Please receive this email as my opposition to the proposed plan to bury radioactive waste so proximal to Lake Huron.

I feel I should not need to give any more reason than pointing out that fresh water and radioactive waste dont mix. Or better yet, I should say that if they do, they cannot be separated.

We cannot let this go through regardless of safety proposals. There WILL be an accident. That is the nature of accidents, they are unexpected, but a logistical blunder of this proportion is an accident magnet.

Our only way to ensure the accident doesnt exist is to find a better idea right off the bat.

No more to say.

Mark Hamelin
