The 5-Year Plan

The 2015-16 Five Year Highway Improvement Plan maps out government's approach to repairing and maintaining the province's 23,000 kilometres of roads and highways and 4,100 bridges. The plan outlines major highway and road projects, repaving, major bridge replacements, capital maintenance and infrastructure work the province plans to pursue year by year over the next five years.

Sharing the specific plans for road improvement in the Five Year Highway Improvement Plan gives private companies better opportunity to prepare for the more than 120 upcoming highway improvement projects in 2015-16. It also helps to inform Nova Scotians about the improvements being made in their communities.

The road building industry in Nova Scotia is a large source of jobs, creating an estimated 5,000 direct and 2,500 indirect positions every year. The annual payroll for Nova Scotians employed in road building is approximately \$300 million. For instance, a typical \$2 million paving contract generates about 60 direct jobs and about \$200,000 worth of business for the trucking industry and spin-off benefits for local businesses that provide construction materials, metalwork/ welding, engineering, electrical and hazard removal.

Roads in Nova Scotia

100-series highways

These are the highest traffic volume roads in Nova Scotia and many are part of the National Highway System

Secondary highways, trunks, and routes

Lower traffic volumes than 100-series highways, but well used to connect local communities

Provincial local roads

Local paved and gravel roads with much lower traffic volumes, sometimes less than 500 vehicles per day

Municipal roads

Roads within municipal boundaries that fall under the responsibility of local municipalities

Highway Funding in Nova Scotia 2015-2016

The total highway capital budget for 2015-16 is \$220 million. Additional operational funding for highway maintenance will be made available as part of the 2015-16 budget.

Capital funding for highway construction and maintenance comes from three sources:

Provincial -- Highway funding in Nova Scotia includes all revenues collected through provincial gas taxes and registration of motor vehicles, as well as other funding provided by the provincial government.

Federal -- Federal money to support highway improvement projects will be provided by the Building Canada Plan.

Municipal -- Municipalities contribute on cost-shared projects in their areas.

How Capital Funding is Invested

Major Construction (new Highway and Bridges)	\$68,000,000
Asphalt and Resurfacing	\$105,500,000
Bridge Replacement/Rehabilitation	\$31,000,000
Land Purchases	\$6,000,000
Equipment, Machinery, Ferries	\$8,500,000
Highway Design, Studies, Surveys	\$1,000,000
Total Funding	\$220,000,000

5-Year Highway Improvement Projects

The following tables list major construction and asphalt paving projects on 100-series highways, trunks and routes, plus major bridge replacements and rehabilitations for the next five years. Local roads, pavement preservation and double chip resurfacing are also included for 2015-16.

This plan can change, including project descriptions, as there are many steps to maintaining and building roads and bridges and each step affects the next.

There is also the weather to consider. Sometimes the Province, in partnership with road builders, can bring projects forward and begin work earlier than planned, and sometimes delays happen.
