) of earnings is awarded under section 43 of the Workers' Compensation Act, 1990 (as amended). These benefits apply to accidents that occurred from January 2, 1990, to December 31, 1997. Workers who sustain injuries or occupational diseases resulting in 12 months of continuous temporary total benefits and workers who sustain injuries resulting in permanent impairment are entitled to FEL benefits.
- 2. The amount of compensation is equal to 90% of the difference between the worker's net average earnings before the injury or occupational disease and the net average earnings that the worker is likely to be able to earn after the injury or occupational disease.
- 3. As of January 1, 1998, reviews can take place whenever there is a material change in circumstances in connection with entitlement related to the claim.
- 4. Supplements to FEL benefits are applicable to injured workers who are cooperating in a WSIB-authorized early and safe return to work or labour market re-entry or medical rehabilitation program.
- 5. Figures represent the total number of active FEL awards and supplements for which the WSIB was paying benefits on December 31 of the reference year.
- 6. Only FEL awards which result in a wage loss are included.

### Non-economic loss awards

- Compensation for non-economic loss (NEL) is awarded under section 42 of the Workers' Compensation Act, 1990 (as amended) and section 46 of the Workplace Safety and Insurance Act, 1997. These benefits are applicable to accidents that occurred after January 1, 1990. Workers who suffer a permanent impairment as a result of a workplace injury or occupational disease are entitled to NEL benefits.
- 2. Workers become eligible for NEL benefits if, at maximum medical rehabilitation, a permanent impairment is likely. A worker reaches maximum medical rehabilitation when there is unlikely to be any further significant improvement in the worker's medical condition.
- 3. Permanent impairment means impairment that continues to exist after the worker achieves maximum medical rehabilitation. The percentage of impairment is determined through a medical assessment.
- 4. The first NEL benefits were awarded in April 1992.

- 1. A substantially higher number of supplements were awarded in 1989 and 1990 as a result of the transitional provisions of section 147 of the Workers' Compensation Act, 1990 (as amended).
- 2. Figures exclude lump sum awards.
- 3. Starting in 1990, figures exclude reassessments.
- 4. Figures are not counts of workers receiving pensions and/or supplements. Some pensioners receive more than one award in a year.
- 5. The reduction in periodic pension awards in 1990 was offset by an increase in the number of workers who elected to receive their pension award as a lump sum.
- 6. As of January 1, 1995, section 147(14) of the Workers' Compensation Act, 1990 (as amended), provides an additional payment of up to \$200 per month for the following categories of injured workers: those who receive a supplement to their pension for permanent partial disability under section 147(4) of the Act; those whose 147(4) supplement ceased when they turned 65 and became eligible for Old Age Security (OAS) benefits; and those who would have been entitled to a section 147(4) supplement but for their age.

- 1. Figures represent the total number of awards for which the WSIB was paying benefits on December 31 of the reference year.
- 2. Starting in 1990, figures exclude reassessments.
- 3. Figures do not represent the number of workers receiving pensions and/or supplements. A small number of pensioners were in receipt of more than one award at December 31 of the reference year.
- 4. Figures exclude lump sum awards.
- 5. Provisional pensions are awarded in certain cases.
- 6. The substantially higher number of supplement awards active in 1989 and after was the result of the transitional provisions of section 147 of the Workers' Compensation Act, 1990 (as amended).
- 7. As of January 1, 1995, section 147(14) of the Workers' Compensation Act, 1990 (as amended), provides an additional payment of up to \$200 per month for the following categories of injured workers: those who receive a supplement to their pension for permanent partial disability under section 147(4) of the Act; those whose 147(4) supplement ceased when they turned 65 and became eligible for Old Age Security (OAS) benefits; and those who would have been entitled to a section 147(4) supplement but for their age.

The Workplace Safety and Insurance Board (WSIB), formerly the Workers' Compensation Board, oversees Ontario's workplace safety education and training system. The WSIB also administers the province's no-fault workplace insurance for employers and their workers. As part of this system, the WSIB provides disability benefits, monitors and pays for quality health care and assists in early, safe return to work for workers who are injured on the job or contract an occupational disease, and provides for labour market re-entry services. The WSIB is entirely funded by employer premiums and receives no funding from the Ontario provincial government.
