PUBLIC NOTICE

PUBLIC SHOULD AVOID FLOODWAY CONSTRUCTION ZONES

The Red River Floodway Expansion Project has created an “active construction zone” along the entire length of the floodway channel. This means that workers and heavy equipment are on site at all times and new construction hazards arise and change throughout the year.

As a result, the public should avoid travel on the floodway at all times to ensure their safety and the safety of workers on the project.

Please remember, workers operating heavy equipment are concentrating on the work they are doing and do not expect to have people - either on foot, on all terrain vehicle, snowmobiles or in 4X4s - in the vicinity of where they are working.

Thank you for your cooperation in keeping the construction site safe for the public and for floodway workers.
