Green Initiatives Fund Green Technology Commercialization Grant Pre-Qualification Application Form

PART B – PRE-QUALIFICATION QUESTIONS

The set of questions outlined in this application form are intended to provide the Green Technology Commercialization Grant administration with an overall description of your project and will be used to assess the compatibility of the project with the Fund's purpose. This is the first step in applying for a grant. Proponents of projects that show potential to qualify for funding will be contacted for consultation and will be asked to submit a more detailed application at a later date.

Please answer the following questions in no more than five pages:

1. What is your project idea? Provide a brief description of the project and its connection to green technology commercialization. Include the purpose and objectives of the project, schedule of major project phases and support from others.
2. What are the environmental benefits of the technology? (e.g. greenhouse gas emission reductions, water conservation, land remediation)
3. Briefly explain the development of your technology from research and development to its current state. Has the technology been developed as part of a product or service? Do you have the necessary patents or permissions to produce the proposed technology?
4. Describe the market demand for your proposed good or service.
5. To what extent will your project have a positive impact on Saskatchewan's economy? (job creation, skills training, product delivery)?
6. What are the estimates for total project cost and funding sources? Prepare a table outlining all costs and funding sources.

Example:

COSTS	\$	FUNDING	\$
Equipment, materials supplies		Amount requested from GTCF	
Labour		In kind contributions	
Other		Funding from other sources	
TOTAL PROJECT COSTS	\$	TOTAL FUNDING	\$

7. What barriers to commercialization are you currently facing? Why do you need funding from the Green Technology Commercialization Grant? How do you plan on using the requested grant?
