

Tory Support Slides in New Year

To follow is a review of the latest Nanos national random telephone survey of Canadians 18 years of age and older. It was completed between February 2nd and February 4th, 2008. The statistics of committed voters for the current wave is accurate to within 3.4 percentage points, plus or minus, 19 times out of 20. The margin of accuracy will be wider for sub samples. Percentages may exceed 100 due to rounding.

The research was registered with the Marketing Research and Intelligence Association of which Nanos is a Gold Seal Corporate member.

For those parties you would consider voting for federally, could you please rank your top two current local preferences? (Committed Voters Only - First Preference)

Intensity of comfort for Harper majority solid but lessens

 February 7th, 2008

METHODOLOGY

Between February 2nd and February 4th, 2008, Nanos Research conducted a random telephone survey of 1,002 Canadians 18 years and older on behalf of CPAC. The aggregate survey results are accurate $\pm 3.1\%$, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for age to match the latest Canadian census results. Results should be considered representative of the Canadian population. Results may not add up to 100% due to rounding.

NANOS – SUN MEDIA POLL - COMFORT WITH HARPER MAJORITY GOVERNEMENT POLL

As you may know, the Conservative Party led by Stephen Harper is a minority government. Based on what you know and have seen about Stephen Harper and the Conservative government's record so far, would you be comfortable, somewhat comfortable, somewhat uncomfortable or uncomfortable with the Stephen Harper-led Conservatives potentially winning the next election and forming a majority government?
