Programmable Thermostat Offer
51 Highland Road, Moose Jaw, SK S6J 1M5

Save energy & money with a programmable thermostat

Installing a programmable thermostat is one of the simplest ways to improve your home's energy efficiency. You can save 2% on your heating bill for every 1°C you turn down your thermostat at night and when you're not at home.

With a programmable thermostat to consistently lower your heat when you don't need it, you could save up to \$80 a year! You'll also have the satisfaction of knowing you're doing your part for our environment.

Did you know?

Your old thermostat may contain mercury that can be harmful if not disposed of properly. Take it to a participating SaskPower customer service office, or ask your contractor if they participate in SaskPower's Mercury Thermostat Recovery Program. Visit saskpower.com for more information.

Complete the form below and mail it in along with a copy of the bill of sale and UPC symbol to receive a \$15.00* credit on your SaskEnergy account.

Name: _____ Phone: _____

Address: _____ City/Town: _____

Postal Code: _____

Installation Location: Residential Commercial

Purchased from: _____ Date: _____

Programmable Thermostat Make and Model: _____

Age and Type of Furnace: _____

SaskEnergy Account Number: _____

*To be eligible for this rebate offer you must be a SaskEnergy customer. All information must be completed, including a valid SaskEnergy account number matched to the address indicated, a copy of the bill of sale for a programmable thermostat purchased between October 1, 2007 and March 31, 2008, and the UPC code symbol. Offer subject to cancellation without notice at any time. Forms must be postmarked no later than April 30, 2008. The rebate is up to \$15 but will not exceed the actual cost of the programmable thermostat. Please allow 6-8 weeks for your credit to be applied to your SaskEnergy account.
