PART XII.3 TAX RETURN - TAX ON INVESTMENT INCOME OF LIFE INSURERS

For use by a life insurer to calculate the Part XII.3 tax on its taxable Canadian life investment income for the year.	Do not use this area
• File two copies of the completed return, separately from any other return, at the tax centre serving the life insurer's head office, on or before the due date of its T2 return.	
You will find definitions of certain expressions used in this return on the following page.	
 Penalties are applicable if this return is not filed by the due date. Such penalties and any unpaid taxes bear interest compounded daily at a prescribed rate. 	
Parts and subsections referred to on this form are from the <i>Income Tax Act</i> .	
Name of life insurer (print)	Business Number
Address	Postal code
Taxation year for the Year Month Day Year Month Day Tax services offi	ce
Name of person to contact for more information Area code	Telephone number
Complete the following calculation using the amounts determined on the following pages of this return: 1. Basic investment income – from Schedule 2 2. Add: Claims fluctuation reserve adjustment – from Schedule 3 3. Subtotal (line 1 plus line 2) 4. Deduct: Adjustment for amounts reported to policyholders – from Schedule 4 5. Canadian life investment income (loss) for the year – (line 3 minus line 4) (see note below) 6. Deduct: Canadian life investment loss carryforward applied during the year – from Schedule 5 7. Taxable Canadian life investment income – (line 5 minus line 6) Part XII.3 tax payable for the year –15% of taxable Canadian life investment income (line 7) Deduct: Instalments paid Note: If you have a Canadian life investment loss for the year, no Part XII.3 tax is payable. You can carry forward this seven taxation years and applied against Canadian life investment income. Balance unpaid Refund Payment on filing	
In accordance with Section 211.3 of the <i>Income Tax Act</i> , instalments on account of Part XII.3 tax are payable monthly during the taxation year. Any remainder is payable not later than two months after the end of the taxation year. Attach a cheque or money order payable to the Receiver General. Specify "T2142" on the remittance and indicate the name, Business Number, and the taxation year of the insurer whose account is to be credited. Certification I,, certify that the information given in this return and in any attached documents, is to the best of my knowledge, true, correct, and complete.	Do not use this area

Definitions

The following definitions of expressions used in this return provide general guidance for the calculations required under the *Income Tax Act*. Please consult the *Income Tax Act* for more precise meanings, where applicable.

- "B14013 interest rate" (iⁿ) used in calculating income under Part XII.3 is the moving average rate for the 60-month period before the tax year on certain Government of Canada bonds refer to subsection 211(1). For corporations with December 31 year ends, and not having a short taxation year, (iⁿ) has the following values: for 1988 11.01%; for 1989 10.70%; for 1990 10.13%; for 1991 10.09%; for 1992 10.14%; for 1993 9.91%; for 1994 9.43%; for 1995 9.17%; for 1996 8.66%; for 1997 8.21%; for 1998 7.74%; for 1999 7.26%; for 2000 6.67%; for 2001 6.19%. Please contact your tax services office to obtain the B14013 interest rate (iⁿ) for years not shown on this form.
- "CFRmax" represents the maximum amount that would be determined under Regulation 1401(1)(c.1) for the policy, if Regulation 1401(1) applied to all life insurance policies, and that amount were determined without reference to policy loans or reinsurance arrangements.
- "Existing guaranteed life insurance policies" (EGLIPs) are non-participating Canadian life policies, issued before January 1, 1990, where the amount and number of premiums and the amount of benefits were fixed and determined before that date.
- "Guaranteed rate of interest" (igtd) for an RRP policy refers to the rate of interest used in determining the guaranteed benefits or 4%, whichever is greater. For an FRP policy, igtd is deemed to be nil.
- "Full rate policies" (FRPs) are taxable life insurance policies other than RRPs.
- "Reduced rate policies" (RRPs) are taxable life insurance policies with guaranteed benefits provided under the terms and conditions of the policies as they existed on March 2, 1988 and which have not been changed after March 2, 1988, unless to give effect to the terms and conditions that were determined before March 3, 1988.
- "Reinsurance" does not include assumption arrangements in which the assuming company takes over the position of the original insurer; they are to be treated as direct insurance of the assuming company for purposes of these calculations.
- "Taxable life insurance policies" are life insurance policies in Canada other than EGLIPs, annuity contracts, registered pension plans, registered life insurance policies, or retirement compensation arrangements.

Schedule 1 -

Maximum reserves determined for Part XII.3 tax purposes Reconciliation of reserves for Investment Income Tax (IIT)

	Individual	Group
Maximum reserve determined under 1401(1)(a), (c) or (d) for the current year:		
. Canadian life insurance policies (ignore policy loans and accrued interest)		·
2. Add: Reinsurance ceded on all life policies		
3. Subtotal (line 1 plus line 2)		-
Deduct: Reinsurance assumed on all life policies		
5. Direct written - Canadian life insurance policies (line 3 minus line 4)		
Deduct: Non-taxable policies (ignore reinsurance, policy loans and accrued interest):		
S. Annuity contracts		
7. Registered life insurance policies		
Retirement compensation arrangements		
Existing guaranteed life insurance policies		
0. Total of above deductions (lines 6 to 9)		
1. Policies subject to IIT (line 5 minus line 10)		
2. Deduct: Maximum determined under 1401(1)(d)(ii) re: disabled life		
reserves that are included in line 11 (ignore reinsurance		
policy loans and accrued interest)		
3. Taxable policies current year (line 11 minus line 12)		
4. Taxable policies preceding year (see note)		-
5. Mean taxable policies (average of lines 13 and 14)		
6. Mean maximum determined reserves subject to IIT		
(total of amounts on line 15)	<u></u>	
	(to be alloca	ated in

Notes:

- 1. On line 14, enter the amount that would have been determined in the preceding year for all taxable policies at the end of the current year.
- 2. All amounts in this schedule are to be calculated for each policy separately, and then aggregated before entering the figures above.
