Dear Sir or Madam,

Please do not situate your nuclear waste anywhere near the Great Lakes; the threat to the water of 40 million people can not be overstated, and once a problem develops it will be too late to do anything about it.

The answer is simple: spend whatever it takes to relocate the waste to an uninhabited area, and spend whatever it takes in time and planning to move the waste there without mishap. Whether it's profitable or not is beneath question.

Sincerely,

Nick Thabit
