Subject: No nuclear storage near the Great Lakes
Date: March 7, 2017 1:32:19 AM

I truly hope that the Facebook post was satire, and that Canada is not actually considering storing nuclear waste near the Great Lakes. If it isn't just a story to try and dissuade United States citizens from moving to Canada, please know that this plan could remove life on earth as we know it, which makes it a bad idea. Thank you.
