Northwest Territories	3,890	-2.3	6,295	8.1	400	13.1

**Notes:**

1. Canadians contribute in many ways to charitable organizations. These data include only amounts given to charities and approved organizations or which official tax receipts were provided and claimed on tax returns. It is possible to carry donations forward for up to five years after the year in which they were made. Therefore, donations reported for the 2015 taxation year could include donations that were made in any of the five previous years. According to tax laws, taxfilers are permitted to claim both their donations and those made by their spouses to receive better tax benefits. Consequently, the number of people who made charitable donations may be higher than the number who claimed tax credits.
2. All data in this release have been tabulated according to the 2011 Standard Geographical Classification used for the 2011 Census.

**Note to Readers:**

The percentage figures for Nunavut reflect the relatively small number of donors and small amount of donations. Over a number of years, the resulting changes would be a better indication of actual changes in either donors or donations.
