Subject: nuclear waste burial plan beside Lake Huron
Date: March 6, 2017 7:25:16 PM

My family and relatives all live near the shore of Lake Michigan. I would be appalled to find out that a nuclear power plant in Wisconsin would plan to bury nuclear waste near Lake Michigan. Seek some cheaper alternative that does not involve the Great Lakes. Ontario Power Generation should provide energy for its citizen's, not additional power for oil extraction from the tar sands.
