Subject: Toxic Dump!
Date: March 8, 2017 8:56:55 AM

I know that this letter is just under the deadline, but I want you to stop the dump for toxic, radioactive material on the shore of our Great Lakes-please! So many of us know that it is a problem to dispose of the stuff, but will resent and demonstrate against this and will make an issue of this for a long time to come. This is an ill thought out plan-so near to our biggest water supply and near areas where people live, and work on the water-it may not be geographically in everyone's back yard, but it may as well be.

I beg of you to stop this now and leave southern Ontario to grapple with our many other environmental messes caused by chemicals, water extraction and air pollution. You will be affecting millions and millions of people, not only in this area, but around the connected lakes and their shores.

This would be a catastrophe of monumnetal proportions for us and future generations. Your children will not thank you.

Geraldine Walsh
