

# DANGER...

# Moose Alert

Over 250 moose-vehicle collisions occur on New Brunswick's highways every year. A moose can weigh 450 kilograms (1,000 pounds) and stand 2 metres (6½ feet) tall. Collisions with such a large animal often result in severe damage to the vehicle involved and sometimes death or serious injury to vehicle occupants.

## What To Do ?

**Slow Down**  
when driving at night

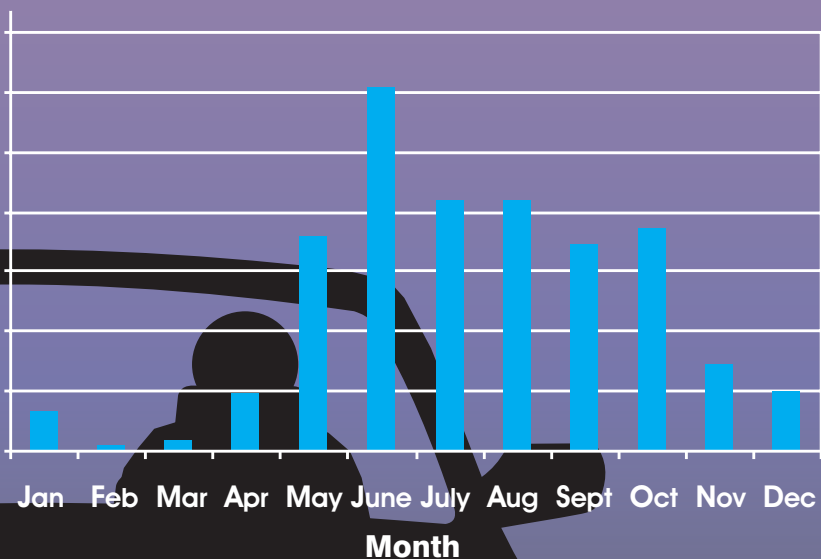

**Pay Attention**  
to the Warning Signs

**Scan**  
both sides of the road ahead

**Keep Windshield Clean**

**Keep Headlights Adjusted**  
use high beams whenever possible
